Chemical Physics is published semi-monthly. The 1983 subscription price per volume is Dfl. 225.00 (approx. $ 90.00) excludir Dfl. 20.00 (approx. $ 8.00) postage and handling. Claims for issues not received should be made within three months of public tion. If not, they cannot be honoured free of charge.

Subscriptions should be sent to the publisher: NORTH-HOLLAND PUBLISHING COMPANY, P.O. Box 211, Amsterdam, TH Netherlands, or to any subscription agent or bookseller.

North-Holland Publishing Company (1983). All rights reserved. No part of this publication may be reproduced, stored in a retriev system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without th prior permission of the publisher, North-Holland Publishing Company, P.O. Box 103, 1000 AC Amsterdam, The Netherlands. Submission of an article for publication implies the transfer of the copyright from the author(s) to the publisher and entails th author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproductio payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of Jun 20, 1974 (S.351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewit

Special regulations for readers in the USA. This journal has been registered with the Copyright Clearance Center, Inc. Consent given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on th condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copyin beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy the first page of the article to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. If no code appea in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the autho All articles published prior to 1981 may be copied for a per-copy fee of US $ 2.25, also payable through the Center. This conse does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creati new collective works. Special written permission must be obtained from the publisher for such copying.

Special regulations for authors in the USA. Upon acceptance of an article by the journal, the author(s) will be asked to transf copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information under the U Copyright Law.

SUBJECT INDEX TO VOLUMES 61–70

METHODS

Theoretical

Group theory and algebras

Theory of the decay of the fluorescence polarization anisotropy of macromolecules with local cylindrical symmetry, J.M. Schurr 65 (1982) 417
The factorization method for the treatment of local mode vibrations in polyatomic molecules: structural features of XH stretching overtone bands, M.A. Mohammadi 66 (1982) 153

Classical mechanics and field theory

Periodic orbits, adiabaticity and stability, E. Pollak 61 (1981) 305
Trajectory studies of collinear collision between a particle and a non-linear oscillator in a laser field, D.W. Noid and W.-K. Liu 62 (1981) 37
A high energy classical trajectory study of the reactions $O(^3P) + H_2 \rightarrow OH + H$ and $O(^3P) + H_2 \rightarrow O + H + H$, Z.B. Alfassi and M. Baer 63 (1981 275
Classical dynamics of multiphoton dissociation for a model system, D.L. Martin and R.E. Wyatt 64 (1982) 203
Interpretation of the crystal field parameters by the angular overlap model – application to some f^n electron systems, C. Linarès, A. Louat and M. Blanchard 68 (1982) 453
On the calculation of classical time-correlation functions: diagonalization of the "Liouville matrix", J.W. Allen and D.J. Diestler 70 (1982) 241

Stationary wavefunctions

Pseudopotential calculations on P_2, P_2^+, P_4 and P_4H^+, U. Wedig, H. Stoll and H. Preuss 61 (1981) 117
EHMO study of hydrogen adsorption on Pt clusters, J. Andzelm and E. Radzio-Andzelm 61 (1981) 317
An ICR study of sequential two-photon dissociation of benzene, cyanobenzene and bromobenzine. A quadratically convergent Hartree–Fock (QS-SCF) method. Application to closed shell systems, G.B. Bacskay 61 (1981) 385
Electronic structure in large finite aperiodic polypeptide chains, R.S. Day, S. Suhai and J. Ladik 62 (1981) 165
An ab initio study of the influence of substituents and intramolecular hydrogen bonding on the carbonyl bond length, and the harmonic and anharmonic stretching force constants. I. Monosubstituted carbonyl compounds, C.W. Bock, M. Trachtman and P. George 62 (1981) 303
Momentum distributions and binding energies for the valence orbitals of methanol, A. Minchinton, C.E. Brion and E. Weigold 62 (1981) 369
An LCAO HFS investigation of the electronic structure of cobaltocene, C. Famiglietti and E.J. Baerends 62 (1981) 407
Ab initio evaluation of the five-photon ionization cross sections of nitric oxide, P. Cremaschi 63 (1981) 85

Rydberg states and the observed spectrum of ArH, M. Berman, U. Kaldor, J. Shmulovich and S. Yatsiv 63 (1981) 165
Internally folded densities, A.J. Thakkar, A.M. Simas and V.H. Smith Jr. 63 (1981) 175
Calculation of the hyperfine spectrum for H_2–Ne, H_2–Ar, H_2–Kr dimers, M. Waaijer, M. Jacobs and J. Reuss 63 (1981) 247
Comparison of the effects of symmetric versus asymmetric H bonding on ^2H and ^{17}O nuclear quadrupole coupling constants: application to formic acid and the hydrogen diformate anion, J.E. Gready, G.B. Bacskay and N.S. Hush 64 (1982) 1
Excited state properties from the equations of motion method. Application of the MCTDHF–MCRPA to the dipole moments and oscillator strengths of the $A\,^1\Pi$, $a\,^3\Pi$, $a'\,^3\Sigma^+$, and $d\,^3\Delta$ low-lying valence states of CO, D. Lynch, M.F. Herman and D.L. Yeager 64 (1982) 69
The electronic structure and the He(I) photoelectron spectrum of bis (π-pentadienyl)dinickel, M.B. Böhm and R. Gleiter 64 (1982) 183
Ab initio studies on hydrogen bonded chains. II. Equilibrium geometry and vibrational spectra of the bent chain of hydrogen fluoride molecules, A. Beyer and A. Karpfen 64 (1982) 343
Theoretical models for activation of CO_2 towards hydration ($CO_2 + H_2O \rightarrow H_2CO_3$) by cationic binding sites, Y. Jean and F. Volatron 65 (1982) 107
An approach to the estimation of polyatomic vibrational radiative relaxation rates, E. Herbst 65 (1982) 185
SCF-Xα scattered wave model cluster calculations for the adsorption systems CO/Ni and N_2/Ni, A. Schichl, D. Menzel and N. Rösch 65 (1982) 225
Depolarization dispersion curves of resonance Raman fundamentals of metalloporphyrins and metallophthalocyanines subject to asymmetric perturbations, M.Z. Zgierski and M. Pawlikowski 65 (1982) 335
Influence of inhomogeneous broadening on resonance Raman characteristic of metalloporphyrins and metallophthalocyanines, M.Z. Zgierski 65 (1982) 369
A quadratically convergent Hartree–Fock (QC-SCF) method. Application to open shell orbital optimization and coupled perturbed Hartree–Fock calculations, G.B. Bacskay 65 (1982) 383
A simple method for the evaluation of the second-order perturbation energy from external double-excitations with a CASSCF reference wavefunction, B.O. Roos, P. Linse, P.E.M. Siegbahn and M.R.A. Blomberg 66 (1982) 197
Non-adiabatic interactions in the symmetric ring opening process of dioxirane, R. Cimiraglia, T.-K. Ha, R. Meyer and Hs.H. Günthard 66 (1982) 209
Clarification of the assignment of the electronic spectrum of hydrogen chloride based on ab initio CI calculations, M. Bettendorff, S.D. Peyerimhoff and R.J. Buenker 66 (1982) 261
Matrix trapping site for H atoms in solid Ne and Ar, S. Ossicini and F. Forstmann 66 (1982) 333
A quantum chemical investigation of the ammonium radical. I. SCF-Xα-SW calculations of the electronic structure and Rydberg spectra, E. Broclawik, J. Mrozek and V.H. Smith Jr. 66 (1982) 417
On the validity of the Xα method in the computation of ionization potentials. A comparison of the results for small molecules, G. De Alti, P. Decleva and A. Lisini 66 (1982) 425
Experimental and theoretical studies of the valence-shell dipole excitation spectrum of molecular fluorine, A.P. Hitchcock, C.E. Brion, G.R.J. Williams and P.W. Langhoff 66 (1982) 435
Double ionization of methane, P.E.M. Siegbahn 66 (1982) 443
The parameter dependence of calculated Koopmans' defects in the framework of a model hamiltonian verified in the case of transition metal compounds, M.C. Böhm 67 (1982) 255

Vibrational frequencies from anharmonic ab initio/empirical potential energy functions. III. Stretching vibrations of hydrogen cyanide and acetylenes, P. Botschwina 68 (1982) 41
Slip planes crystal growth and the photodimerisation of anthracene, G.M. Crisp and S.H. Walmsley 68 (1982) 213
Physical adsorption of a heteronuclear diatomic molecule onto a solid surface: a theoretical approach, W.J. Welsh and D.D. Fitts 68 (1982) 441
CEPA calculations of potential energy surfaces for open-shell systems. II. The reaction of C^+ ions with molecular hydrogen, R. Jacquet and V. Staemmler 68 (1982) 479
Effects of relativity in the He(I) photoelectron spectrum of CI_4, G. Jonkers, C.A. de Lange and J.G. Snijders 69 (1982) 109
He(I) photoelectron spectroscopy of tetraiodoethylene (C_2I_4), G. Jonkers, S.M. van der Kerk, R. Mooyman, C.A. de Lange and J.G. Snijders 69 (1982) 115
Vibronic effects in photolysis of metalloporphyrins and hemoproteins, I.B. Bersuker, S.S. Stavrov and B.C. Vekhter 69 (1982) 165
Semi-empirical potential energy surfaces for the linear HXY (X, Y = F, Cl, Br, I) systems, I. Last 69 (1982) 193
Ab initio calculation of nuclear spin–spin coupling constant of HF and CN^-, M.T. Rayez, E. Neumann, J. Hoarau and F. Achard 69 (1982) 323
Relativistic calculation of the electronic structure of $IrCl_6^{3-}$, A Goursot and H. Chermette 69 91982) 329
Binary (e, 2e) spectroscopy and momentum-space chemistry of CO_2, J.P.D. Cook and C.E. Brion 69 (1982) 339
Potential surfaces for the Rydberg states of H_3, Ch. Nager and M. Jungen 70 (1982) 189
Medium stabilization of localized Born–Oppenheimer states, M. Bixon 70 (1982) 199

Coupling schemes

Charge transfer transitions in solid tetracene and pentacene studied by electroabsorption, L. Sebastian, G. Weiser and H. Bässler 61 (1981) 125
The effect of strong coupling between vibrations in hydrogen bonds on the polarized spectra of the mercaptobenzothiazole crystal: an "anomalous" isotopic effect, H.T. Flakus 62 (1981) 103
On the vibrational structure of methyl iodide. I. Cubic and quartic normal mode coupling constants, R. Zygan-Maus and S.F. Fischer 63 (1981) 475
On the vibrational structure of methyl iodide. II. Relaxation pathways in the 3000 cm^{-1} energy regime, R. Zygan-Maus and S.F. Fischer 63 (1981) 485
Depolarization dispersion curves of resonance Raman fundamentals of metalloporphyrins and metallophthalocyanines subject to asymmetric perturbations, M.Z. Zgierski and M. Pawlikowski 65 (1982) 335
Influence of inhomogeneous broadening on resonance Raman characteristics of metalloporphyrins and metallophthalocyanines, M.Z. Zgierski 65 (1982) 369
Building-up principles for diradical states, A. Ceulemans 66 (1982) 169
Semiclassical model of a trinuclear mixed valence system, J.P. Launay and F. Babonneau 67 (1982) 295
Low temperature chemical reactions. I. Models, V.A. Benderskii, P.G. Philippov, Yu.I. Dakhnovskii and A.A. Ovchinnikov 67 (1982) 301
Position dependent deuterium effects on the vapor phase fluorescence lifetimes of tetradeuterophenanthrenes, J.J. O'Brien, M.D. Horne, B.K. Selinger and B.R. Henry 68 (1982) 123

Transport and relaxation theory

Moment analysis of the Mori continued fraction: dipolar absorption in bromomethane and 1-bromonaphthalene, G.J. Davies, M. Veerappa and M.W. Evans 61 (1981) 73

Theory of ligand-induced non-radiative relaxation in lanthanide complexes, D.S. Ray and M. Chowdhury 61 (1981) 157
Analysis of kinetic models for the tunnel electron transfer reactions. Reaction kinetics for various radial and angular dependences of the tunneling probability, A.B. Doktorov, R.F. Khairutdinov and K.I. Zamaraev 61 (1981) 351
Double-resonance and relaxation in a three-level system, C. Feuillade and C. Bottcher 62 (1981) 67
Diffusion of some species of different charge and mass in light and heavy water, C. Biondi and L. Bellugi 62 (1981) 145
Fourth and sixth spectral moments in far infrared spectroscopy, M.W. Evans 62 (1981) 179
Theoretical study on an anomalous isotopic effect on the position and integrated intensity of the IR stretching vibration band for medium-strong and strong hydrogen bonds, Y. Guissani and H. Ratajczak 62 (1981) 319
A statistical model for the density dependence of electron attachment to O_2 molecules, D.R.A. McMahon 63 (1981) 95
Investigation of T_1 -and T_2-relaxation under the influence of a pump radiation, W. Schrepp and H. Mäder 63 (1981) 113
Concentration dependence of the vibrational energy relaxation of O_2 in liquid mixtures, E.W. Knapp and S.F. Fischer 63 (1981) 203
Methyl and tertiarybutyl reorientation in molecular solids, P. Beckmann 63 (1981) 359
Strict Lindemann behaviour because of an activation bottleneck, S.R. Vatsya and H.O. Pritchard 63 (1981) 383
Ion transport in polar gases, K. Sakimoto 63 (1981) 419
Donor fluoresence decay in solid solution, R. Twardowski, J. Kuśba and C. Bojarski 64 (1982) 239
The CO–He system revisited: V–T collisional relaxation from ab initio potentials, F.A. Gianturco, U.T. Lamanna and G. Petrella 64 (1982) 299
Dynamic instabilities in excited molecular crystals. Packing calculations in anthracenic systems, D.P. Craig and C.P. Mallett 65 (1982) 129
The thermodynamic driving force in mutual diffusion of hard spheres, J.M. Schurr 65 (1982) 217
The effect of intramolecular modes on the velocity of non-radiative transitions in a polar medium, A.B. Helman 65 (1982) 271
Brillouin scattering in liquid mixtures: $CCl_4/CHCl_3$, D. Samios, Th. Dorfmüller and A. Asenbaum 65 (1982) 305
Theory of the decay of the fluorescence polarization anisotropy of macromolecules with local cylindrical symmetry, J.M. Schurr 65 (1982) 417
Models of three and four body electron attachment to O_2 molecules, D.R.A. McMahon 66 (1982) 67
Sensitized dissociation of UF_6, $XeOF_4$ and SF_5Cl by SF_6 excited with a pulsed CO_2 laser, C. Angelie, M. Cauchetier and J. Paris 66 (1982) 129
Non-equilibrium dissociation and ionization of nitrogen in electrical discharges: the role of electronic collisions from vibrationally excited molecules, M. Cacciatore, M. Capitelli and C. Gorse 66 (1982) 141
Influence of resonant charge transfer on ion diffusion and generalized Einstein relations, M. Waldman, E.A. Mason and L.A. Viehland 66 (1982) 339
Influence of solvent viscosity on excited state lifetime and fluorescence quantum yield of dye molecules, B. Wilhelmi 66 (1982) 351
Dielectric saturation and dielectric friction on an ion in a polar solvent, J.B. Hubbard and R.F. Kayser 66 (1982) 377
Non-maxwellian velocity distributions and molecular beam intensities in sonic nozzle expansions, C.B. Klots 67 (1982) 75

Coherent state versus localized state quantum dynamics of isomerization reactions, P. Russegger 67 (1982) 161
Theory of the time-dependent-thermal-lensing (TSTL) technique as used in energy-transfer experiments, J.R. Barker and T. Rothem 68 (1982) 331
Gas phase thermal diffusivities by a thermal lens technique, R.T. Bailey, F.R. Cruickshank, D. Pugh, A. McLeod and W. Johnstone 68 (1982) 351
Thermal dissociation of diatomic molecules with bound electronically excited states, N.M. Kuznetsov and A.M. Samusenko 68 (1982) 359
The influence of electrostatic interactions on Franck–Condon factors in electron transfer processes, J.W. van Leeuwen and Y.K. Levine 69 (1982) 89
Observation of the inverse isotope effect in a tunnel electron transfer, A.I. Fiksel, V.N. Parmon and K.I. Zamaraev 69 (1982) 135
On the calculation of classical vibrational energy exchange, J.P. Gibbons and J.D. Stettler 69 (1982) 141
Molecular dynamics simulations of restricted primitive model 1:1 electrolytes, D.M. Heyes 69 (1982) 155
Steric factor in diffusion-controlled chemical reactions, V.M. Berdnikov and A.B. Doktorov 69 (1982) 205
On statistics of an ensemble of oscillators under excitation. III. Quantum non-linear oscillators with fast phase relaxation in a non-monochromatic external field, V.N. Sazonov, A.A. Stuchebrukhov and S.V. Zatsepin 69 (1982) 459
Theoretical probabilities of V–V energy transfer: CO with isotopes of N_2 and deactivation of laser-excited SO_2, V. Revelant and C. Manzanares I. 69 (1982) 473
Electronic excited state transport and trapping in one- and two-dimensional disordered systems, R.F. Loring and M.D. Fayer 70 (1982) 139
Gaseous ion transport coefficients, L.A. Viehland 70 (1982) 149
Circulation reactions. IV. Applicability of phenomenological reaction rate constants: a stochastic approach, A.V. Zubkov 70 (1982) 157
On the calculation of classical time-correlation functions: diagonalization of the "Liouville matrix", J.W. Allen and D.J. Diestler 70 (1982) 241

Statistical mechanics of equilibrium and stationary states

Unsteady kinetics of transport-controlled reactions between strongly interacting particles, A.A. Ovchinnikov and S.F. Burlatsky 63 (1981) 67
Solvent effect on optical activity in dilute solutions, S. Woźniak and B. Linder 63 (1981) 377
Intermolecular potential functions and the properties of water, J.R. Reimers, R.O. Watts and M.L. Klein 64 (1982) 95
The Coulomb condensate of the nonlinear Poisson–Boltzmann equation: a unified theory, M.A. Lampert 65 (1982) 143
An approach to the estimation of polyatomic vibrational radiative relaxation rates, E. Herbst 65 (1982) 185
Order parameters in hydrocarbon chains, O. Edholm 65 (1982) 259
A model for multiphoton ionisation mass spectroscopy with application to benzene, W. Dietz, H.J. Neusser, U. Boesl, E.W. Schlag and S.H. Lin 66 (1982) 105
Theory of sorption of gases on polymers. I. Conformational effects and the double-sigmoid shape of sorption isotherm, P. Pyda and M. Kurzyński 67 (1982) 7
Competitive collisional activation in vibrational energy transfer with cyclopropane-$1t_1$-2, $2d_2$. A three-channel system, V.V. Krongauz and B.S. Rabinovitch 67 (1982) 201
Double Hopf-bifurcation in plane quadratic mass-action systems, C. Escher 67 (1982) 239
On the interatomic potentials for noble gas mixtures, K. Watanabe, A.R. Allnatt and W.J. Meath 68 (1982) 423

Line broadening by diagonal disorder in the vibrational transition of CO in solid α-CO, F. Legay, N. Legay-Sommaire and G. Zumofen 68 (1982) 437
Theory of tunnel transitions of atoms in solids, L.I. Trakhtenberg, V.L. Klochikhin and S.Ya. Pshezhetsky 69 (1982) 121
Molecular dynamics simulations of restricted primitive model 1:1 electrolytes, D.M. Heyes 69 (1982) 155
Multiphoton absorption of SF_6: a numerical analysis of the density-matrix approach, M. Dilonardo, G. Petrocelli and M. Capitelli 70 (1982) 247

Thermodynamics and hydrodynamics
Trends in chemisorption energies with atomic number, F. Flores, I. Gabbay and N.H. March 63 (1981) 391
The thermodynamic driving force in mutual diffusion of hard spheres, J.M. Schurr 65 (1982) 217
Approximative evaluations of the electrostatic free energy and internal energy changes in solution processes, S. Miertuš and J. Tomasi 65 (1982) 239
Generalized lagrangian equations of nonlinear reaction–diffusion, M.A. Biot 66 (1982) 11
Dielectric saturation and dielectric friction on an ion in a polar solvent, J.B. Hubbard and R.F. Kayser 66 (1982) 377
Non-maxwellian velocity distributions and molecular beam intensities in sonic nozzle expansions, C.E. Klots 67 (1982) 75
Double Hopf-bifurcation in plane quadratic mass-action systems, C. Escher 67 (1982) 239
The effect of the lattice expansion on high spin ⇌ low spin transitions, H. Spiering, E. Meissner, H. Köppen, E.W. Müller and P. Gütlich 68 (1982) 65
Acoustic anomaly in a critical binary mixture of aniline and cyclohexane at low and ultrasonic frequencies, H. Tanaka, Y. Wada and H. Nakajima 68 (1982) 223
Molecular dynamics simulations of restricted primitive model 1 : 1 electrolytes, D.M. Heyes 69 (1982) 155

Many-body approaches
Perturbation theory of the electron correlation effects for atomic and molecular properties. III. Fourth-order corrections to molecular dipole moments and polarizabilities, G.H.F. Diercksen and A.J. Sadlej 61 (1981) 293
Interactions between Frenkel excitons. I. Formalism and preliminary results, D. Fox 61 (1981) 477
Theory of ultrasonic absorption in anharmonic molecular crystals, R.G. Della Valle, P.F. Fracassi and S.H. Walmsley 62 (1981) 231
Momentum distributions and binding energies for the valence orbitals of methanol, A. Minchinton, C.E. Brion and E. Weigold 62 (1981) 369
The shifted scheme in the general-model-space diagrammatic perturbation theory, G. Hose and U. Kaldor 62 (1981) 469
A statistical model for the density dependence of electron attachment to O_2 molecules, D.R.A. McMahon 63 (1981) 95
The electronic structure and the He(I) photoelectron spectrum of bis (π-pentadienyl) dinickel, M.C. Böhm and R. Gleiter 64 (1982) 183
Hole-mixing effects in the ionization of some unsaturated oxo-compounds, W. von Niessen, G. Bieri, J. Schirmer and L.S. Cederbaum 65 (1982) 157
Configuration interaction and perturbation study of the electron correlation contribution to the dipole polarizability of beryllium, G.H.F. Diercksen and A.J. Sadlej 65 (1982) 407

Enhancement of low-temperature chemical reactions in phase transitions, Yu.I. Dakhnovskii, A.A. Ovchinnikov and V.A. Benderskii 66 (1982) 93
The parameter dependence of calculated Koopmans' defects in the framework of a model hamiltonian verified in the case of transition metal compounds, M.C. Böhm 67 (1982) 255
Physical adsorption of a heteronuclear diatomic molecule onto a solid surface: a theoretical approach, W.J. Welsh and D.D. Fitts 68 (1982) 441
Simulation of relaxation by binary collisions: comparison with relaxation in a fluid for bromine in argon, D.L. Jolly, B.C. Freasier, N.D. Hamer and S. Nordholm 70 (1982) 127

Collective excitations and quasiparticles
Charge-transfer excitons in anthracene crystals. A theoretical investigation of their optical absorption and thermal dissociation, P.J. Bounds, P. Petelenz and W. Siebrand 63 (1981) 303
Nonlinear polariton effects in the phenanthrene crystal, C.K. Johnson and G.J. Small 64 (1982) 83
Symmetry breaking and ionization from symmetry equivalent inner shells and lone pairs in Xα theory, L. Noodleman, D. Post and E.J. Baerends 64 (1982) 159
Spectra of direct excitation of phosphorescence in an isotopic mixed naphthalene crystal. High resolution excitation of the two Davydov components of the N-d_8 host crystal, Ph. Pee, J.P. Lemaistre, F. Dupuy, R. Brown, J. Megel and Ph. Kottis 64 (1982) 389
Motion of polymer chains in a molecular crystal, M.V. Basilevsky and S.I. Petrochenko 67 (1982) 319
Surface plasmon absorption of various colloidal metal particles, H. Abe, K.-P. Charlé, B. Tesche and W. Schulze 68 (1982) 137

Computational methods
Multiple-scattering Xα calculations of the electronic structure of $Co(CN)_5OH^{3-}$ and related photochemical properties, A. Goursot and E. Pénigault 61 (1981) 83
Perturbation theory of the electron correlation effects for atomic and molecular properties. III. Fourth-order corrections to molecular dipole moments and polarizabilities, G.H.F. Diercksen and A.J. Sadlej 61 (1981) 293
Periodic orbits, adiabaticity and stability, E. Pollak 61 (1981) 305
EHMO study of hydrogen adsorption on Pt clusters, J. Andzelm and E. Radzio-Andzelm 61 (1981) 317
A quadratically convergent Hartree–Fock (QS-SCF) method. Application to closed shell systems, G.B. Bacskay 61 (1981) 385
Semi-empirical calculation on core ionizations and simultaneous excitations by use of the π-electron and equivalent core approximations. The theoretical foundations of the method and the application to some π-conjugated molecules. N. Kosugi and K. Kuroda 61 (1981) 431
A theoretical study of depolarized Rayleigh spectral linewidths in gases, A.F. Turfa and H.F.P. Knaap 62 (1981) 57
Electronic structure in large finite aperiodic polypeptide chains, R.S. Day, S. Suhai and J. Ladik 62 (1981) 165
CNDO-calculation of second order vibronic coupling in the $^1B_{2u}$–$^1A_{1g}$ transition of benzene, G. Fischer, J.R. Reimers and I.G. Ross 62 (1981) 187
Force constants of trans and cis N-methylformamide from ab initio SCF MO calculations, Y. Sugawara, A.Y. Hirakawa, M. Tsuboi, S. Kato and K. Morokuma 62 (1981) 339
An LCAO HFS investigation of the electronic structure of cobaltocene, C. Famiglietti and E.J. Baerends 62 (1981) 407
Van der Waals forces, scattering functions and charge density susceptibility. II. Application to the He–He interaction potential, P. Malinowski, A.C.Tanner, K.F. Lee and B. Linder 62 (1981) 423

The shifted scheme in the general-model-space diagrammatic perturbation theory, G. Hose and U. Kaldor 62 (1981) 469
Itinerant oscillation with a cosine potential, M. Ferrario, M.W. Evans and W.T. Coffey 62 (1981) 481
Theoretical studies of the temperature dependence of magnetic shielding tensors: H_2, HF and LiH, R. Ditchfield 63 (1981) 185
The Monte Carlo simulation of energy transfer processes in thermal unimolecular reactions. III. The simulation of pressure dependent behaviour, P.V. Sellers and A.J. Stace 63 (1981) 237
Strict Lindemann behaviour because of an activation bottleneck, S.R. Vatsya and H.O. Pritchard 63 (1981) 383
Comparison of the effects of symmetric versus asymmetric H bonding on ^2H and ^{17}O nuclear quadrupole coupling constants: application to formic acid and the hydrogen diformate anion, J.E. Gready, G.B. Bacskay and N.S. Hush 64 (1982) 1
Master equation approach to vibrational energy transfer between two diatomic molecules, A.J. Makowski and T. Orlikowski 64 (1982) 231
Configuration interaction calculations of satellite structure in photoelectron spectra of H_2O, R. Arneberg, J. Müller and R. Manne 64 (1982) 249
Consistent force field model treatment of the normal coordinate problem of matrix isolated molecules, R. Gunde, P. Felder and Hs.H. Günthard 64 (1982) 313
Dynamic polarizabilities and Raman intensities of CO, N_2, HCl and Cl_2, J. Oddershede and E.N. Svendsen 64 (1982) 359
Geometry optimization in ab initio SCF calculations. VII. Proton affinities and ion structures calculated with floating orbital geometry optimization (FOGO), H. Huber and J. Vogt 64 (1982) 399
Vibrational excitation of SF_6 in collisions with He atoms, D.C. Clary 64 (1982) 413
Sum rules for molecular electronic spectra: application to exact and reflection principle solutions, S.M. Adler-Golden 64 (1982) 421
SCF-Xα scattered wave model cluster calculations for the adsorption systems CO/Ni and N_2/Ni, A. Schichl, D. Menzel and N. Rösch 65 (1982) 225
Approximative evaluations of the electrostatic free energy and internal energy changes in solution processes, S. Miertuš and J. Tomasi 65 (1982) 239
A quadratically convergent Hartree–Fock (QC-SCF) method. Application to open shell orbital optimization and coupled perturbed Hartree–Fock calculations, G.B. Bacskay 65 (1982) 383
A simple method for the evaluation of the second-order perturbation energy from external double-excitations with a CASSCF reference wavefunction, B.O. Roos, P. Linse, P.E.M. Siegbahn and M.R.A. Blomberg 66 (1982) 197
Non-adiabatic interactions in the symmetric ring opening process of dioxitrane, R. Cimiraglia, T.-K. Ha, R. Meyer and Hs.H. Günthard 66 (1982) 209
Cubic spline method for solving second-order differential equations: theory and application to the Thomas–Fermi model for ions, S. Raynor 66 (1982) 409
Effective core potential calculations on the NiH_4^{2-} ion as a test case for studying rotational barriers, O. Gropen, U. Wahlgren and L. Pettersson 66 (1982) 453
Effective core potential calculations on small molecules containing transition metal atoms, O. Gropen, U. Wahlgren and L. Pettersson 66 (1982) 459
Ab initio calculation of geometries and hfs constants of CH_3, SiH_3, and GeH_3 radicals, K. Ohta, H. Nakatsuji, I. Maeda and T. Yonezawa 67 (1982) 49
Perturbation corrections to Koopmans' theorem. V. A study with large basis sets, D.P. Chong and S.R. Langhoff 67 (1982) 153

Collision-induced absorption in non-polar molecular liquids: tetrahedral molecules, H.-J. Arning, J. Samios, K. Tibulski and Th. Dorfmüller 67 (1982) 177
Dipole oscillator strength distributions, sums, and dispersion energy coefficients for CO and CO_2, B.L. Jhanwar and W.J. Meath 67 (1982) 185
Study of the electronic structure of first and second row transition metal sulfides using SCF-SW-Xα cluster calculations, S. Harris 67 (1982) 229
Gas phase high temperature photoelectron spectroscopy: the tin monoxide molecule, J.M. Dyke, A. Morris, A.M.A. Ridha and J.G. Snijders 67 (1982) 245
An analytical representation of the $H_2 + CO$ potential, L.L. Poulson 68 (1982) 29
Vibrational frequencies from anharmonic ab initio/empirical potential energy functions. III. Stretching vibrations of hydrogen cyanide and acetylenes, P. Botschwina 68 (1982) 41
Classical model studies of polyatomic direct photofragmentation, M.D. Pattengill 68 (1982) 73
Monte Carlo calculations of classical density of states for non-separable polyatomic potential energy surfaces, S.C. Farantos, J.N. Murrell and J.C. Hajduk 68 (1982) 109
An ab initio study of the geometry of the C–C(H) = O group, the f_{C-C^2} stretching force constant, and the $f_{C=O,C-C}$ coupling constant in conjugated mono-substituted carbonyl compounds, C.W. Bock, M. Trachtman and P. George 68 (1982) 143
An error analysis for Hartree–Fock crystal orbital calculations, S. Suhai, P.S. Bagus and J. Ladik 68 (1982) 467
CEPA calculations of potential energy surfaces for open-shell systems. II. The reaction of C^+ ions with molecular hydrogen. R. Jacquet and V. Staemmler 68 (1982) 479
On the calculation of classical vibrational energy exchange, J.P. Gibbons and J.D. Stettler 69 (1982) 141
An investigation of basis sets and basis set superposition error in transition metals using frozen core and frozen orbital techniques, L. Pettersson and U. Wahlgren 69 (1982) 185
Quasiclassical trajectory calculations for $H + H_2$ ($v = 0$, 1) on a potential energy surface from force field data, A.J.C. Varandas 69 (1982) 295
MCSCF and multi-reference CI calculations of the potential energy surface for ground state H_2O, W.P. Kraemer, B.O. Roos and P.E.M. Siegbahn 69 (1982) 305
Ab initio calculation of nuclear spin–spin coupling constant of HF and CN^-, M.T. Rayez, E. Neumann, J. Hoarau and F. Achard 69 (1982) 323
The challenge of fitting ab initio surfaces. I. Rigid-rotor CO_2–H_2 potential, C.P. Shukla, A.K. Bachhawat and N. Sathyamurthy 70 (1982) 83
Simulation of relaxation by binary collisions: comparison with relaxation in a fluid for bromine in argon, D.L. Jolly, B.C. Freasier, N.D. Hamer and S. Nordholm 70 (1982) 127
Gaseous ion transport coefficients, L.A. Viehland 70 (1982) 149
A new INDO-type procedure for conjugated non-rigid molecules. I. Ground-state conformations and barriers to internal rotation, F. Momicchioli, I. Baraldi and M.C. Bruni 70 (1982) 161
Correlation structure–magnetic properties in $(Cr_2O_{10})^{14-}$ dimeric units: a theoretical approach, M.F. Charlot, O. Kahn and M. Drillon 70 (1982) 177

Theory of dynamics and scattering

Photofragmentation of triatomic molecules. Theory of angular and state distribution of product fragments, G.G. Balint-Kurti and M. Shapiro 61 (1981) 137
The rotating rod model: opacity, excitation, deflection and angular distribution functions from collinear reaction probabilities, N. Agmon 61 (1981) 189
A calculation of the temperature dependent radiationless decay of the propynal triplet state T_1, P. Russegger and J.R. Huber 61 (1981) 205
Periodic orbits, adiabaticity and stability, E. Pollak 61 (1981) 305

On the forced harmonic oscillator with time-dependent frequency, H.-D. Meyer 61 (1981) 365
Close-coupling calculations of the cross sections and relaxation rates for ro-vibrational transitions in H_2 colliding with He, T. Orlikowski 61 (1981) 405
Semiclassical calculation of energy transfer in polyatomic molecules. VI. On the theory for linear triatomic molecules, G.D. Billing 61 (1981) 415
Importance of correlation energy in collision dynamics: quasiclassical trajectory study of collinear $He + H_2^+(v') \rightarrow HeH^+ + H$ using HF and CI potential-energy surfaces, N. Sathyamurthy 62 (1981) 1
Intramolecular electron localization and local-density calculations on silicon-containing molecules: tetramethylsilane and hexamethyldisilane, Z. Berkovitch-Yellin, D.E. Ellis and M.A. Ratner 62 (1981) 21
Trajectory studies of collinear collision between a particle and a non-linear oscillator in a laser field, D.N. Noid and W.-K. Liu 62 (1981) 37
A theoretical study of depolarized Rayleigh spectral linewidths in gases, A.F. Turfa and H.F.P. Knaap 62 (1981) 57
Van der Waals forces, scattering functions and charge density susceptibility. II. Application to the He–He interaction potential, P. Malinowski, A.C. Tanner, K.F. Lee and B. Linder 62 (1981) 423
Strong collision rate coefficients in unimolecular reaction rate theory, S. Nordholm and H.W. Schranz 62 (1981) 459
Scaling relationships in photoelectron–photoion coincidence studies: the acetone ion dissociation, K. Johnson, I. Powis and C.J. Danby 63 (1981) 1
A high energy classical trajectory study of the reactions $O(^3P) + H_2 \rightarrow OH + H$ and $O(^3P) + H_2 \rightarrow O + H + H$, Z.B. Alfassi and M. Baer 63 (1981) 275
The dynamics of the F/HNCO and F/HNF reactions, J.J. Sloan, D.G. Watson and J.S. Wright 63 (1981) 283
Bifurcation and coexistence of several limit cycles in models of open two-variable quadratic mass–action systems, C. Escher 63 (1981) 337
Curve crossing and vibrational predissociation of van der Waals molecules, G.W. Ewing 63 (1981) 411
Ion transport in polar gases, K. Sakimoto 63 (1981) 419
Stochastic theory for molecular collisions in the perturbed stationary state formulation, G. Jolicard and G.D. Billing 64 (1982) 123
Theoretical fundamentals of high resolution Auger electron spectroscopy, A.V. Kondratenko and L.N. Mazalov 64 (1982) 139
Classical dynamics of multiphoton dissociation for a model system, D.L. Martin and R.E. Wyatt 64 (1982) 203
Master equation approach to vibrational energy transfer between two diatomic molecules, A.J. Makowski and T. Orlikowski 64 (1982) 231
Lineshape of rotationally predissociated van der Waals molecules: predicted infrared spectrum of Ar–N_2, J.A. Beswick and M. Shapiro 64 (1982) 333
Collisional ionization of highly excited neon atoms by nonpolar hydrocarbons, M. Uematsu, H. Hiraishi, T. Fukuyama, T. Kondow and K. Kuchitsu 64 (1982) 381
Vibrational excitation of SF_6 in collisions with He atoms, D.C. Clary 64 (1982) 413
The reaction $X + Cl_2 \rightarrow XCl + Cl$ (X = Mu, H, D). II. Comparison of experimental data with theoretical results derived from a new potential energy surface, J.N.L. Connor, W. Jakubetz, A. Laganà, J. Manz and J.C. Whitehead 65 (1982) 29
A quasi-hard wall model for the scattering of atomic beams from solid surfaces, T. Maniv 65 (1982) 177
Ab initio computation of vibrational relaxation rate coefficients for the collisions of CO_2 with helium and neon atoms. D.C. Clary 65 (1982) 247

Comparison of quantum mechanical and semiclassical (classical path) probabilities for vibrational transitions in diatom–diatom collisions, G.D. Billing and G. Jolicard 65 (1982) 323
A theory of fluorescence depolarization in macroscopically ordered membrane systems, B.W. van der Meer, R.P.H. Kooyman and Y.K. Levine 66 (1982) 39
Electrolyte dissipation effects on polyion diffusion in low ionic strength buffers, K.S. Schmitz 66 (1982) 177
Electrolyte polarization effects on polyion diffusion in low ionic strength buffers, K.S. Schmitz, N. Parthasarathy and E. Vottler 66 (1982) 182
Semiclassical calculation of energy transfer in polyatomic molecules. VII. Intra- and intermolecular energy transfer in $N_2 + CO_2$, G.D. Billing 67 (1982) 35
An approach to laser–molecule dynamics using raising and lowering operators, S. Leasure 67 (1982) 83
The phase modulated semiclassical sudden approximation. Study of the transitions $v = 1$, $j \rightarrow v = 0, j'$ in the $pH_2 + He^4$ system, A. Grosjean and G. Jolicard 67 (1982) 139
Coherent state versus localized state quantum dynamics of isomerization reactions, P. Russegger 67 (1982) 161
The topography of potential energy surfaces, M.V. Basilevsky 67 (1982) 337
Classical model studies of polyatomic direct photofragmentation, M.D. Pattengill 68 (1982) 73
Perturbed rotational state method for collisions between an ion and an asymmetric-top rigid rotor, K. Sakimoto 68 (1982) 155
Atom–molecule sudden theory of scattering: ab initio corrections and range of validity of the collision model, E. Ficocelli Varracchio and R. Celiberto 68 (1982) 303
The role of memory effects in stochastic approach to collinear diatom–diatom collisions, A.J. Makowski 68 (1982) 317
Intermediate coupling approach to the collisional stabilization step in ternary ion–molecule association reactions, E. Herbst 68 (1982) 323
Dephasing in isolated one-dimensional quantum systems, J. Brickmann and P. Russegger 68 (1982) 369
Calculations of the Auger transition rates in molecules. I. Effect of the nonspherical potential: application to CH_4, M. Higashi, E. Hiroike and T. Nakajima 68 (1982) 377
Rotational rainbows in atom–rigid rotor scattering: a comparison of the classical IOS approximation with classical trajectory calculations, H.J. Korsch and D. Poppe 69 (1982) 99
Strong non-Condon effects induced by electron correlation: N_2O^+, H. Köppel, L.S. Cederbaum and W. Domcke 69 (1982) 175
A comparison of tunneling transfer theories for asymmetric isomerization reactions, P.H. Cribb, S. Nordholm and N.S. Hush 69 (1982) 259
Resonances in photoionization cross sections. A comparison of pseudo-bound-state methods, C.E. Woodward, S. Nordholm and G. Bacskay 69 (1982) 267
Further development and application of the ECS scaling theory: non-linear molecules, A.M. Richard and A.E. DePristo 69 (1982) 273
Quasiclassical trajectory calculations for $H + H_2(v = 0,1)$ on a potential energy surface from force field data, A.J.C. Varandas 69 (1982) 295
The challenge of fitting ab initio surfaces, I. Rigid-rotor CO_2–H_2 potential, C.P. Shukla, A.K. Bachhawat and N. Sathyamurthy 70 (1982) 83
Semiclassical analysis of measurements of the total cross section Q and the small-angle differential cross section for CsF–Ar: an accurate method for absolute Q values, J.M. Henrichs, H.C.W. Beijerinck and N.F. Verster 70 (1982) 93
Simulation of Doppler profiles of atomic radiation excited by molecular dissociation. The effect of population of magnetic sublevels. N. Kouchi, K. Ito, Y. Hatano and N. Oda 70 (1982) 105

Theoretical study of the kinetic isotope effect in proton-transfer reactions. Influence of the interaction potential of reactants on the kinetic isotope effect, J. Sühnel and K. Gustav 70 (1982) 109
Classical path calculation of differential cross sections for rotational excitation of CO colliding with D_2 at 87.2 meV, G.D. Billing and L.L. Poulsen 70 (1982) 119
Potential surfaces for the Rydberg states of H_3, Ch. Nager and M. Jungen 70 (1982) 189
Medium stabilization of localized Born–Oppenheimer states, M. Bixon 70 (1982) 199
Density and flux analysis for the collinear $H \rightarrow H_2$ reaction, E. Pollak, J.F. McNutt and R.E. Wyatt 70 (1982) 207
On a semiclassical approach to energy transfer by atom/molecule–surface collisions, G.D. Billing 70 (1982) 223

Experimental

Magnetic and electric resonance

Proton–deuterium polarization transfer in magic angle spinning polycrystalline solids in the rotating frame, L. Müller 61 (1981) 235
About the concentration dependence of the anisotropy in the magnetic susceptibility of some aromatic compounds in the liquid phase, studied by NMR, T.M. Plantenga, H. Bulsink, C. MacLean and J.A.B. Lohman 61 (1981) 271
Factors affecting anisotropic reorientation in a series of aromatic molecules dissolved in carbon disulfide, H. Nery, D. Canet and J.L. Rivail 62 (1981) 123
Pressure and temperature dependence of the proton and deuteron spin–lattice relaxation times in liquid H_2S and D_2S, J. Hauer, W.E. Lang and H.-D. Lüdemann 62 (1981) 195
The magnetic field dependence of the dielectric constant of liquids. T.M. Plantenga, J. Bulthuis, J.P. van Dieren, W. Mels and C. MacLean 62 (1981) 207
Structure of organic monomolecular layers of diacetylene studied by IR dichroism and ESR, F. Kajzar and J. Messier 63 (1981) 123
Measurements of the hyperfine dimer spectrum for H_2–Ne, H_2–Ar, H_2–Kr by the magnetic beam resonance technique, M. Waaijer and J. Reuss 63 (1981) 263
Intramolecular reorientations and the effects of thermal history and hydrogen bonding in four closely related organic molecular solids, M. Aronson, P. Beckmann, B. Ross and S.L. Tan 63 (1981) 349
Methyl and tertiarybutyl reorientation in molecular solids, P. Beckmann 63 (1981) 359
An EPR determination of the helix pitch and relative handedness of some induced cholesteric mesophases, G. Gottarelli, G.F. Pedulli and C. Zannoni 64 (1982) 143
Mutual effect of nuclei upon CINDP in high fields. Violation of the Kaptein rules, K.M. Salikhov 64 (1982) 371
Distribution and conjugation of the π-electrons in the T_1 state of some BNC-heterocycles, F.W. Deeg, Chr. Bräuchle and J. Voitländer 64 (1982) 427
The determination and assignment of a complete ^{14}N quadrupole coupling tensor in liquid solution, T.M. Plantenga, H. Bulsink, F.J.J. de Kanter and C. MacLean 65 (1982) 71
The electric saturation of molecular alignment in liquid nitrobenzene as studied by NMR, T.M. Plantenga, F.J.J. de Kanter, H. Bulsink and C. MacLean 65 (1982) 77
Order parameters in hydrocarbon chains, O. Edholm 65 (1982) 259
Studies of quadrupolar and dipolar electric field effects in the NMR spectra of binary mixtures of liquids, T.M. Plantenga, P.C.M. van Zijl and C. MacLean 66 (1982) 1
Optical–optical double resonance spectra of CH_3F and CD_3F using isotopic CO_2 lasers, G. Duxburry and H. Kato 66 (1982) 161

Symmetry distortions and pseudo-Jahn–Teller effect of peri- and cata-hexabenzocoronene in their triplet states as observed by ODMR techniques, C. Bräuchle 67 (1982) 97
Muonium substituted organic free radicals in liquids. Muon-electron hyperfine coupling constants of alkyl and allyl radicals, E. Roduner, W. Strub, P. Burkhard, J. Hochmann, P.W. Percival, H. Fischer, M. Ramos and B.C. Webster 67 (1982) 275
A study of magnetic field effects upon triplet–triplet absorptions, D.J. Graham 68 (1982) 119
Optically resolved zero field splittings in the phosphorescence spectra of aromatic thioketones, M.-R. Taherian and A.H. Maki 68 (1982) 179
ESR studies of non-silicate inorganic glasses through their glass transformation ranges, R. Parthasarathy, K.J. Rao and C.N.R. Rao 68 (1982) 393
ENDOR of quintet-state bicarbenes in diacetylene single crystals, W. Hartl and M. Schwoerer 69 (1982) 443
Transition probabilities in electron–nuclear double- and multiple-resonance spectroscopy with non-coherent and coherent radio-frequency fields, A. Schweiger and Hs. H. Günthard 70 (1982) 1

Microwave spectroscopy
Moment analysis of the Mori continued fraction: dipolar absorption in bromoethane and 1-bromonaphthalene, G.J. Davies, M. Veerappa and M.W. Evans 61 (1981) 73
Fourth and sixth spectral moments in far infrared spectroscopy, M.W. Evans 62 (1981) 179
Observed adiabatic corrections to the Born–Oppenheimer approximation for diatomic molecules with ten valence electrons, E. Tiemann, H. Arnst, W.U. Stieda, T. Törring and J. Hoeft 67 (1982) 133
Isotopic field shift of the rotational energy of the Pb-chalcogenides and Tl-halides, J. Schlembach and E. Tiemann 68 (1982) 21
Effects of unresolved hyperfine structure in the microwave rotational spectra of the $^2\Sigma$-radicals CaBr and CaCl, K. Möller, H.-U. Schütze-Pahlmann, J. Hoeft and T. Törring 68 (1982) 399
Experimental angular velocity correlation functions for $CHCl_3$, B. Janik, J. Ściesiński, M.W. Evans, E. Kluk and T. Grochulski 70 (1982) 77

Infrared and Raman spectroscopy
Brillouin scattering and refractive index measurements on low temperature liquids. III. CH_3Cl, CH_2Cl_2, $CHCl_3$ and CHF_3, A. Yoshihara, A. Anderson, R.A. Aziz and C.C. Lim 61 (1981) 1
Inelastic neutron scattering studies of coordinate acetylene: the complex $Co_2(CO)_6 \cdot C_2H_2$, J. Howard, K. Robson and T.C. Waddington 61 (1981) 53
The effect of strong coupling between vibrations in hydrogen bonds on the polarized spectra of the mercaptobenzothiazole crystal: an "anomalous" isotopic effect, H.T. Flakus 62 (1981) 103
Do protons tunnel in the formic acid dimer and in the crystal?, G.N. Robertson and M.C. Lawrence 62 (1981) 131
Molecular beam diagnostics by Raman scattering, G. Luijks, S. Stolte and J. Réuss 62 (1981) 217
IR and Raman study of rotational relaxation of furan and thiophene. I. Bandwidths. Comparison of the rotations about the principal axes of inertia, J.P. Pinan-Lucarre, J. Loisel and J. Vincent-Geisse 62 (1981) 251
IR and Raman study of rotational relaxation of furan and thiophene. II. Correlation functions. Interpretation according to models, J.P. Pinan-Lucarre and T. Nguyen-Tan 62 (1981) 265

Vibrational spectra and dynamics of conformation and hydrogen bonding of N-methylacetamide. I. Conformational dynamics of the $CH_3CONHCH_3$ molecule and NH out of plane band splitting. F. Fillaux and M.H. Baron 62 (1981) 275
Vibrational spectra and dynamics of conformation and hydrogen bonding of N-methylacetamide. II. Dynamics of the NH... O hydrogen bond and NH(ND) stretching band structure, F. Fillaux 62 (1981) 287
Theoretical study on an anomalous isotopic effect on the position and integrated intensity of the IR stretching vibration band for medium-strong and strong hydrogen bonds, Y. Guissani and H. Ratajczak 62 (1981) 319
The determination of the complex refractive indices of some concentrated, aqueous salt solutions at submillimetre wavelengths, M. Bennouna, H. Cachet, J.C. Lestrade and J.R. Birch 62 (1981) 439
Itinerant oscillation with a cosine potential, M. Ferrario, M.W. Evans and W.T. Coffey 62 (1981) 481
Spectroscopic studies of interaction and dynamics in the naphthalene: perfluorobiphenyl crystalline complex, R.R. McCaffrey and P.N. Prasad 63 (1981) 13
Structure of organic monomolecular layers of diacetylene studied by IR dichroism and ESR, F. Kajzar and J. Messier 63 (1981) 123
Raman linewidth study of vibrational relaxation of benzonitrile in solution, K. Tanabe 63 (1981) 135
The infrared, Raman, resonance Raman spectra and the valence force field of the ZrS_3 layer-type compound, C. Sourisseau and Y. Mathey 63 (1981) 143
Far-infrared and Raman spectra of mixed HCl–DCl crystals, J.-C. Bureau and L.-C. Brunel 63 (1981) 293
Vibrational absorption spectrum of solid CO in the first harmonic region. Two-phonon transition, F. Legay and N. Legay-Sommaire 65 (1982) 49
Resonance Raman and polarized light infrared spectra of 1,4-dihydroxyanthraquinone. Vibrational studies of the ground and excited electronic states, G. Smulevich, L. Angeloni, S. Giovannardi and M.P. Marzocchi 65 (1982) 313
Optical-optical double resonance spectra of CH_3F and CD_3F using isotopic CO_2 lasers, G. Duxbury and H. Kato 66 (1982) 161
Photochemical formation of complexed HNO in low temperature matrices, R.P. Müller, S. Murata and J.R. Huber 66 (1982) 237
Temperature dependence of single crystal Raman spectra of the complex $(perylene)_3$ TCNQ, A.D. Bandrauk, K.D. Truong and C. Carlone 66 (1982) 293
Analysis of the infrared emission and absorption spectra from isotopic CO molecules in solid α-CO, N. Legay-Sommaire and F. Legay 66 (1982) 315
Measurement of vibration–vibration pumped population distributions in nitric oxide, R.C. Bergman, M.J. Williams and J.W. Rich 66 (1982) 357
Collision-induced absorption in non-polar molecular liquids: tetrahedral molecules, H.-J. Arning, J. Samios, K. Tibulski and Th. Dorfmüller 67 (1982) 177
Xanthone. II. Vibronic coupling analysis from high resolution phosphorescence spectra, H.J. Griesser and R. Bramley 67 (1982) 373
Line broadening by diagonal disorder in the vibrational transition of CO in solid α-CO, F. Legay, N. Legay-Sommaire and G. Zumofen 68 (1982) 437
Overtone spectra of crystalline $CaWO_4$: vibrational exciton density-of-states functions, S.D. Colson and K.N. Wong 69 (1982) 223
High-resolution diode laser spectroscopy of CO in solid N_2: effect of dipolar broadening on vibrational transitions, H. Dubost, R. Charneau and M. Harig 69 (1982) 389

The reaction of F atoms with acetaldehyde and ethylene oxide. Vibrational spectra of the CH_3CO and CH_2CHO free radicals trapped in solid argon, M.E. Jacox 69 (1982) 407
Matrix-isolation spectroscopy of small antimony clusters, H. Sontag and R. Weber 70 (1982) 23
Experimental angular velocity correlation functions for $CHCl_3$, B. Janik, J. Ściesiński, M.W. Evans, E. Kluk and T. Grochulski 70 (1982) 77
Raman excitation profiles for some A_g modes of biphenyl in the pre-resonance region, A. Bree, R. Zwarich and C. Taliani 70 (1982) 257
Resonance Raman studies on $[FeCl_4]^-$ and $[FeBr_4]^-$, R.J.H. Clark and T.J. Dines 70 (1982) 269
Near-infrared-induced conformation isomerization of 2-chloroethanol in an argon matrix, H. Takeuchi and M. Tasumi 70 (1982) 275
Hydrogen-bonded complex between HNO and formaldehyde. Photolysis of methyl nitrite in an argon matrix, R.P. Müller, P. Russegger and J.R. Huber 70 (1982) 281

Visible and ultraviolet spectroscopy

Ne matrix spectra of the sym-$C_6Br_3F_3^+$ radial cation, V.E. Bondybey, T.J. Sears, T.A. Miller, C. Vaughn, J.H. English and R.S. Shiley 61 (1981) 9
Picosecond fluorescence depolarisation measured by frequency conversion, G.S. Beddard, T. Doust and G. Porter 61 (1981) 17
Chemiluminescent spectra of $C_2^*(d\,^3\Pi_g - a\,^3\Pi_u)$ and deactivation of the C_2^* $d\,^3\Pi_g$ state in the Na vapor, Wang X.Y., Li X.C. and Lou N.Q. 61 (1981) 25
Active nitrogen luminescence studies at liquid helium temperature, E.B. Gordon, A.A. Pelmenev, O.F. Pugachev and V.V. Khmelenko 61 (1981) 35
Theoretical evaluation of the vibronic intensity distribution in the phosphorescence of benzene, G. Marconi, G. Orlandi, P. Pelmieri and J. Vrbancich 61 (1981) 43
Rate coefficients for the combination of metastable and ground state energy atoms into excited dimer states, A.B. Callear, C.P. Devonport and D.R. Kendall 61 (1981) 65
Charge transfer transitions in solid tetracene and pentacene studied by electroabsorption, L. Sebastian, G. Weiser and H. Bässler 61 (1981) 125
Photofragmentation of triatomic molecules. Theory of angular and state distribution of product fragments, G.G. Balint-Kurti and M. Shapiro 61 (1981) 137
Translational energy distribution and production mechanism of excited hydrogen atoms produced in electron–CH_4 collisions, T. Ogawa, J. Kurawaki and M. Higo 61 (1981) 181
The electronic spectrum of hydrogen fluoride (7–46 eV), A.P. Hitchcock and C.E. Brion 61 (1981) 281
Radiative lifetimes of metastable states of free radicals. I. NF $b\,^1\Sigma^+$, P.H. Tennyson, A. Fontijn and M.A.A. Clyne 62 (1981) 171
CNDO-calculation of second order vibronic coupling in the $^1B_{2u}$–$^1A_{1g}$ transition of benzene, G. Fischer, J.R. Reimers and I.G. Ross 62 (1981) 187
Two-photon sequential absorption spectroscopy of iodine monobromide in the 5 eV region, G.W. King, I.M. Littlewood and J.R. Robins 62 (1981) 359
Electroreflectance studies on the excitons in PTS and DCHD single crystals, L. Sebastian and G. Weiser 62 (1981) 447
Spectroscopic studies of interaction and dynamics in the naphthalene: perfluorobiphenyl crystalline complex, R.R. McCaffrey and P.N. Prasad 63 (1981) 13
The photophysics of tertiary aliphatic amines, C.G. Cureton, K. Hara, D.V. O'Connor and D. Phillips 63 (1981) 31
Determination of the translational energy of $O(3s\,^3S)$ excited in the dissociative excitation of O_2 and NO by $He^*(2\,^3S)$, L.G. Piper and M.A.A. Clyne 63 (1981) 77
Absorption spectrum of bismuth in the vacuum ultraviolet. Observation of new transitions to Rydberg states, N. Damany, J. Figuet and A. Topouzkhanian 63 (1981) 157

Rydberg states and the observed spectrum of ArH, M. Berman, U. Kaldor, J. Shmulovich and S. Yatsiv 63 (1981) 165
The two-photon fluorescence excitation spectrum of dibenzothiophene, E. Castellucci, P. Foggi and P.R. Salvi 63 (1981) 437
Tetracene–argon van der Waals molecules, A.M. Griffiths and P.A. Freedman 63 (1981) 469
The SrCl(A–X, B–X) bands in thermal and non-thermal reactive excitation using metastable Sr atoms, U. Brinkmann, V.H. Schmidt and H. Telle 64 (1982) 19
Laser-induced fluorescence of the $\tilde{R}^{es}B_2$ state of CS_2 excited at 3547 Å, R. Vasudev 64 (1982) 167
Picosecond observation of fluorescence from B_u states of diphenylpolyenes, T.C. Felder, K.-J. Choi and M.R. Topp 64 (1982) 175
$Na_2\, b\,^3\Pi_u - X\,^1\Sigma_g^+$ intercombination bands: direct observation through high resolution laser fluorescence spectroscopy in a supersonic nozzle beam, F. Engelke, H. Hage and C.D. Caldwell 64 (1982) 221
Sum rules for molecular electronic spectra: application to exact and reflection principle solutions, S.M. Adler-Golden 64 (1982) 421
Distribution and conjugation of the π-electrons in the T_1 state of some BNC-heterocycles, F.W. Deeg, Chr. Bräuchle and J. Voitländer 64 (1982) 427
Laser diagnostics of the surface catalyzed equilibrium $2Na\text{-}Na_2$, J.P. Woerdman and S.S. Eskildsen 65 (1982) 83
Energy partitioning in the reaction $O(^1D) + H_2O \rightarrow OH + OH$. V. Rotational relaxation of $OH(X\,^2\Pi, v'', j'')$, K.-H. Gericke and F.J. Comes 65 (1982) 113
Radiative lifetimes of metastable states of free radicals. II. PF $b\,^1\Sigma^+$ and CO $a\,^3\Pi$, F.R. Burden, M.A.A. Clyne and A. Fontijn 65 (1982) 123
Electronic transitions of vanadyl phthalocyanine in solution and in the solid state, T.-H. Huang and J.H. Sharp 65 (1982) 205
Optical transitions, XPS, and electronic states in $NiPS_3$, M. Piacentini, F.S. Khumalo, C.G. Olson, J.W. Anderegg and D.W. Lynch 65 (1982) 289
Resonance Raman and polarized light infrared spectra of 1,4-dihydroxyanthraquinone. Vibrational studies of the ground and excited electronic states, G. Smulevich, L. Angeloni, S. Giovannardi and M.P. Marzocchi 65 (1982) 313
Radiative decay times and kinetics of the luminescence from $KI:Sn^{2+}$, L.S. Dang, P.W.M. Jacobs, K. Schmitt, V.S. Sivasankar and D.J. Simkin 66 (1982) 51
Temperature and deuterium effects on the phosphorescence lifetimes of dimethylbenzaldehydes in durene single crystals, A. Despres, V. Lejeune and E. Migirdicyan 66 (1982) 57
A model for multiphoton ionisation mass spectroscopy with application to benzene, W. Dietz, H.J. Neusser, U. Boesl, E.W. Schlag and S.H. Lin 66 (1982) 105
Photofragment spectroscopy of ICN at 266.0 nm and 299.4 nm: vibrational and rotational distributions of $CN(X^2\Sigma^+)$, A.P. Baronavski 66 (1982) 217
Electron impact dissociation of molecular hydrogen and deuterium: translational energy distribution of atomic hydrogen and deuterium ($n = 3, 4, 5$), M. Higo, S. Kamata and T. Ogawa 66 (1982) 243
Two-photon excitation spectra of the lowest electronic states of 2,2′-bipyridine, E. Castellucci, P.R. Salvi and P. Foggi 66 (1982) 281
Energy selection experiments in glassy matrices: the fluorescence spectrum of a synthetic isobacteriochlorin, F.A. Burkhalter and U.P. Wild 66 (1982) 327
Matrix trapping site for H atoms in solid Ne and Ar, S. Ossicini and F. Forstmann 66 (1982) 333
Delayed fluorescence from the lowest $^1B_{3u}^+$ state of anthracene, due to hetero-triplet–triplet annihilation of ^{3}anthracene* and ^{3}xanthone*, B. Nickel and G. Roden 66 (1982) 365

Laser induced fluorescence spectroscopy of NaLi in beam and bulk, F. Engelke, G. Ennen and K.H. Meiwes 66 (1982) 391
Experimental and theoretical studies of the valence-shell dipole excitation spectrum of molecular fluorine, A.P. Hitchcock, C.E. Brion, G.R.J. Williams and P.W. Langhoff 66 (1982) 435
Spectroscopy of the fluorene molecule in planar supersonic expansions, A. Amirav, U. Even and J. Jortner 67 (1982) 1
The vibrational fine structure of the $^1A_{2g} \leftarrow {}^1A_{1g}$ polarized absorption band of trans-$[Co(NH_3)_4(CN)_2]^+$. The excited state geometry, A. Urushiyama, H. Kupka, J. Degen and H.-H. Schmidtke 67 (1982) 65
The electronic spectra of 10,10-dimethylanthracene-9-one crystals: spin–orbit/vibronic coupling in $^3n\pi^*$ states, S.R. Wilson and R. Bramley 67 (1982) 119
Emission cross sections from fragments produced by electron impact on silane, J. Perrin and J.P.M. Schmitt 67 (1982) 167
Dipole oscillator strength distributions, sums, and dispersion energy coefficients for CO and CO_2, B.L. Jhanwar and W.J. Meath 67 (1982) 185
Production of the NH radical from the catalytic decomposition of NH_3 on polycrystalline Pt and Fe surfaces at high temperatures, G.S. Selwyn and M.C. Lin 67 (1982) 213
Translational spectroscopy of electron impact dissociation of molecules isoelectronic with Ne by Doppler profile measurements of Balmer-α emission, N. Kouchi, M. Ohno, K. Ito, N. Oda and Y. Hatano 67 (1982) 287
Semiclassical model of a trinuclear mixed valence System, J.P. Launay and F. Babonneau 67 (1982) 295
Xanthone. I. Optical detection of an extremely large sublevel splitting in the lowest triplet state, H.J. Griesser and R. Bramley 67 (1982) 361
Xanthone. II. Vibronic coupling analysis from high resolution phosphorescence spectra, H.J. Griesser and R. Bramley 67 (1982) 373
Isotopic field shift in the transition $A\,0^+ - X\,^1\Sigma^+$ of PbS, H. Knöckel and E. Tiemann 68 (1982) 13
A study of magnetic field effects upon triplet–triplet absorptions, D.J. Graham 68 (1982) 119
Kinetic observations on the E region states if iodine excited by two-photon spectroscopy, G.W. King, I.M. Littlewood and J.R. Robins 68 (1982) 129
Surface plasmon absorption of various colloidal metal particles, H. Abe, K.-P. Charlé, B. Tesche and W. Schulze 68 (1982) 137
Dual phosphorescence of halogenated benzenes in rigid-glass solution, T. Takemura, Y. Yamada and H. Baba 68 (1982) 171
Optically resolved zero field splittings in the phosphorescence spectra of aromatic thioketones, M.-R. Taherian and A.H. Maki 68 (1982) 179
Sharp line vibronic spectra of chlorophyll and its derivatives in solid solutions, K.K. Rebane and R.A. Avarmaa 68 (1982) 191
$SO(B\,^3\Sigma^-, A\,^3\Pi - X\,^3\Sigma^-)$ emission from low temperature rare gas–sulfur dioxide afterglows, K.T. Wu, H. Morgner and A.J. Yencha 68 (1982) 285
Thermal dissociation of diatomic molecules with bound electronically excited states, N.M. Kuznetsov and A.M. Samusemko 68 (1982) 359
The magnetic circular dichroism of $KBr:Sn^{2+}$, A. Scacco, P.W.M. Jacobs and M.J. Stillman 68 (1982) 473
Transient intermediates in the flash photolysis of mercury vapour. Dimers, trimers and the enigmatic 2480 Å bands, A.B. Callear and K.-L. Lai 69 (1982) 1
Optical activity due to deuterium substitution in adamantanone and adamantanethione. Barrier to inversion in the $^1n\pi^*$ excited state, P.H. Schippers and H.P.J.M. Dekkers 69 (1982) 19

$\tilde{A} \rightarrow \tilde{X}$ fluorescence spectra of CH_3O and C_2H_5O generated by the ArF laser photolysis of alkyl nitrites, T. Ebata, H. Yanagishita, K. Obi and I. Tanaka 69 (1982) 27
Electron impact dissociation of $CH_4(CD_4)$: laser induced fluorescence of product CH^+ (CD^+), B.H. Mahan and A. O'Keefe 69 (1982) 35
Investigation of the Stark effect on the lowest triplet states of 1-indanone single crystals, J.S. Patel and D.M. Hanson 69 (1982) 249
Dynamic constraints associated with the formation of $SiS(a^3\Sigma^+)$ from the Si–OCS chemiluminescent reaction, J.L. Gole and G.J. Green 69 (1982) 357
O_3 photolysis at 248 nm and $O(^1D_2)$ quenching by H_2O, CH_4, H_2, and N_2O: $O(^3P_J)$ yields, P.H. Wine and A.R. Ravishankara 69 (1982) 365
Observation of new bands in the N_2 Herman infrared system and kinetic study of its formation in a pulsed-discharge apparatus, I. Nadler, A. Rotem and S. Rosenwaks 69 (1982) 375
Determination of the rate constant of reaction of $N(^4S_{3/2})$ with NO_2 using resonance fluorescence in a discharge flow system, M.A.A. Clyne and Y. Ono 69 (1982) 381
Matrix-isolation spectroscopy of small antimony clusters, H. Sontag and R. Weber 70 (1982) 23
Absorption spectra of Na and Na_2 in inert-gas matrices, J. Hormes and B. Karrasch 70 (1982) 29
Vacuum UV photolysis of CO_2. Rare-gas oxide formation in matrices, J. Fournier, H.H. Mohammed, J. Deson and D. Maillard 70 (1982) 39
Optical dispersion and molar refractivities of alkali halide crystals and aqueous solutions, A. Penzkofer, H. Glas and J. Schmailzl 70 (1982) 47
Gas-phase phosphorescence of thioformaldehyde, D.J. Clouthier and C.M.L. Kerr 70 (1982) 55
Multiphoton ionization and fragmentation mechanism of CS_2, M. Seaver, J.W. Hudgens and J.J. de Corpo 70 (1982) 63
Resonance Raman studies on $[FeCl_4]^-$ and $[FeBr_4]^-$, R.J.H. Clark and T.J. Dines 70 (1982) 269
Electron energy-loss spectroscopy of forbidden transitions to valence and Rydberg states of formaldehyde, S. Taylor, D.G. Wilden and J. Comer 70 (1982) 291
Zero-field Stark level crossing and Stark–Zeeman recrossing experiments in the 593 nm band of NO_2, F. Bylicki and H.G. Weber 70 (1982) 299
Energy-dependent incoherent singlet exciton motion in an amorphous organic solid (polyvinylcarbazole), K.-D. Rockwitz and H. Bässler 70 (1982) 307

Photoelectron and ESCA spectroscopy

The sum rule, an assignment tool? D.M. de Leeuw and C.A. de Lange 61 (1981) 109
The predissociation of molecular oxygen cations $O_2^+(\tilde{B}^2\Sigma_g^-)$, R. Bombach, A. Schmelzer and J.-P. Stadelmann 61 (1981) 214
The electronic spectrum of hydrogen fluoride (7–46 eV), A.P. Hitchcock and C.E. Brion 61 (1981) 281
A non-empirical LCAO MO SCF investigation of the ground and core ionized states of tetrahedrane and cyclobutadiene, D.T. Clark and A. Harrison 62 (1981) 353
Theoretical fundamentals of high resolution Auger electron spectroscopy, A.V. Kondratenko and L.N. Mazalov 64 (1982) 139
Symmetry breaking and ionization from symmetry equivalent inner shells and lone pairs in Xα theory, L. Noodleman, D. Post and E.J. Baerends 64 (1982) 159
The electronic structure and the He(I) photoelectron spectrum of bis(π-pentadienyl)dinickel, M.C. Böhm and R. Gleiter 64 (1982) 183
Configuration interaction calculations of satellite structure in photoelectron spectra of H_2O, R. Arneberg, J. Müller and R. Manne 64 (1982) 249
Hole-mixing effects in the ionization of some unsaturated oxo-compounds, W. von Niessen, G. Bieri, J. Schirmer and L.S. Cederbaum 65 (1982) 157

SCF-Xα scattered wave model cluster calculations for the adsorption systems CO/Ni and N_2/Ni, A. Schichl, D. Menzel and N. Rösch 65 (1982) 225
Optical transitions, XPS, and electronic states in $NiPS_3$, M. Piacentini, F.S. Khumalo, C.G. Olson, J.W. Anderegg and D.W. Lynch 65 (1982) 289
Photoelectron–photoion coincidence study of CF_3I. Implications for the cw IR laser multiphoton dissociation of CF_3I^+, R. Bombach, J. Dannacher, J.-P. Stadelmann, J. Vogt, L.R. Thorne and J.L. Beauchamp 66 (1982) 403
Perturbation corrections to Koopmans' theorem. V. A study with large basis sets, D.P. Chong and S.R. Langhoff 67 (1982) 153
Gas phase high temperature photoelectron spectroscopy: the tin monoxide molecule, J.M. Dyke, A. Morris, A.M.A. Ridha and J.G. Snijders 67 (1982) 245
The parameter dependence of calculated Koopmans' defects in the framework of a model hamiltonian verified in the case of transition metal compounds, M.C. Böhm 67 (1982) 255
X-ray photoelectron spectroscopic study of tetraphenyldithiapyranylidene and its polyiodides, J.-P. Boutique, J. Riga, J.J. Verbist, H. Strzelecka and J. Rivory 67 (1982) 355
Calculations of the Auger transition rates in molecules. I. Effect of the nonspherical potential: application to CH_4, M. Higashi, E. Hiroike and T. Nakajima 68 (1982) 377
X-ray photoelectron spectra of 2-propenal and related compounds, G. Distefano, M. Guerra, D. Jones and A. Modelli 68 (1982) 383
Effects of relativity in the He(I) photoelectron spectrum of CI_4, G. Jonkers, C.A. de Lange and J.G. Snijders 69 (1982) 109
He(I) photoelectron spectroscopy of tetraiodoethylene (C_2I_4), G. Jonkers, S.M. van der Kerk, R. Mooyman, C.A. de Lange and J.G. Snijders 69 (1982) 115
Photoelectron angular distribution and assignments of photoelectron spectra of nitrogen dioxide, nitromethane and nitrobenzene, S. Katsumata, H. Shiromaru, K. Mitani, S. Iwata and K. Kimura 69 (1982) 423
He(I) photoelectron spectroscopy of transient species: germanium dichloride and germanium dibromide, G. Jonkers, S.M. van der Kerk and C.A. de Lange 70 (1982) 69
Electron energy-loss spectroscopy of forbidden transitions to valence and Rydberg states of formaldehyde, S. Taylor, D.G. Wilden and J. Comer 70 (1982) 291
A photoelectron–photoion coincidence study of acetaldehyde and ethylene oxide molecular ions, K. Johnson, I. Powis and C.J. Danby 70 (1982) 329

Double resonance spectroscopy

Proton–deuterium polarization transfer in magic angle spinning polycrystalline solids in the rotating frame, L. Müller 61 (1981) 235
Double-resonance and relaxation in a three-level system, C. Feuillade and C. Bottcher 62 (1981) 67
Comment on "V–V transfer rates for high-lying states of CO". I, Ph. Brechignac 62 (1981) 239
A further analysis of V–V transfer rates for high-lying states of CO, A.E. DePristo and H. Rabitz 62 (1981) 243
Comment on "V–V transfer rates for high-lying states of CO". II, Ph. Brechignac 62 (1981) 248
Two-photon sequential absorption spectroscopy of iodine monobromide in the 5 eV region, G.W. King, I.M. Littlewood and J.R. Robins 62 (1981) 359
Optical–optical double resonance spectra of CH_3F and CD_3F using isotopic CO_2 lasers, G. Duxbury and H. Kato 66 (1982) 161
Study and assignment of ion pair states of the I_2 molecule in the 40 000 cm^{-1} region, J. Chevaleyre, J.P. Perrot, J.M. Chastan, S. Valignat and M. Broyer 67 (1982) 59
Symmetry distortions and pseudo-Jahn–Teller effect of peri- and cata-hexabenzocoronene in their triplet states as observed by ODMR techniques, C. Bräuchle 67 (1982) 97

The electronic spectra of 10,10-dimethylanthracene-9-one crystals: spin–orbit/vibronic coupling in $^3n\pi^*$ states, S.R. Wilson and R. Bramley 67 (1982) 119
Kinetic observations on the E region states of iodine excited by two-photon spectroscopy, G.W. King, I.M. Littlewood and J.R. Robins 68 (1982) 129
Transition probabilities in electron–nuclear double- and multiple-resonance spectroscopy with non-coherent and coherent radio-frequency fields, A. Schweiger and Hs.H. Günthard 70 (1982) 1
Rotational and hyperfine structure in the $B\,^3\Pi_{0^+}$ excited state of ICl, H. Knöckel and E. Tiemann 70 (1982) 345

Lasers
Picosecond fluorescence depolarisation measured by frequency conversion, G.S. Beddard, T. Doust and G. Porter 61 (1981) 17
Energetics and mechanism for hydroxyl radical production from the Pt-catalyzed decomposition of water, L.D. Talley and M.C. Lin 61 (1981) 249
Viscosity dependent radiationless relaxation rate of cyanine dyes. A picosecond laser spectroscopy study, V. Sundström and T. Gillbro 61 (1981) 257
$C_2O(\tilde{A}\,^3\Pi_i \leftrightarrow \tilde{X}\,^3\Sigma^-)$: laser induced excitation and fluorescence spectra, W.M. Pitts, V.M. Donnelley, A.P. Baronavski and J.R. McDonald 61 (1981) 451
Excited state dynamics of $C_2O(\tilde{A}\,^3\Pi_i)$, W.M. Pitts, V.M. Donnelly, A.P. Baronavski and J.R. McDonald 61 (1981) 465
Vibrational energy transfer and relaxation processes in CH_3Br. A detailed kinetic analysis of the lower vibrational levels, A.J. Ouderkirk, V.A. Apkarian and E. Weitz 62 (1981) 387
Ab initio evaluation of the five-photon ionization cross sections of nitric oxide, P. Cremaschi 63 (1981) 85
Study of multiphoton excitation of SF_6 molecules in two strong IR laser fields, E. Borsella, R. Fantoni, G. Petrocelli, G. Sanna, M. Capitelli and M. Dilonardo 63 (1981) 219
Photodissociation of vibrationally excited CH_3Br, P.F. Zittel and D.D. Little 63 (1981) 227
Picosecond proton transfer studies in water–alcohols solutions, D. Hupper and E. Kolodney 63 (1981) 401
Molecular polarization and laser photopredissociation in the presence of a magnetic field, M. Broyer, M. Larzilliere, M. Carre, M.L. Gaillard, M. Velghe and J.B. Ozenne 63 (1981) 445
Nonlinear polariton effects in the phenanthrene crystal, C.K. Johnson and G.J. Small 64 (1982) 83
Laser-induced fluorescence of the $\tilde{R}^{es}B_2$ state of CS_2 excited at 3547 Å, R. Vasudev 64 (1982) 167
Laser diagnostics of the surface catalyzed equilibrium $2Na–Na_2$, J.P. Woerdman and S.S. Eskildsen 65 (1982) 83
Energy partitioning in the reaction $O(^1D) + H_2O \rightarrow OH + OH$. V. Rotational relaxation of $OH(X\,^2\Pi, v'', j'')$, K.-H. Gericke and F.J. Comes 65 (1982) 113
Dynamics of CO formation in the photodissociation of HNCO and CH_2CO at 193 nm, G.T. Fujimoto, M.E. Umstead and M.C. Lin 65 (1982) 197
Ab initio computation of vibrational relaxation rate coefficients for the collisions of CO_2 with helium and neon atoms, D.C. Clary 65 (1982) 247
Sensitized dissociation of UF_6, $XeOF_4$ and SF_5Cl by SF_6 excited with a pulsed CO_2 laser, C. Angelie, M. Cauchetier and J. Paris 66 (1982) 129
Optical–optical double resonance spectra of CH_3F and CD_3F using isotopic CO_2 lasers, G. Duxbury and H. Kato 66 (1982) 161
Electrolyte dissipation effects on polyion diffusion in low ionic strength buffers, K.S. Schmitz 66 (1982) 177

Electrolyte polarization effects on polyion diffusion in low ionic strength buffers, K.S. Schmitz, N. Parthasarathy and E. Vottler 66 (1982) 187
Photofragment spectroscopy of ICN at 266.0 nm and 299.4 nm: vibrational and rotational distribution of $CN(X\,^2\Sigma^+)$, A.P. Baronavski 66 (1982) 217
Laser induced fluorescence spectroscopy of NaLi in beam and bulk, F. Engelke, G. Ennen and K.H. Meiwes 66 (1982) 391
Photofragmentation of $SnCl_2$ at 193 nm, N.J.A. van Veen, G.N.A. van Veen, M.S. de Vries and A.E. de Vries 66 (1982) 465
Study and assignment of ion pair states of the I_2 molecule in the 40000 cm^{-1} region, J. Chevaleyre, J.P. Perrot, J.M. Chastan, S. Valignat and M. Broyer 67 (1982) 59
Production of the NH radical from the catalytic decomposition of NH_3 on polycrystalline Pt and Fe surfaces at high temperatures, G.S. Selwyn and M.C. Lin 67 (1982) 213
Sharp line vibronic spectra of chlorophyll and its derivatives in solid solutions, K.K. Rebane and R.A. Avarmaa 68 (1982) 191
Laser induced fluorescence study of thermal energy charge transfer reactions from $Ar^+(^2P_{1/2}, ^2P_{3/2})$ and $CO^+(X\,^2\Sigma, v'')$ to CO, J. Danon and R. Marx 68 (1982) 255
Time-dependent-thermal-lensing (TDTL) studies on gas-phase azulene, P.L. Trevor, T. Rothem and J.R. Barker 68 (1982) 341
Gas phase thermal diffusivities by a thermal lens technique, R.T. Bailey, F.R. Cruickshank, D. Pugh, A. McLeod and W. Johnstone 68 (1982) 351
$\tilde{A} \rightarrow \tilde{X}$ fluorescence spectra of CH_3O and C_2H_5O generated by the ArF laser photolysis of alkyl nitrites, T. Ebata, H. Yanagishita, K. Obi and I. Tanaka 69 (1982) 27
Electron impact dissociation of $CH_4(CD_4)$: laser induced fluorescence of product CH^+ (CD^+), B.H. Mahan and A. O'Keefe 69 (1982) 35
Master equation description of the multiphoton decomposition of ethyl acetate, J.E. Eberhardt, R.B. Knott, A.W. Pryor and R.G. Gilbert 69 (1982) 45
Absolute rate constants for the reactions of $CH(X\,^2\Pi)$ with NO, N_2O, NO_2, and N_2 at room temperature, S.S. Wagal, T. Carrington, S.V. Filseth and C.M. Sadowski 69 (1982) 61
On statistics of an ensemble of oscillators under excitation. III. Quantum non-linear oscillators with fast phase relaxation in a non-monochromatic external field, V.N. Sazonov, A.A. Stuchebrukhov and S.V. Zatsepin 69 (1982) 459
Theoretical probabilities of V–V energy transfer: CO with isotopes of N_2 and deactivation of laser-excited SO_2, V. Relevant and C. Manzanares I. 69 (1982) 473
Gas-phase phosphorescence of thioformaldehyde, D.J. Clouthier and C.M.L. Kerr 70 (1982) 55

Polarized light

Molecular polarization and laser photopredissociation in the presence of a magnetic field, M. Broyer, M. Larzilliere, M. Carre, M.L. Gaillard, M. Velghe and J.B. Ozenne 63 (1981) 445
Resonance Raman and polarized light infrared spectra of 1,4-dihydroxyanthraquinone. Vibrational studies of the ground and excited electronic states, G. Smulevich, L. Angeloni, G. Giovannardi and M.P. Marzocchi 65 (1982) 313
A theory of fluorescence depolarization in macroscopically ordered membrane systems, B.W. van der Meer, R.P.H. Kooyman and Y.K. Levine 66 (1982) 39
The vibrational fine structure of the $^1A_{2g} \leftarrow {}^1A_{1g}$ polarized absorption band of trans-$[Co(NH_3)_4(CN)_2]^+$. The excited state geometry, A. Urushiyama, H. Kupka, J. Degen and H.-H. Schmidtke 67 (1982) 65
Fluorescence polarization anisotropy and kinetics of malachite green measured as a function of solvent viscosity, F. Pellegrino, A. Dagen and R.R. Alfano 67 (1982) 111

Angular distribution of photopredissociation fragments from CH_3I^+, M. Tadjeddine, G. Bouchoux, L. Malegat, J. Durup, C. Pernot and J. Weiner 69 (1982) 229

Atomic and molecular beams

Active nitrogen luminescence studies at liquid helium temperatures, E.B. Gordon, A.A. Pelmenev, O.F. Pugachev and V.V. Khmelenko 61 (1981) 35
Activation threshold for vibrational excitation in $K-N_2$ collisions, U. Ross, W. Schepper and D. Beck 61 (1981) 95
The rotating rod model: opacity, excitation, deflection and angular distribution functions from collinear reaction probabilities, N. Agmon 61 (1981) 189
Calculation of the hyperfine spectrum for H_2–Ne, H_2–Ar, H_2–Kr dimers, M. Waaijer, M. Jacobs and J. Reuss 63 (1981) 247
Analysis of the ortho H_2–para H_2 hyperfine dimer spectrum, M. Waaijer, M. Jacobs and J. Reuss 63 (1981) 257
Measurements of the hyperfine dimer spectrum for H_2–Ne, H_2–Ar, H_2–Kr by the magnetic beam resonance technique, M. Waaijer and J. Reuss 63 (1981) 263
Molecular polarization and laser photopredissociation in the presence of a magnetic field, M. Broyer, M. Larzilliere, M. Carre, M.L. Gaillard, M. Velghe and J.B. Ozenne 63 (1981) 445
Tetracene–argon van der Waals molecules, A.M. Griffiths and P.A. Freedman 63 (1981) 469
The SrCl(A–X, B–X) bands in thermal and non-thermal reactive excitation using metastable Sr atoms, U. Brinkmann, V.H. Schmidt and H. Telle 64 (1982) 19
Vibrational and translational enhancement of endothermic reactions: $K + HCl(v = 0, 1)$ and $K + HF(v = 0, 1)$, F. Heismann and H.J. Loesch 64 (1982) 43
$Na_2 b\,^3\Pi_u$–$X\,^1\Sigma_g^+$ intercombination bands: direct observation through high resolution laser fluorescence spectroscopy in a supersonic nozzle beam, F. Engelke, H. Hage and C.D. Caldwell 64 (1982) 221
Mechanism of the metastable reaction $H_2S^+ \rightarrow S^+ + H_2$; product energy distributions and their dependence on temperature, M.F. Jarrold, A.J. Illies and M.T. Bowers 65 (1982) 19
High resolution translational energy spectroscopy: electronic transitions in Kr^+, and I^+ and vibronic transitions in N_2^+, A.J. Illies and M.T. Bowers 65 (1982) 281
Dissociative excitation of water by metastable argon, H.L. Snyder, B.T. Smith, T.P. Parr and R.M. Martin 65 (1982) 397
Molecular beam chemiluminescence: excitation functions for reactions of barium atoms with NO_2-monomers and $(NO_2)_n$-clusters, D.J. Wren and M. Menzinger 66 (1982) 85
Electron impact dissociation of molecular hydrogen and deuterium: translational energy distribution of atomic hydrogen and deuterium ($n = 3, 4, 5$), M. Higo, S. Kamata and T. Ogawa 66 (1982) 243
Laser induced fluorescence spectroscopy of NaLi in beam and bulk, F. Engelke, G. Ennen and K.H. Meiwes 66 (1982) 391
Photofragment of $SnCl_2$ at 193 nm, N.J.A. van Veen, G.N.A. van Veen, M.S. de Vries and A.E. de Vries 66 (1982) 465
Spectroscopy of the fluorene molecule in planar supersonic expansions, A. Amirav, U. Even and J. Jortner 67 (1982) 1
Non-maxwellian velocity distributions and molecular beam intensities in sonic nozzle expansions, C.E. Klots 67 (1982) 75
Focusing, rotational state selection and orientation of CH_3I in a seeded supersonic beam, K.K. Chakravorty, D.H. Parker and R.B. Bernstein 68 (1982) 1
Laser induced fluorescence study of the first part of a Na/Na_2 free jet expansion: dimer formation and excitation-energy transfer, F. Aerts, H. Hulsman and P. Willems 68 (1982) 233

Charge transfer between helium ions and metastable helium, R.H. Neynaber and S.Y. Tang 69 (1982) 213
Dynamic constraints associated with the formation of $SiS(a^3\Sigma^+)$ from the Si–OCS chemiluminescence reaction, J.L. Gole and G.J. Green 69 (1982) 357
Dynamics of ion–molecule processes: a crossed-beam study of the reaction $B^+(^3P) + H_2 \rightarrow BH^+ + H$, B. Friedrich and Z. Herman 69 (1982) 433
Semiclassical analysis of measurements of the total cross section Q and the small-angle differential cross section for CsF–Ar: an accurate method for absolute Q values, J.M. Henrichs, H.C.W. Beijerinck and N.F. Verster 70 (1982) 93
Zero-field Stark level crossing and Stark–Zeeman recrossing experiments in the 593 nm band of NO_2, F. Bylicki and H.G. Weber 70 (1982) 299

Time-resolved experiments
Viscosity dependent radiationless relaxation rate of cyanine dyes. A picosecond laser spectroscopy study, V. Sundström and T. Gillbro 61 (1981) 257
Excited state dynamics of $C_2O(\tilde{A}^3\Pi_i)$, W.M. Pitts, V.M. Donnelley, A.P. Baronavski and J.R. McDonald 61 (1981) 465
Decay kinetics of Kr^+ levels populated by ArF laser radiation, D.J. Wren and D.W. Setser 62 (1981) 43
Double-resonance and relaxation in a three-level system, C. Feuillade and C. Bottcher 62 (1981) 67
Radiative lifetimes and metastable states of free radicals. I. NF b $^1\Sigma^+$, P.H. Tennyson, A. Fontijn and M.A.A. Clyne 62 (1981) 171
Comment on "V–V transfer rates for high-lying states of CO". I, Ph. Brechignac 62 (1981) 239
A further analysis of V–V transfer rates for high-lying states of CO, A.E. DePristo and H. Rabitz 62 (1981) 243
Comment on "V–V transfer rates for high-lying states for CO". II, Ph. Brechignac 62 (1981) 248
Temperature dependence and anisotropy of the hole drift mobility in dibenzothiophene, A. Cehak and Z. Zboiński 62 (1981) 333
Concentration and temperature dependence of electronic and vibrational energy relaxation of O_2 in liquid mixtures, B. Faltermeier, R. Protz and M. Maier 62 (1981) 377
Vibrational energy transfer and relaxation processes in CH_3Br. A detailed kinetic analysis of the lower vibrational levels, A.J. Ouderkirk, V.A. Apkarian and E. Weitz 62 (1981) 387
Momentum distributions and ionization potentials for the valence orbitals of benzene, I. Fuss, I.E. McCarthy, A. Minchinton, E. Weigold and F.P. Larkins 63 (1981) 19
The temperature dependence of positron lifetimes in solid pivalic acid, M. Eldrup, D. Lightbody and J.N. Sherwood 63 (1981) 51
De-excitation rate constants of $Ne(^3P_2, ^3P_1$ and $^3P_0)$ by atoms and molecules as studied by the pulse radiolysis method, A. Yokoyama and Y. Hatano 63 (1981) 59
Investigation of T_1- and T_2-relaxation under the influence of a pump radiation, W. Schrepp and H. Mäder 63 (1981) 113
Concentration quenching of pyrene $^1B_{1u}$ in the vapour phase, A. Davis, M.J. Pilling and M.J. Westby 63 (1981) 209
Time resolved vibrational chemiluminescence: rate constants for the reactions F + HBr, HI → HF + Br, I and for the relaxation of $HF(v = 4)$ and $HF(v = 6)$ by HBr, HI, CO_2, N_2O, CO, N_2 and O_2, I.W.M. Smith and D.J. Wrighley 63 (1981) 321
Picosecond proton transfer studies in water–alcohols solutions, D. Huppert and E. Kolodney 63 (1981) 401
Picosecond observation of fluorescence from B_u states of diphenylpolyenes, T.C. Felder, K.-J. Choi and M.R. Topp 64 (1982) 175

Donor fluorescence decay in solid solution, R. Twardowski, J. Kuśba and C. Bojarski 64 (1982) 239
Molecular orbital momentum distributions and binding energies for nitric oxide, C.E. Brion, J.P.D. Cook, I.G. Fuss and E. Weigold 64 (1982) 287
Solvent influence on photochemical isomerizations: photophysics of DODCI, S.P. Velsko and G.R. Fleming 65 (1982) 59
Energy partitioning in the reaction $O(^1D) + H_2O \rightarrow OH + OH$. V. Rotational relaxation of $OH(X\,^2\Pi, v'', j'')$, K.-H. Gericke and F.J. Comes 65 (1982) 113
Lifetimes and transition moment of the A–X band system of Bi_2, G. Ehret and G. Gerber 66 (1982) 27
Temperature and deuterium effects on the phosphorescence lifetimes of dimethylbenzaldehydes in durene single crystals, A. Despres, V. Lejeune and E. Migirdicyan 66 (1982) 57
Inhibition, antiinhibition and enhancement of positronium formation in some different hydrocarbon–solute mixtures, G. Wikander 66 (1982) 227
Absolute dipole oscillator strengths for molecular and dissociative photoionization of COS(10–50 eV) and CS_2(10–40 eV), F. Carnovale, A.P. Hitchcock, J.P.D. Cook and C.E. Brion 66 (1982) 249
Influence of solvent viscosity on excited state lifetime and fluorescence quantum yield of dye molecules, B. Wilhelmi 66 (1982) 351
Determination of bifurcation in chemical systems. An experimental method, J. Masełko 67 (1982) 17
Fluorescence polarization anisotropy and kinetics of malachite green measured as a function of solvent viscosity, F. Pellegrino, A. Dagen and R.R. Alfano 67 (1982) 111
Vibrational energy relaxation of high density HCl fluid in the 150–345 K range, J. Chesnoy and D. Ricard 67 (1982) 347
Position dependent deuterium effects on the vapor phase fluorescence lifetimes of tetradeuterophenanthrenes, J.J. O'Brien, M.D. Horne, B.K. Selinger and B.R. Henry 68 (1982) 123
Dual phosphorescence of halogenated benzenes in rigid-glass solution, T. Takemura, Y. Yamada and H. Baba 68 (1982) 171
A shock tube study of vibrational relaxation in pure N_2O, and mixtures of N_2O with argon, helium-4, helium-3, deuterium, hydrogen deuteride, normal and para-hydrogen, C.J.S.M. Simpson, P.D. Gait, T.J. Price and M.G. Foster 68 (1982) 293
Time-dependent-thermal-lensing (TDTL) studies on gas-phase azulene, P.L. Trevor, T. Rothem and J.R. Barker 68 (1982) 341
Gas phase thermal diffusivities by a thermal lens technique, R.T. Bailey, F.R. Cruickshank, D. Pugh, A. McLeod and W. Johnstone 68 (1982) 351
Energy dependence of the S_1-decay of propynal and propynal-d_1 and the influence of collisions, U. Brühlmann and J.R. Huber 68 (1982) 405
Temperature dependence of the $C_2(X\,^1\Sigma_g^+)$ reaction with H_2 and CH_4 and $C_2(X\,^1\Sigma_g^+$ and a $^3\Pi_u$ equilibrated states) with O_2, W.M. Pitts, L. Pasternack and J.R. McDonald 68 (1982) 417
Transient intermediates in the flash photolysis of mercury vapour. Dimers, trimers and the enigmatic 2480 Å bands, A.B. Callear and K.-L. Lai 69 (1982) 1
Electron impact dissociation of $CH_4(CD_4)$: laser induced fluorescence of product CH^+ (CD^+), B.H. Mahan and A. O'Keefe 69 (1982) 35
Absolute rate constants for the reactions of $CH(X^2\Pi)$ with NO, N_2O, NO_2, and N_2 at room temperature, S.S. Wagal, T. Carrington, S.V. Filseth and C.M. Sadowski 69 (1982) 61
Correlation of positronium yield with excess electron mobility in liquid neopentane, F.M. Jacobsen, O.E. Mogensen and G. Trumpy 69 (1982) 71
Modeling of the fast photoisomerisation process in polymethine dyes, S.K. Rentsch 69 (1982) 81
Observation of the inverse isotope effect in a tunnel electron transfer, A.I. Fiksel, V.N. Parmon and K.I. Zamaraev 69 (1982) 135

O_3 photolysis at 248 nm and $O(^1D_2)$ quenching by H_2O, CH_4, H_2, and N_2O: $O(^3P_J)$ yields, P.H. Wine and A.R. Ravishankara 69 (1982) 365
Observation of new bands in the N_2 Herman infrared system and kinetic study of its formation in a pulsed-discharge apparatus, I. Nadler, A. Rotem and S. Rosenwaks 69 (1982) 375
Vibrational relaxation of deuterium in argon fluid, P. Roussignol, C. Delalande and G.M. Gale 70 (1982) 319
Relaxation of dihaloacetylene cations in their $\tilde{A}$ and $\tilde{B}$ states studied by photoelectron–photon coincidence spectroscopy, J.P. Maier and F. Thommen 70 (1982) 325

Cyclotron resonance
Molecular ions, P.N.T. van Velzen and W.J. van der Hart 61 (1981) 325
Isomerization of molecular ions of alkenes and cycloalkanes studied by photodissociation in an ICR spectrometer, P.N.T. van Velzen and W.J. van der Hart 61 (1981) 335

Mass spectra
The predissociation of molecular oxygen cations O_2^+ ($\tilde{B}\ ^2\Sigma_g$), R. Bombach, A. Schmelzer and J.-P. Stadelmann 61 (1981) 214
Isomerization of molecular ions of alkenes and cycloalkanes studied by photodissociation in an ICR spectrometer, P.N.T. van Velzen and W.J. van der Hart 61 (1981) 335
Photoionization study of the kinetics of unimolecular decomposition of halobenzene ions, S.T. Pratt and W.A. Chupka 62 (1981) 153
Mechanism of the metastable reaction $H_2S^+ \rightarrow S^+ + H_2$; product energy distributions and their dependence on temperature, M.F. Jarrold, A.J. Illies and M.T. Bowers 65 (1982) 19
High resolution translational energy spectroscopy: electronic transitions in Kr^+, and I^+ and vibronic transitions in N_2^+, A.J. Illies and M.T. Bowers 65 (1982) 281
A model for multiphoton ionisation mass spectroscopy with application to benzene, W. Dietz, H.J. Neusser, U. Boesl, E.W. Schlag and S.H. Lin 66 (1982) 105
Absolute dipole oscillator strengths for molecular and dissociative photoionization of COS(10–50 eV) and CS_2(10–40 eV), F. Carnovale, A.P. Hitchcock, J.P.D. Cook and C.E. Brion 66 (1982) 249
Photoelectron–photoion coincidence study of CF_3I. Implications for the cw IR laser multiphoton dissociation of CF_3I^+, R. Bombach, J. Dannacher, J.-P. Stadelmann, J. Vogt, L.R. Thorne and J.L. Beauchamp 66 (1982) 403
The mechanism of NO_3^- formation from gaseous ethyl nitrate, S. Włodek, Z. Łuczyński and H. Wincel 67 (1982) 221
A dissociative electroionization study of nitrous oxide. The NO^+ and N_2^+ dissociation channels, J.L. Olivier, R. Locht and J. Momigny 68 (1982) 201
Energy disposal in the rotational pre-dissociation of ND_3^+, I. Powis 68 (1982) 251
Multiphoton ionization and fragmentation mechanisms of CS_2, M. Seaver, J.W. Hudgens and J.J. de Corpo 70 (1982) 63
A photoelectron–photoion coincidence study of acetaldehyde and ethylene oxide molecular ions, K. Johnson, I. Powis and C.J. Danby 70 (1982) 329

Radiolysis
De-excitation rate constants of $Ne(^3P_2, ^3P_1$ and $^3P_0)$ by atoms and molecules as studied by the pulse radiolysis method, A. Yokoyama and Y. Hatano 63 (1981) 59
Models of three and four body electron attachment to O_2 molecules, D.R.A. McMahon 66 (1982) 67
Inhibition, antiinhibition and enhancement of positronium formation in some different hydrocarbon–solute mixtures, G. Wikander 66 (1982) 227

Emission cross sections from fragments produced by electron impact on silane, J. Perrin and J.P.M. Schmitt 67 (1982) 167
Correlation of positronium yield with excess electron mobility in liquid neopentane, F.M. Jacobsen, O.E. Mogensen and G. Trumpy 69 (1982) 71
The influence of electrostatic interactions on Franck–Condon factors in electron transfer processes, J.W. van Leeuwen and Y.K. Levine 69 (1982) 89

Mössbauer spectroscopy
Slow electronic spin relaxation in high spin hexakis (pyridine-N-oxide) iron (II) perchlorate, G.H.M. Calis, A.E.M. Swolfs and J.M. Trooster 64 (1982) 259
A study of magnetic ordering and phase transitions in ferrous iodide by means of high field ^{57}Fe Mössbauer spectroscopy, G.H.M. Calis, A.E.M. Swolfs and J.M. Trooster 64 (1982) 273
The effect of the lattice expansion on high spin $\rightleftharpoons$ low spin transitions, H. Spiering, E. Meissner, H. Köppen, E.W. Müller and P. Gütlich 68 (1982) 65

Diffraction
Structure and properties of cation-radical salts of arenes. II. Crystal structure, phase transitions and analysis of the electrochemical crystallization process of fluoranthenyl cation-radical salts. V. Enkelmann, B.S. Morra, Ch. Kröhnke, G. Wegner and J. Heinze 66 (1982) 303

P–V–T dependence
Pressure and temperature dependence of the proton and deuteron spin–lattice relaxation times in liquid H_2S and D_2S, J. Hauer, E.W. Lang and H.-D. Lüdemann 62 (1981) 195
Sorption energy of helium in solid rare gases and SF_6, H. Abe 68 (1982) 89

Scattering
Brillouin scattering and refractive index measurements on low temperature liquids. III. CH_3Cl, CH_2Cl_2, $CHCl_3$ and CHF_3, A. Yoshihara, A. Anderson, R.A. Aziz and C.C. Lim 61 (1981) 1
Inelastic neutron scattering studies of coordinate acetylene: the complex $Co_2(CO)_6 \cdot C_2H_2$, J. Howard, K. Robson and T.C. Waddington 61 (1981) 53
Activation threshold for vibrational excitation in K–N_2 collisions, U. Ross, W. Schepper and D. Beck 61 (1981) 95
The infrared, Raman, resonance Raman spectra and the valence force field of the ZrS_3 layer-type compound, C. Sourisseau and Y. Mathey 63 (1981) 143
Internally folded densities, A.J. Thakkar, A.M. Simas and V.H. Smith Jr. 63 (1981) 175
Vibrational and translational enhancement of endothermic reactions: K + HCl ($v = 0, 1$) and K + HF($v = 0, 1$), F. Heismann and H.J. Loesch 64 (1982) 43
Hydrogen bonding in potassium hydrogen maleate and some simple derivatives studied by inelastic neutron scattering spectroscopy, J. Tomkinson, I.J. Braid, J. Howard and T.C. Waddington 64 (1982) 151
Inelastic neutron scattering spectra of alkali metal (Na, K) bifluorides: the harmonic overtone of ν_3, T.C. Waddington, J. Howard, K.P. Brierley and J. Tomkinson 64 (1982) 193
Collisional ionization of highly excited neon atoms by nonpolar hydrocarbons, M. Uematsu, H. Hiraishi, T. Fukuyama, T. Kondow and K. Kuchitsu 64 (1982) 381
Molecular beam chemiluminescence: excitation functions for reactions of barium atoms with NO_2-monomers and $(NO_2)_n$-clusters, D.J. Wren and M.Menzinger 66 (1982) 85

Electrolyte dissipation effects on polyion diffusion in low ionic strength buffers, K.S. Schmitz 66 (1982) 177
Electrolyte polarization effects on polyion diffusion in low ionic strength buffers, K.S. Schmitz, N. Parthasarathy and E. Vottler 66 (1982) 187
Absolute dipole oscillator strengths for molecular and dissociative photoionization of COS(10–50 eV) and CS_2(10–40 eV), F. Carnovale, A.P. Hitchcock, J.P.D. Cook and C.E. Brion 66 (1982) 249
Translational spectroscopy of electron impact dissociation of molecules isoelectronic with Ne by Doppler profile measurements of Balmer-α emission, N. Kouchi, M. Ohno, K. Ito, N. Oda and Y. Hatano 67 (1982) 287
Detailed energy partitioning in the decomposition of chemically energized C_2H_3F, D.J. Donaldson, D.G. Watson and J.J. Sloan 68 (1982) 95
Differential cross sections for elastic scattering and electron detachment in collisions of halogen anions with noble gas atoms, C. de Vreugd, R.W. Wijnaendts van Resandt, J.B. Delos and J. Los 68 (1982) 261
Energy distributions of electrons detached in Cl^- + noble gas atom collisions, C. de Vreugd, R.W. Wijnaendts van Resandt, J.B. Delos and J. Los 68 (1982) 275
Binary (e, 2e) spectroscopy and momentum-space chemistry of CO_2, J.P.D. Cook and C.E. Brion 69 (1982) 339
Dynamics of ion–molecule processes: a crossed-beam study of the reaction $B^+(^3P) + H_2 \rightarrow BH^+ + H$.B. Friedrich and Z. Herman 69 (1982) 433

OBJECTS

Bulk systems

Gases

Translational energy distribution and production mechanism of excited hydrogen atoms produced in electron–CH_4 collisions, T. Ogawa, J. Kurawaki and M. Higo 61 (1981) 181
The rotating rod model: opacity, excitation, deflection and angular distribution functions from collinear reaction probabilities, N. Agmon 61 (1981) 189
A calculation of the temperature dependent radiationless decay of the propanyl triplet state T_1, P. Russegger and J.R. Huber 61 (1981) 205
Gas/gas and gas/wall energy transition functions in the multichannel thermal decomposition of chloroethane-2-d_1, K.D. King, T.T. Nguyen and T.G. Gilbert 61 (1981) 221
Energetics and mechanism for hydroxyl radical production from the Pt-catalyzed decomposition of water, L.D. Talley and M.C. Lin 61 (1981) 249
$C_2O(\tilde{A}\,^3\Pi_i \leftrightarrow \tilde{X}\,^3\Sigma^-)$: laser induced excitation and fluorescence spectra, V.M. Pitts, V.M. Donnelley, A.P. Baronavski and J.R. McDonald 61 (1981) 451
Excited state dynamics of $C_2O(\tilde{A}^3\Pi_i)$, V.M. Pitts, V.M. Donnelley, A.P. Baronavski and J.R. McDonald 61 (1981) 465
A theoretical study of depolarized Rayleigh spectral linewidths in gases, A.F. Turfa and H.F.P. Knaap 62 (1981) 57
Vibrational energy transfer and relaxation processes in CH_3Br. A detailed kinetic analysis of the lower vibrational levels, A.J. Ouderkirk, V.A. Apkarian and E. Weitz 62 (1981) 387
The photophysics of tertiary aliphatic amines, C.G. Cureton, K. Hara, D.V. O'Connor and D. Phillips 63 (1981) 31
De-excitation rate constants of Ne($^3P_2$, $^3P_1$ and $^3P_0$) by atoms and molecules as studied by the pulse radiolysis method, Y. Yokoyama and Y. Hatano 63 (1981) 59

Investigation of T_1- and T_2-relaxation under the influence of a pump radiation, W. Schrepp and H. Mäder 63 (1981) 113
Study of multiphoton excitation of SF_6 molecules in two strong IR laser fields, E. Borsella, R. Fantoni, G. Petrocelli, G. Sanna, M. Capitelli and M. Dilonardo 63 (1981) 219
Strict Lindemann behaviour because of an activation bottleneck, S.R. Vatsya and H.P. Pritchard 63 (1981) 383
On the vibrational structure of methyl iodide. I. Cubic and quartic normal mode coupling constants, R. Zygan-Maus and S.F. Fischer 63 (1981) 475
On the vibrational structure of methyl iodide. II. Relaxation pathways in the 3000 cm^{-1} energy regime, R. Zygan-Maus and S.F. Fischer 63 (1981) 485
Intermolecular potential functions and the properties of water, J.R. Reimers, R.O. Watts and M.L. Klein 64 (1982) 95
Laser-induced fluorescence of the $\tilde{R}^{es}B_2$ state of CS_2 excited at 3547 Å, R. Vasudev 64 (1982) 167
Classical dynamics of multiphoton dissociation for a model system, D.L. Martin and R.E. Wyatt 64 (1982) 203
Master equation approach to vibrational energy transfer between two diatomic molecules, A.J. Makowski and T. Orlikowski 64 (1982) 231
The CO–He system revisited: V–T collisional relaxation from ab initio potentials, F.A. Gianturco, U.T. Lamanna and G. Petrella 64 (1982) 299
The reaction $X + Cl_2 \rightarrow XCl + Cl(X = Mu, H, D)$. II. Comparison of experimental data with theoretical results derived from a new potential energy surface, J.N.L. Connor, W. Jakubetz, A. Laganà, J. Manz and J.C. Whitehead 65 (1982) 29
Energy partitioning in the reaction $O(^1D) + H_2O \rightarrow OH + OH$. V. Rotational relaxation of $OH(X\,^2\Pi, v'', j'')$, K-H. Gericke and F.J. Comes 65 (1982) 113
An approach to the estimation of polyatomic vibrational radiative relaxation rates, E. Herbst 65 (1982) 185
Dynamics of CO formation in the photodissociation of HNCO and CH_2CO at 193 nm, G.T. Fujimoto, M.E. Umstead and M.C. Lin 65 (1982) 197
Comparison of quantum mechanical and semiclassical (classical path) probabilities for vibrational transitions in diatom-diatom collisions, G.D. Billing and G. Jolicard 65 (1982) 323
Models of three and four body electron attachment to O_2 molecules, D.R.A. McMahon 66 (1982) 67
Experimental and theoretical studies of the valence-shell dipole excitation spectrum of molecular fluorine, A.P. Hitchcock, C.E. Brion, G.R.J. Williams and P.W. Langhoff 66 (1982) 435
Spectroscopy of the fluorene molecule in planar supersonic expansions, A. Amirav, U. Even and J. Jortner 67 (1982) 1
The phase modulated semiclassical sudden approximation. Study of the transitions $v = 1$, $j \rightarrow v = 0, j'$ in the $pH_2 + He^4$ system, A. Grosjean and G. Jolicard 67 (1982) 139
Competitive collision activation in vibrational energy transfer with cyclopropane-$1t_1$-2, $2d_2$. A three-channel system, V.V. Krongauz and B.S. Rabinovitch 67 (1982) 201
Gas phase high temperature photoelectron spectroscopy: the tin monoxide molecule, J.M. Dyke, A. Morris, A.M.A. Ridha and J.G. Snijders 67 (1982) 245
Focusing, rotational state selection and orientation of CH_3I in a seeded supersonic beam, K.K. Chakravorty, D.H. Parker and R.B. Bernstein 68 (1982) 1
A dissociative electroionization study of nitrous oxide. The NO^+ and N_2^+ dissociation channels, J.L. Olivier, R. Locht and J. Momigny 68 (1982) 201
Laser induced fluorescence study of the first part of a Na/Na_2 free jet expansion: dimer formation and excitation-energy transfer, F. Aerts, H. Hulsman and P. Willems 68 (1982) 233

A shock tube study of vibrational relaxation in pure N_2O, and mixtures of N_2O with argon, helium-4, helium-3, deuterium, hydrogen deuteride, normal and para-hydrogen, C.J.S.M. Simpson, P.D. Gait, T.J. Price and M.G. Foster 68 (1982) 293
Theory of the time-dependent-thermal-lensing (TSTL) technique as used in energy-transfer experiments, J.R. Barker and T. Rothem 68 (1982) 331
Time-dependent-thermal-lensing (TDTL) studies on gas-phase azulene, P.L. Trevor, T. Rothem and J.R. Barker 68 (1982) 341
Gas phase thermal diffusivities by a thermal lens technique, R.T. Bailey, F.R. Cruickshank, D. Pugh, A. McLeod and W. Johnstone 68 (1982) 351
Thermal dissociation of diatomic molecules with bound electronically excited states, N.M. Kuznetsov and A.M. Samusenko 68 (1982) 359
Energy dependence of the S_1-decay of propynal and propynal-d_1 and the influence of collisions, U. Brühlmann and J.R. Huber 68 (1982) 405
Temperature dependence of the $C_2(X\,^1\Sigma_g^+)$ reaction with H_2 and CH_4 and $C_2(X\,^1\Sigma_g^+$ and $a\,^3\Pi_u$ equilibrated states) with O_2, W.M. Pitts, L. Pasternack and J.R. McDonald 68 (1982) 417
On the interatomic potentials for noble gas mixtures, K. Watanabe, A.R. Allnatt and W.J. Meath 68 (1982) 423
$\tilde{A} \rightarrow \tilde{X}$ fluorescence spectra of CH_3O and C_2H_5O generated by the ArF laser photolysis of alkyl nitrites, T. Ebata, H. Yanagishita, K. Obi and J. Tanaka 69 (1982) 27
Master equation description of the multiphoton decomposition of ethyl acetate, J.E. Eberhardt, R.B. Knott, A.W. Pryor and R.G. Gilbert 69 (1982) 45
Effects of relativity in the He(I) photoelectron spectrum of CI_4, G. Jonkers, C.A. de Lange and J.G. Snijders 69 (1982) 109
He(I) photoelectron spectroscopy of tetraiodoethylene (C_2I_4), G. Jonkers, S.M. van der Kerk, R. Mooyman, C.A. de Lange and J.G. Snijders 69 (1982) 115
On the calculation of classical vibrational energy exchange, J.P. Gibbons and J.D. Stettler 69 (1982) 141
Further development and application of the ECS scaling theory: non-linear molecules, A.M. Richard and A.E. DePristo 69 (1982) 273
Quasiclassical trajectory calculations for $H + H_2$ ($v = 0, 1$) on a potential energy surface from force field data, A.J.C. Varandas 69 (1982) 295
Determination of the rate constant of reaction of $N(^4S_{3/2})$ with NO_2 using resonance fluorescence in a discharge flow system, M.A.A. Clyne and Y. Ono 69 (1982) 381
Multiphoton ionization and fragmentation mechanisms of CS_2, M. Seaver, J.W. Hudgens and J.J. de Corpo 70 (1982) 63
Classical path calculation of differential cross sections for rotational excitation of CO colliding with D_2 at 87.2 meV, G.D. Billing and L.L. Poulsen 70 (1982) 119
Gaseous ion transport coefficients, L.A. Viehland 70 (1982) 149
On a semiclassical approach to energy transfer by atom/molecule-surface collisions, G.D. Billing 70 (1982) 223
Multiphoton absorption of SF_6: a numerical analysis of the density-matrix approach, M. Dilonardo, G. Petrocelli and M. Capitelli 70 (1982) 247

Liquids

Brillouin scattering and refractive index measurements on low temperature liquids. III. CH_3Cl, CH_2Cl_2, $CHCl_3$ and CHF_3, A. Yoshihara, A. Anderson, R.A. Aziz and C.C. Lim 61 (1981) 1
Picosecond fluorescence depolarisation measured by frequency conversion, G.S. Beddard, T. Doust and G. Porter 61 (1981) 17

Fourth and sixth spectral moments in far infrared spectroscopy, M.W. Evans 62 (1981) 179
Pressure and temperature dependence of the proton and deuteron spin-lattice relaxation times in liquid H_2S and D_2S, J. Hauer, E.W. Lang and H.-D. Lüdemann 62 (1981) 195
IR and Raman study of rotational relaxation of furan and thiophene. I. Bandwidths. Comparison of the rotations about the principal axes of inertia, J.P. Pinan-Lucarre, J. Loisel and J. Vincent-Geisse 62 (1981) 251
IR and Raman study of rotational relaxation of furan and thiophene. II. Correlation functions. Interpretation according to models, J.P. Pinan-Lucarre and T. Nguyen-Tan 62 (1981) 265
Vibrational spectra and dynamics of conformation and hydrogen bonding of N-methyl-acetamide. J. Conformational dynamics of the $CH_3CONHCH_3$ molecule and NH out of plane band splitting, F. Fillaux and M.H. Baron 62 (1981) 275
Concentration and temperature dependence of electronic and vibrational energy relaxation of O_2 in liquid mixtures, B. Faltermeier, R. Protz and M. Maier 62 (1981) 377
The determination of the complex refractive indices of some concentrated aqueous salt solutions at submillimetre wavelengths, M. Bennouna, H. Cachet, J.C. Lestrade and J.R. Birch 62 (1981) 439
Itinerant oscillation with a cosine potential, M. Ferrario, M.W. Evans and W.T. Coffey 62 (1981) 481
Concentration dependence of the vibrational energy relaxation of O_2 in liquid mixtures, E.W. Knapp and S.F. Fischer 63 (1981) 203
Intermolecular potential functions and the properties of water, J.R. Reimers, R.O. Watts and M.L. Klein 64 (1982) 95
The determination and assignment of a complete ^{14}N quadrupole coupling tensor in liquid solution, T.M. Plantenga, H. Bulsink, F.J.J. de Kanter and C. MacLean 65 (1982) 71
The electric saturation of molecular alignment in liquid nitrobenzene as studied by NMR, T.M. Plantenga, F.J.J. de Kanter, H. Bulsink and C. MacLean 65 (1982) 77
Approximative evaluations of the electrostatic free energy and internal energy changes in solution processes, S. Miertuš and J. Tomasi 65 (1982) 239
The effect of intramolecular modes on the velocity of non-radiative transitions in a polar medium, A.B. Helman 65 (1982) 271
Brillouin scattering in liquid mixtures: $CCl_4/CHCl_3$, D. Samios, Th. Dorfmüller and A. Asenbaum 65 (1982) 305
Studies of quadrupolar and dipolar electric field effects in the NMR spectra of binary mixtures of liquids, T.M. Plantenga, P.C.M. van Zijl and C. MacLean 66 (1982) 1
Dielectric saturation and dielectric friction on an ion in a polar solvent, J.B. Hubbard and R.F. Kayser 66 (1982) 377
Collision-induced absorption in non-polar molecular liquids: tetrahedral molecules, H.-J. Arning, J. Samios, K. Tibulski and Th. Dorfmüller 67 (1982) 177
Muonium substituted organic free radicals in liquids. Muon–electron hyperfine coupling constants of alkyl and allyl radicals, E. Roduner, W. Strub, P. Burkhard, J. Hochmann, P.W. Percival, H. Fischer, M. Ramos and B.C. Webster 67 (1982) 275
Vibrational energy relaxation of high density HCl fluid in the 150-345 K range, J. Chesnoy and D. Ricard 67 (1982) 347
Correlation of positronium yield with excess electron mobility in liquid neopentane, F.M. Jacobsen, O.E. Mogensen and G. Trumpy 69 (1982) 71
Vibrational relaxation of deuterium in argon fluid, P. Roussignol, C. Delalande and G.M. Gale 70 (1982) 319

Solutions
Theoretical evaluation of the vibronic intensity distribution in the phosphorescence of benzene, G. Marconi, G. Orlandi, P. Palmieri and J. Vrbancich 61 (1981) 43
About the concentration dependence of the anisotropy in the magnetic susceptibility of some aromatic compounds in the liquid phase, studied by NMR, T.M. Plantenga, H. Bulsink, C. Maclean and J.A.R. Lohman 61 (1981) 271
Vibrational transitions in excited states of molecules using coherent Stokes Raman spectroscopy: application to ferrocytochrome-c, J.B. Andrews, R.M. Hochstrasser and H.P. Trommsdorff 62 (1981) 87
Factors affecting anisotropic reorientation in a series of aromatic molecules dissolved in carbon disulfide, H. Nery, D. Canet and J.L. Rivail 62 (1981) 123
Diffusion of some species of different charge and mass in light and heavy water, C. Biondi and L. Bellugi 62 (1981) 145
Vibrational spectra and dynamics of conformation and hydrogen bonding of N-methyl-acetamide. I. Conformational dynamics of the $CH_3CONHCH_3$ molecule and NH out of plane band splitting, F. Fillaux and M.H. Baron 62 (1981) 275
Raman linewidth study of vibrational relaxation of benzonitrile in solution, K. Tanabe 63 (1981) 135
Solvent effect on optical activity in dilute solutions, S. Woźniak and B. Linder 63 (1981) 377
Picosecond proton transfer studies in water-alcohols solutions, D. Huppert and E. Kolodney 63 (1981) 401
Donor fluorescence decay in solid solution, R. Twardowski, J. Kuśba and C. Bojarski 64 (1982) 239
The Coulomb condensate of the nonlinear Poisson-Boltzmann equation: a unified theory, M.A. Lampert 65 (1982) 143
Electronic transitions of vanadyl phthalocyanine in solution and in the solid state, T.-H. Huang and J.H. Sharp 65 (1982) 205
The thermodynamic driving force in mutual diffusion of hard spheres, J.M. Schurr 65 (1982) 217
Approximative evaluations of the electrostatic free energy and internal energy changes in solution processes, S. Miertuš and J. Tomasi 65 (1982) 239
Depolarization dispersion curves of resonance Raman fundamentals of metalloporphyrins and metallophthalocyanines subject to asymmetric perturbations, M.Z. Zgierski and M. Pawlikowski 65 (1982) 335
Influence of inhomogeneous broadening on resonance Raman characteristics of metallo-porphyrins and metallophthalocyanines, M.Z. Zgierski 65 (1982) 369
Theory of the decay of the fluorescence polarization anisotropy of macromolecules with local cylindrical symmetry, J.M. Schurr 65 (1982) 417
Generalized lagrangian equations of nonlinear reaction-diffusion, M.A. Biot 66 (1982) 11
Inhibition, antiinhibition and enhancement of positronium formation in some different hydrocarbon–solute mixtures, G. Wikander 66 (1982) 227
Two-photon excitation spectra of the lowest electronic states of 2,2′-bipyridine, E. Castellucci, P.R. Salvi and P. Foggi 66 (1982) 281
Influence of solvent viscosity on excited state lifetime and fluorescence quantum yield of dye molecules, B. Wilhelmi 66 (1982) 351
Delayed fluorescence from the lowest $^1B_{3u}^+$ state of anthracene, due to hetero-triplet-triplet annihilation of ^{3}anthracene* and ^{3}xanthone*, B. Nickel and G. Roden 66 (1982) 365
Determination of bifurcation in chemical systems. An experimental method, J. Masełko 67 (1982) 17
Electron exchange effect on CIDNP formation in electron transfer reactions, A.I. Kruppa, T.V. Leshina, R.Z. Sagdeev, K.M. Salikhov and F.S. Sarvarov 67 (1982) 27
Nonlinear dielectric study of molecular association of phenyl and of methyl iso-thiocyanates, M. Dutkiewicz 68 (1982) 83

Acoustic anomaly in a critical binary mixture of aniline and cyclohexane at low and ultrasonic frequencies, H. Tanaka, Y. Wada and H. Nakajima 68 (1982) 223
Modeling of the fast photoisomerisation process in polymethine dyes, S.K. Rentsch 69 (1982) 81
Molecular dynamics simulations of restricted primitive model 1 : 1 electrolytes, D.M. Heyes 69 (1982) 155
Steric factor in diffusion-controlled chemical reactions, V.M. Berdnikov and A.B. Doktorov 69 (1982) 205
A comparison of tunneling transfer theories for asymmetric isomerization reactions, P.H. Cribb, S. Nordholm and N.S. Hush 69 (1982) 259
Optical dispersion and molar refractivities of alkali halide crystals and aqueous solutions, A. Penzkofer, H. Glas and J. Schmailzl 70 (1982) 47
Theoretical study of the kinetic isotope effect in proton-transfer reactions. Influence of the interaction potential of reactants on the kinetic isotope effect, J. Sühnel and K. Gustav 70 (1982) 109
Electronic excited state transport and trapping in one- and two-dimensional disordered systems, R.F. Loring and M.D. Fayer 70 (1982) 139

Crystals
Charge transfer transitions in solid tetracene and pentracene studied by electroabsorption, L. Sebastian, G. Weiser and H. Bässler 61 (1981) 125
Theory of ligand-induced non-radiative relaxation in lanthanide complexes, D.S. Ray and M. Chowdhury 61 (1981) 157
Photon–deuterium polarization transfer in magic angle spinning polycrystalline solids in the rotating frame, L. Müller, 61 (1981) 235
Interactions between Frenkel excitons. I. Formalism and preliminary results, D. Fox 61 (1981) 477
Do protons tunnel in the formic acid dimer and in the crystal? G.N. Robertson and M.C. Lawrence 62 (1981) 131
Theory of ultrasonic absorption in anharmonic molecular crystals, R.G. Della Valle, P.F. Fracassi and S.H. Walmsley 62 (1981) 231
Vibrational spectra and dynamics of conformation and hydrogen bonding of N-methyl-acetamide. I. Conformational dynamics of the $CH_3CONHCH_3$ molecule and NH out of plane band splitting, F. Fillaux and M.H. Baron 62 (1981) 275
Vibrational spectra and dynamics of conformation and hydrogen bonding of N-methyl-acetamide. II. Dynamics of the NH... O hydrogen bond and NH(ND) stretching band structure, F. Fillaux 62 (1981) 287
Temperature dependence and anisotropy of the hole drift mobility in dibenzothiophene, A. Cehak and Z. Zboiński 62 (1981) 333
Electroreflectance studies on the excitons in PTS and DCHD single crystals, L. Sebastian and G. Weiser 62 (1981) 447
The temperature dependence of positron lifetimes in solid pivalic acid, M. Eldrup, D. Lightbody and J.N. Sherwood 63 (1981) 51
Spectroscopic studies of interaction and dynamics in the naphthalene: perfluorobiphenyl crystalline complex, R.R. McCaffrey and P.N. Prasad 63 (1981) 13
The infrared, Raman, resonance Raman spectra and the valence force field of the ZrS_3 layertype compound, C. Sourisseau and Y. Mathey 63 (1981) 143
Far-infrared and Raman spectra of mixed HCl–DCl crystals, J.-C. Bureau and L.-C. Brunel 63 (1981) 293
Charge-transfer excitons in anthracene crystals. A theoretical investigation of their optical absorption and thermal dissociation, P.J. Bounds, P. Petelenz and W. Siebrand 63 (1981) 303
The two-photon fluorescence excitation spectrum of dibenzothiophene, E. Castellucci, P. Foggi and P.R. Salvi 63 (1981) 437

Nonlinear polariton effects in the phenanthrene crystal, C.K. Johnson and G.J. Small 64 (1982) 83
Intermolecular potential functions and the properties of water, J.R. Reimers, R.O. Watts and M.L. Klein 64 (1982) 95
EXAFS structural parameters for some titanium halides, G. Vlaic, J.C.J. Bart, W. Cavigiolo, S. Mobilio and G. Navarra 64 (1982) 115
Consistent force field model treatment of the normal coordinate problem of matrix isolated molecules, R. Gunde, P. Felder and Hs. H. Günthard 64 (1982) 313
Ab initio studies on hydrogen bonded chains. II. Equilibrium geometry and vibrational spectra of the bent chain of hydrogen fluoride molecules, A. Beyer and A. Karpfen 64 (1982) 343
Spectra of direct excitation of phosphorescence in an isotopic mixed naphthalene crystal. High resolution excitation of the two Davydov components of the N-d_8 host crystal, Ph. Pee, J.P. Lemaistre, F. Dupuy, R. Brown, J. Megel and Ph. Kottis 64 (1982) 389
Vibrational absorption spectrum of solid CO in the first harmonic region. Two-phonon transition, F. Legay and N. Legay-Sommaire 65 (1982) 49
The kinetics of the photochemical hydrogen abstraction in crystals of fluorene doped with acridine, J.P. Colpa and D. Stehlik 65 (1982) 97
Dynamic instabilities in excited molecular crystals. Packing calculations in anthracenic systems, D.P. Craig and C.P. Mallett 65 (1982) 129
Electronic transitions of vanadyl phthalocyanine in solution and in the solid state, T.-H. Huang and J.H. Sharp 65 (1982) 205
Optical transitions, XPS, and electronic states in $NiPS_3$, M. Piacentini, F.S. Khumalo, C.G. Olson, J.W. Anderegg and D.W. Lynch 65 (1982) 289
Temperature and deuterium effects on the phosphorescence lifetimes of dimethylbenzaldehydes in durene single crystals, A. Despres, V. Lejeune and E. Migirdicyan 66 (1982) 57
Enhancement of low-temperature chemical reactions in phase transitions, Yu. I. Dakhnovskii, A.A. Ovchinnikov and V.A. Benderskii 66 (1982) 93
Two-photon excitation spectra of the lowest electronic states of 2,2′-bipyridine, E. Castellucci, P.R. Salvi and P. Foggi 66 (1982) 281
Temperature dependence of single crystal Raman spectra of the complex (perylene)$_3$TCNQ, A.D. Bandrauk, K.D. Truong and C. Carlone 66 (1982) 293
Structure and properties of cation-radical salts of arenes. II. Crystal structure, phase transitions and analysis of the electrochemical crystallization process of fluoranthenyl cation-radical salts, V. Enkelmann, B.S. Morra, Ch. Kröhnke, G. Wegner and J. Heinze 66 (1982) 303
Analysis of the infrared emission and absorption spectra from isotopic CO molecules in solid α-CO, N. Legay-Sommaire and F. Legay 66 (1982) 315
The electronic spectra of 10, 10-dimethylanthracene-9-one crystals: spin-orbit/vibronic coupling in $^3n\pi^*$ states, S.R. Wilson and R. Bramley 67 (1982) 119
Study of the electronic structure of first and second row transition metal sulfides using SCF-SW-Xα cluster calculations, S. Harris 67 (1982) 229
Low temperature chemical reactions. I. Models, V.A. Benderskii, P.G. Philippov, Yu.I. Dakhnovskii and A.A. Ovchinnikov 67 (1982) 301
Motion of polymer chains in a molecular crystal, M.V. Basilevsky and S.I. Petrochenko 67 (1982) 319
Xanthone. I. Optical detection of an extremely large sublevel splitting in the lowest triplet state, H.J. Griesser and R. Bramley 67 (1982) 361
Xanthone. II. Vibronic coupling analysis from high resolution phosphorescence spectra, H.J. Griesser and R. Bramley 67 (1982) 373
Sorption energy of helium in solid rare gases and SF_6, H. Abe 68 (1982) 89
A study of magnetic field effects upon triplet–triplet absorptions, D.J. Graham 68 (1982) 119

Slip planes crystal growth and the photodimerisation of anthracene, G.M. Crisp and S.H. Walmsley 68 (1982) 213
Line broadening by diagonal disorder in the vibrational transition of CO in solid α-CO, F. Legay, N. Legay-Sommaire and G. Zumofen 68 (1982) 437
An error analysis for Hartree–Fock crystal orbital calculations, S. Suhai, P.S. Bagus and J. Ladik 68 (1982) 467
The magnetic circular dichroism of $KBr:Sn^{2+}$, A. Scacco, P.W.M. Jacobs and M.J. Stillman 68 (1982) 473
Theory of tunnel transitions of atoms in solids, L.I. Trakhtenberg, V.L. Klochikhin and S.Ya. Pshezhetsky 69 (1982) 121
Overtone spectra of crystalline $CaWO_4$: vibrational exciton density-of-states functions, S.D. Colson and K.N. Wong 69 (1982) 223
Investigation of the Stark effect on the lowest triplet states of 1-indanone single crystals, J.S. Patel and D.M. Hanson 69 (1982) 249
High-resolution diode laser spectroscopy of CO in solid N_2: effect of dipolar broadening on vibrational transitions, H. Dubost, R. Charneau and M. Harig 69 (1982) 389
ENDOR of quintet-state bicarbenes in diacetylene single crystals, W. Hartl and M. Schwoerer 69 (1982) 443
Absorption spectra of Na and Na_2 in inert-gas matrices, J. Hormes and B. Karrasch 70 (1982) 29
Raman excitation profiles for some A_g modes of biphenyl in the pre-resonance region, A. Bree, R. Zwarich and C. Taliani 70 (1982) 257

Glasses and liquid crystals
Analysis of kinetic models for the tunnel electron transfer reactions. Reaction kinetics for various radial and angular dependences of the tunneling probability, A.B. Doktorov, R.F. Khairutdinov and K.I. Zamaraev 61 (1981) 351
Unsteady kinetics of transport-controlled reactions between strongly interacting particles, A.A. Ovchinnikov and S.F. Burlatsky 63 (1981) 67
An EPR determination of the helix pitch and relative handedness of some induced cholesteric mesophases, G. Gottarelli, G.F. Pedulli and C. Zannoni 64 (1982) 143
Order parameters in hydrocarbon chains, O. Edholm 65 (1982) 259
A theory of fluorescence depolarization in macroscopically ordered membrane systems, B.W. van der Meer, R.P.H. Kooyman and Y.K. Levine 66 (1982) 39
Photochemical formation of complexed HNO in low temperature matrices, R.P. Müller, S. Murata and J.R. Huber 66 (1982) 237
Sharp line vibronic spectra of chlorophyll and its derivatives in solid solutions, K.K. Rebane and R.A. Avarmaa 68 (1982) 191
ESR studies of non-silicate inorganic glasses through their glass transformation ranges, R. Parthasarathy, K.J. Rao and C.N.R. Rao 68 (1982) 393
The influence of electrostatic interactions on Franck–Condon factors in electron transfer processes, J.W. van Leeuwen and Y.K. Levine 69 (1982) 89
Observation of the inverse isotope effect in a tunnel electron transfer, A.I. Fiksel, V.N. Parmon and K.I. Zamaraev 69 (1982) 135
Energy-dependent incoherent singlet exciton motion in an amorphous organic solid (polyvinyl-carbazole), K.-D. Rockwitz and H. Bässler 70 (1982) 307

Metals
Surface plasmon absorption of various colloidal metal particles, H. Abe, K.-P. Charlé, B. Tesche and W. Schulze 68 (1982) 137

Semiconductors
The infrared, Raman, resonance Raman spectra and the valence force field of the ZrS_3 layer-type compound, C. Sourisseau and Y. Mathey 63 (1981) 143
X-ray photoelectron spectroscopic study of tetraphenyldithiapyranylidene and its polyiodides, J.-P. Boutique, J. Riga, J.J. Verbist, H. Strzelecka and J. Rivory 67 (1982) 355

Surfaces
Gas/gas and gas/wall energy transfer functions in the multichannel thermal decomposition of chloroethane-2-d_1, K.D. King, T.T. Nguyen and T.G. Gilbert 61 (1981) 221
Energetics and mechanism for hydroxyl radical production from the Pt-catalyzed decomposition of water, L.D. Talley and M.C. Lin 61 (1980) 249
EHMO study of hydrogen adsorption on Pt clusters, J. Andzelm and E. Radzio-Andzelm 61 (1981) 317
Trends in chemisorption energies with atomic number, F. Flores, I. Gabbay and N.H. March 63 (1981) 391
A quasi-hard wall model for the scattering of atomic beams from solid surfaces, T. Maniv 65 (1982) 177
SCF-Xα scattered wave model cluster calculations for the adsorption system CO/Ni and N_2/Ni, A. Schichl, D. Menzel and N. Rösch 65 (1982) 225
Production of the NH radical from the catalytic decomposition of NH_3 on polycrystalline Pt and Fe surfaces at high temperatures, G.S. Selwyn and M.C. Lin 67 (1982) 213
On a semiclassical approach to energy transfer by atom/molecule-surface collisions, G.D. Billing 70 (1982) 223

Dielectrics
Internal rotation of para-substituted phenols. A low temperature dielectric relaxation study, J. le G. Gilchrist 61 (1981) 443
The magnetic field dependence of the dielectric constant of liquids, T.M. Plantenga, J. Bulthuis, J.P. van Dieren, W. Mels and C. MacLean 62 (1981) 207
Temperature dependence and anisotropy of the hole drift mobility in dibenzothiophene, A. Cehak and Z. Zboiński 62 (1981) 333
The determination of the complex refractive indices of some concentrated aqueous salt solutions at submillimetre wavelengths, M. Bennouna, H. Cachet, J.C. Lestrade and J.R. Birch 62 (1981) 439
Dielectric relaxation of amines by inversion and internal rotation, J. Gilchrist 65 (1982) 1
The influence of electrostatic interactions on Franck–Condon factors in electron transfer processes, J.W. van Leeuwen and Y.K. Levine 69 (1982) 89
Low-temperature dielectric losses of hydrocarbon media containing polar additives, J. le G. Gilchrist 70 (1982) 353

Plasmas
The Coulomb condensate of the nonlinear Poisson–Boltzmann equation: a unified theory, M.A. Lampert 65 (1982) 143
Non-equilibrium dissociation and ionization of nitrogen in electrical discharges: the role of electronic collisions from vibrationally excited molecules, M. Cacciatore, M. Capitelli and C. Gorse 66 (1982) 141

Microscopic systems

Atoms
Active nitrogen luminescence studies at liquid helium temperatures, E.B. Gordon, A.A. Pelmenev, O.F. Pugachev and V.V. Khmelenko 61 (1981) 35
Rate coefficients for the combination of metastable and ground state mercury atoms into excited dimer states, A.B. Callear, C.P. Devonport and D.R. Kendall 61 (1981) 65

EHMO study of hydrogen adsorption on Pt clusters, J. Andzelm and E. Radzio-Andzelm 61 (1981) 317
Intramolecular electron localization and local-density calculations on silicon-containing molecules: tetramethylsilane and hexamethyldisilene, Z. Berkovitch-Yellin, D.E. Ellis and M.A. Ratner 62 (1981) 21
Decay kinetics of Kr^+ levels populated by ArF laser radiation, D.J. Wren and D.W. Setser 62 (1981) 43
Van der Waals forces, scattering functions and charge density susceptibility. II. Application to the He–He interaction potential, P. Malinowski, A.C. Tanner, K.F. Lee and B. Linder 62 (1981) 423
De-excitation rate constants of Ne($^3P_2$, $^3P_1$ and $^3P_0$) by atoms and molecules as studied by the pulse radiolysis method, A. Yokoyama and Y. Hatano 63 (1981) 59
Absorption spectrum of bismuth in the vacuum ultraviolet. Observation of new transitions to Rydberg states, N. Damany, J. Figuet and A. Topouzkhanian 63 (1981) 157
Internally folded intensities, A.J. Thakkar, A.M. Simas and V.H. Smith Jr. 63 (1981) 175
Time resolved vibrational chemiluminescence: rate constants for the reactions F + HBr, HI → HF + Br, I and for the relaxation of HF($v = 4$) and HF($v = 6$) by HBr, HI, CO_2, N_2O, CO, N_2 and O_2, I.W.M. Smith and D.J. Wrighley 63 (1981) 321
Collisional ionization of highly excited neon atoms by nonpolar hydrocarbons, M. Uematsu, H. Hiraishi, T. Fukuyama, T. Kondow and K. Kuchitsu 64 (1982) 381
Initial vibrational distribution and relaxation of $^3CF_2$ produced in the reaction of oxygen atoms with tetrafluoroethylene, S. Koda 66 (1982) 383
Cubic spline method for solving second-order differential equations: theory and application to the Thomas–Fermi model for ions, S. Raynor 66 (1982) 409
Sorption energy of helium in solid rare gases and SF_6, H. Abe 68 (1982) 89
Differential cross sections for elastic scattering and electron detachment in collisions of halogen anions with noble gas atoms, C. de Vreugd, R.W. Wijnaendts van Resandt, J.B. Delos and J. Los 68 (1982) 261
Energy distributions of electrons detached in Cl^- + noble gas atom collisions, C. de Vreugd, R.W. Wijnaendts van Resandt, J.B. Delos and J. Los 68 (1982) 275
Charge transfer between helium ions and metastable helium, R.H. Neynaber and S.Y. Tang 69 (1982) 213
Resonances in photoionization cross sections. A comparison of pseudo-bound-state methods, C.E. Woodward, S. Nordholm and C. Bacskay 69 (1982) 267
Determination of the rate constant of reaction of N($^4S_{3/2}$) with NO_2 using resonance fluorescence in a discharge flow system, M.A.A. Clyne and Y. Ono 69 (1982) 381
Absorption spectra of Na and Na_2 in inert-gas matrices, J. Hormes and B. Karrasch 70 (1982) 29
Vacuum UV photolysis of CO_2. Rare-gas oxide formation in matrices, J. Fournier, H.H. Mohammed, J. Deson and D. Maillard 70 (1982) 39
Simulation of Doppler profiles of atomic radiation excited by molecular dissociation. The effect of population of magnetic sublevels, N. Kouchi, K. Ito, Y. Hatano and N. Oda 70 (1982) 105

Molecules

Picosecond fluorescence depolarisation measured by frequency conversion, G.S. Beddard, T. Doust and G. Porter 61 (1981) 17
Active nitrogen luminescence studies at liquid helium temperature, E.B. Gordon, A.A. Pelmenev, O.F. Pugachev and V.V. Khmelenko 61 (1980) 35
Theoretical evaluation of the vibronic intensity distribution in the phosphorescence of benzene, G. Marconi, G. Orlandi, P. Palmieri and J. Vrbancich 61 (1981) 43

Inelastic neutron scattering studies of coordinate acetylene: the complex $Co_2(CO)_6 \cdot C_2H_2$, J. Howard, K. Robson and T.C. Waddington 61 (1981) 53
Activation threshold for vibrational excitation in $K-N_2$ collisions, U. Ross, W. Schepper and D. Beck 61 (1981) 95
The sum rule, an assignment tool? D.M. de Leeuw and C.A. de Lange 61 (1981) 109
Photofragmentation of triatomic molecules. Theory of angular and state distribution of product fragments, G.G. Balini-Kurti and M. Shapiro 61 (1981) 137
The rotating rod model: opacity, excitation, deflection and angular distribution functions from collinear reaction probabilities, N. Agmon 61 (1981) 189
A calculation of the temperature dependent radiationless decay of the propynal triplet state T_1, P. Russegger and J.R. Huber 61 (1981) 205
The predissociation of molecular oxygen cations $O_2^+(\tilde{B}\ ^2\Sigma_g^-)$, R. Bombach, A. Schmelzer and J.-P. Stadelmann 61 (1981) 214
Proton–deuterium polarization transfer in magic angle spinning polycrystalline solids in the rotating frame, L. Müller 61 (1981) 235
Viscosity dependent radiationless relaxation rate of cyanine dyes. A picosecond laser spectroscopy study, V. Sundström and T. Gillbro 61 (1981) 257
About the concentration dependence of the anisotropy in the magnetic susceptibility of some aromatic compounds in the liquid phase, studied by NMR, T.M. Plantenga, H. Bulsink, C. McLean and J.A.B. Lohman 61 (1981) 271
The electronic spectrum of hydrogen fluoride (7–46 eV), A.P. Hitchcock and C.E. Brion 61 (1981) 281
Perturbation theory of the electron correlation effects for atomic and molecular properties. III. Fourth-order corrections to molecular dipole moments and polarizabilities, G.H.F. Diercksen and A.J. Sadlej 61 (1981) 293
Periodic orbits, adiabaticity and stability, E. Pollak 61 (1981) 305
EHMO study of hydrogen adsorption on Pt clusters, J. Andzelm and E. Radzio-Andzelm 61 (1981) 317
A quadratically convergent Hartree–Fock (QS-SCF) method. Application to closed shell systems, G.B. Bacskay 61 (1981) 385
Semiclassical calculation of energy transfer in polyatomic molecules, VI. On the theory for linear triatomic molecules, G.D. Billing 61 (1981) 415
Semi-empirical calculation on core ionizations and simultaneous excitations by the use of the π-electron and equivalent core approximations. The theoretical foundations of the method and the application to some π-conjugated molecules. N. Kosugi and H. Kuroda 61 (1981) 431
Internal rotation of para-substituted phenols. A low temperature dielectric relaxation study, J. le G. Gilchrist 61 (1981) 443
Importance of correlation energy in collision dynamics: quasiclassical trajectory study of collinear $He + H_2^+(v') \rightarrow HeH^+ + H$ using HF and CI potential-energy surfaces, N. Sathyamurthy 62 (1981) 1
Intramolecular electron localization and local-density calculations on silicon-containing molecules: tetramethylsilane and hexamethyldisilane, Z. Berkovitch-Yellin, D.E. Ellis and M.A. Ratner 62 (1981) 21
Trajectory studies of collinear collision between a particle and a non-linear oscillator in a laser field, D.W. Noid and W.-K. Liu 62 (1981) 37
A theoretical study of depolarized Rayleigh spectral linewidths in gases, A.F. Turfa and H.F.P. Knaap 62 (1981) 57
Double-resonance and relaxation in a three-level system, C. Feuillade and C. Bottcher 62 (1981) 67
Factors affecting anisotropic reorientation in a series of aromatic molecules dissolved in carbon disulfide, H. Nery, D. Canet and J.L. Rivail 62 (1981) 123

Fourth and sixth spectral moments in far infrared spectroscopy, M.W. Evans 62 (1981) 179
CNDO-calculation of second order vibronic coupling in the $^1B_{2u} - {}^1A_{1g}$ transition of benzene, G. Fischer, J.R. Reimers and I.G. Ross 62 (1981) 187
Pressure and temperature dependence of the proton and deuteron spin-lattice relaxation times in liquid H_2S and D_2S, J. Hauer, E.W. Lang and H.-D. Lüdemann 62 (1981) 195
The magnetic field dependence of the dielectric constant of liquids, T.M. Plantenga, J. Bulthuis, J.P. van Dieren, W. Mels and C. MacLean 62 (1981) 207
Molecular beam diagnostics by Raman scattering, G. Luijks, S. Stolte and J. Reuss 62 (1981) 217
Theory of ultrasonic absorption in anharmonic molecular crystals, R.G. Della Valle, P.F. Fracassi and S.H. Walmsley 62 (1981) 231
Comment on "V–V transfer rates for high-lying states of CO". I, Ph. Bréchignac 62 (1981) 239
A further analysis of V–V transfer rates for high-lying states of CO, A.E. DePristo and H. Rabitz 62 (1981) 243
Comment on "V–V transfer rates for high-lying states of CO". II, Ph. Bréchignac 62 (1981) 248
IR and Raman study of rotational relaxation of furan and thiophene. I. Bandwidths. Comparison of the rotations about the principal axes of inertia, J.P. Pinan-Lucarre, J. Loisel and J. Vincent-Geisse 62 (1981) 251
IR and Raman study of rotational relaxation of furan and thiophene. II. Correlation functions. Interpretation according to models, J.P. Pinan-Lucarre and T. Nguyen-Tan 62 (1981) 265
Vibrational spectra and dynamics of conformation and hydrogen bonding of N-methylacetamide. II. Dynamics of the NH... O hydrogen bond and NH (ND) stretching band structure, F. Fillaux 62 (1981) 287
An ab initio study of the influence of substituents and intramolecular hydrogen bonding on the carbonyl bond length, and the harmonic and anharmonic stretching force constants. I. Monosubstituted carbonyl compounds, C.W. Bock, M. Trachtman and P. George 62 (1981) 303
Force constants of trans and cis N-methylformamide from ab initio SCF MO calculations, Y. Sugawara, A.Y. Hirakawa, M. Tsuboi, S. Kato and K. Morokuma 62 (1981) 339
A non-empirical LCAO MO SCF investigation of the ground and core ionized states of tetrahedrane and cyclobutadiene, D.T. Clark and A. Harrison 62 (1981) 353
Two-photon sequential absorption spectroscopy of iodine monobromide in the 5 eV region, G.W. King, I.M. Littlewood and J.R. Robins 62 (1981) 359
Momentum distributions and binding energies for the valence orbitals of methanol, A. Minchinton, C.E. Brion and E. Weigold 62 (1981) 369
Concentration and temperature dependence of electronic and vibrational energy relaxation of O_2 in liquid mixtures, B. Faltermeier, R.Protz and M. Maier 62 (1981) 377
Vibrational energy transfer and relaxation processes in CH_3Br. A detailed kinetic analysis of the lower vibrational levels, A.J. Ouderkirk, V.A. Apkarian and E. Weitz 62 (1981) 387
Strong collision rate coefficients in unimolecular reaction rate theory, S. Nordholm and H.W. Schranz 62 (1981) 459
The shifted scheme in the general-model-space diagrammatic perturbation theory, G. Hose and U. Kaldor 62 (1981) 469
Itinerant oscillation with a cosine potential, M. Ferrario, M.W. Evans and W.T. Coffey 62 (1981) 481
Momentum distributions and ionization potentials for the valence orbitals of benzene, I. Fuss, I.E. McCarthy, A. Minchinton, E. Weigold and F.P. Larkins 63 (1981) 19
The photophysics of tertiary aliphatic amines, C.G. Cureton, K. Hara, D.V. O'Connor and D. Phillips 63 (1981) 31

The temperature dependence of positron lifetimes in solid pivalic acid, M. Eldrup, D. Lightbody and J.N. Sherwood 63 (1981) 51
Ab initio evaluation of the five-photon ionization cross sections of nitric oxide, P. Cremaschi 63 (1981) 85
Investigation of T_1- and T_2-relaxation under the influence of a pump radiation, W. Schrepp and H. Mäder 63 (1981) 113
Absorption spectrum of bismuth in the vacuum ultraviolet. Observation of new transitions to Rydberg states, N. Damany, J. Figuet and A. Topouzkhanian 63 (1981) 157
Rydberg states and the observed spectrum of ArH, M. Berman, U. Kaldor, J. Shmulovich and S. Yatsiv 63 (1981) 165
Concentration dependence of the vibrational energy relaxation of O_2 in liquid mixtures, E.W. Knapp and S.F. Fischer 63 (1981) 203
Concentration quenching of pyrene $^1B_{1u}$ in the vapour phase, A. Davis, M.J. Pilling and M.J. Westby 63 (1981) 209
Photodissociation of vibrationally excited CH_3Br, P.F. Zittel and D.D. Little 63 (1981) 227
The Monte Carlo simulation of energy transfer processes in thermal unimolecular reactions. III. The simulation of pressure dependent behaviour, P.V. Sellers and A.J. Stace 63 (1981) 237
Measurements of the hyperfine dimer spectrum for H_2–Ne, H_2–Ar, H_2–Kr by the magnetic beam resonance technique, M. Waaijer and J. Reuss 63 (1981) 263
A high energy classical trajectory study of the reactions $O(^3P) + H_2 \rightarrow OH + H$ and $O(^3P) + H_2 \rightarrow O + H + H$, Z.B. Alfassi and M. Baer 63 (1981) 275
Time resolved vibrational chemiluminescence: rate constants for the reactions F + HBr, HI → HF + Br, I and for the relaxation of HF($v = 4$) and HF($v = 6$) by HBr, HI, CO_2, N_2O, CO, N_2 and O_2, I.W.M. Smith and D.J. Wrighley 63 (1981) 321
Intramolecular reorientations and the effects of thermal history and hydrogen bonding in four closely related organic molecular solids, M. Aronson, P. Beckmann, B. Ross and S.L. Tan 63 (1981) 349
Methyl and tertiarybutyl reorientation in molecular solids, P. Beckmann 63 (1981) 359
Solvent effect on optical activity in dilute solutions, S. Woźniak and B. Linder 63 (1981) 377
Strict Lindemann behaviour because of an activation bottleneck, S.R. Vatsya and H.O. Pritchard 63 (1981) 383
Trends in chemisorption energies with atomic number, F. Flores, I. Gabbay and N.H. March 63 (1981) 391
Ion transport in polar gases, K. Sakimoto 63 (1981) 419
Molecular polarization and laser photopredissociation in the presence of a magnetic field, M. Broyer, M. Larzilliere, M. Carre, M.L. Gaillard, M. Velghe and J.B. Ozenne 63 (1981) 445
On the vibrational structure of methyl iodide. I. Cubic and quartic normal mode coupling constants, R. Zygan-Maus and S.F. Fischer 63 (1981) 475
On the vibrational structure of methyl iodide. II. Relaxation pathways in the 3000 cm^{-1} energy regime, R. Zygan-Maus and S.F. Fischer 63 (1981) 485
Vibrational and translational enhancement of endothermic reactions: K + HCl($v = 0,1$) and K + HF($v = 0,1$), F. Heismann and H.J. Loesch 64 (1982) 43
Excited state properties from the equations of motion method. Application of the MCTDHF–MCRPA to the dipole moments and oscillator strengths of the $A^1\Pi$, $a^3\Pi$, $a'^3\Sigma^+$, and $d^3\Delta$ low-lying valence states of CO, D. Lynch, M.F. Herman and D.L. Yeager 64 (1982) 69
Stochastic theory for molecular collisions in the perturbed stationary state formulation, G. Jolicard and G.D. Billing 64 (1982) 123

Theoretical fundamentals of high resolution Auger electron spectroscopy, A.V. Kondratenko and L.N. Mazalov 64 (1982) 139
Hydrogen bonding in potassium hydrogen maleate and some simple derivatives studied by inelastic neutron scattering spectroscopy, J. Tomkinson, I.J. Braid, J. Howard and T.C. Waddington 64 (1982) 151
Symmetry breaking and ionization from symmetry equivalent inner shells and lone pairs in Xα theory, L. Noodleman, D. Post and E.J. Baerends 64 (1982) 159
Laser-induced fluorescence of the $\tilde{R}^{es}B_2$ state of CS_2 excited at 3547 Å, R. Vasudev 64 (1982) 167
Picosecond observation of fluorescence from B_u states of diphenylpolyenes, T.C. Felder, K.-J. Choi and M.R. Topp 64 (1982) 175
Inelastic neutron scattering spectra of alkali metal (Na, K) bifluorides: the harmonic overtone of υ_3, T.C. Waddington, J. Howard, K.P. Brierley and J. Tomkinson 64 (1982) 193
Classical dynamics of multiphoton dissociation for a model system, D.L. Martin and R.E. Wyatt 64 (1982) 203
Master equation approach to vibrational energy transfer between two diatomic molecules, A.J. Makowski and T. Orlikowski 64 (1982) 231
Donor fluorescence decay in solid solution, R. Twardowski, J. Kuśba and C. Bojarski 64 (1982) 239
Configuration interaction calculations of satellite structure in photoelectron spectra of H_2O, R. Arneberg, J. Müller and R. Manne 64 (1982) 249
Molecular orbital momentum distributions and binding energies for nitric oxide, C.E. Brion, J.P.D. Cook, I.G. Fuss and E. Weigold 64 (1982) 287
The CO–He system revisited: V–T collisional relaxation from ab initio potentials, F.A. Gianturco, U.T. Lamanna and G. Petrella 64 (1982) 299
Dynamic polarizabilities and Raman intensities of CO, N_2, HCl and Cl_2, J. Oddershede and E.N. Svendsen 64 (1982) 359
Collisional ionization of highly excited neon atoms by nonpolar hydrocarbons, M. Uematsu, H. Hiraishi, T. Fukuyama, T. Kondow and K. Kuchitsu 64 (1982) 381
Geometry optimization in ab initio SCF calculations. VII. Proton affinities and ion structures calculated with floating orbital geometry optimization (FOGO), H. Huber and J. Vogt 64 (1982) 399
Vibrational excitation of SF_6 in collisions with He atoms, D.C. Clary 64 (1982) 413
Sum rules for molecular electronic spectra: application to exact and reflection principle solutions, S.M. Adler-Golden 64 (1982) 421
Distribution and conjugation of the π-electrons in the T_1 state of the some BNC-heterocycles, F.W. Deeg, Chr. Bräuchle and J. Voitländer 64 (1982) 427
Dielectric relaxation of amines by inversion and internal rotation, J. Gilchrist 65 (1982) 1
The reaction $X + Cl_2 \rightarrow XCl + Cl$(X = Mu, H, D). II. Comparison of experimental data with theoretical results derived from a new potential energy surface, J.N.L. Connor, W. Jakubetz, A. Laganà, J. Manz and J.C. Whitehead 65 (1982) 29
Vibrational absorption spectrum of solid CO in the first harmonic region. Two-phonon transition, F. Legay and N. Legay-Sommaire 65 (1982) 49
The kinetics of the photochemical hydrogen abstraction in crystals of fluorene doped with acridine, J.P. Colpa and D. Stehlik 65 (1982) 97
Theoretical models for activation of CO_2 towards hydration ($CO_2 + H_2O \rightarrow H_2CO_3$) by cationic binding sites, Y. Jean and F. Volatron 65 (1982) 107
Hole-mixing effects in the ionization of some unsaturated oxo-compounds, W. von Niessen, G. Bieri, J. Schirmer and L.S. Cederbaum 65 (1982) 157

An approach to the estimation of polyatomic vibrational radiative relaxation rates, E. Herbst 65 (1982) 185
Dynamics of CO formation in the photodissociation of HNCO and CH_2CO at 193 nm, G.T. Fujimoto, M.E. Umstead and M.C. Lin 65 (1982) 197
Ab initio computation of vibrational relaxation rate coefficients for the collisions of CO_2 with helium and neon atoms, D.C. Clary 65 (1982) 247
Brillouin scattering in liquid mixtures: $CCl_4/CHCl_3$, D. Samios, Th. Dorfmüller and A. Asenbaum 65 (1982) 305
Comparison of quantum mechanical and semiclassical (classical path) probabilities for vibrational transitions in diatom–diatom collisions, G.D. Billing and G. Jolicard 65 (1982) 323
Depolarization dispersion curves of resonance Raman fundamentals of methalloporphyrins and metallophthalocyanines subject to asymmetric perturbations, M.Z. Zgierski and M. Pawlikowski 65 (1982) 335
Influence of inhomogeneous broadening on resonance Raman characteristics of metalloporphyrins and metallophthalocyanines, M.Z. Zgierski 65 (1982) 369
A quadratically convergent Hartree–Fock (QC-SCF) method. Application to open shell orbital optimization and coupled perturbed Hartree-Fock calculations, G.B. Bacskay 65 (1982) 383
Dissociative excitation of water by metastable argon, H.L. Snyder, B.T. Smith, T.P. Parr and R.M. Martin 65 (1982) 397
Configuration interaction and perturbation study of the electron correlation contribution to the dipole polarizability of beryllium, G.H.F. Diercksen and A.J. Sadlej 65 (1982) 407
Lifetimes and transition moment of the A–X band system of Bi_2, G. Ehret and G. Gerber 66 (1982) 27
Molecular beam chemiluminescence: excitation functions for reactions of barium atoms with NO_2-monomers and $(NO_2)_n$-clusters, D.J. Wren and M. Menzinger 66 (1982) 85
Sensitized dissociation of UF_6, $XeOF_4$ and SF_5Cl by SF_6 excited with a pulsed CO_2 laser, C. Angelie, M. Cauchetier and J. Paris 66 (1982) 129
Non-equilibrium dissociation and ionization of nitrogen in electrical discharges: the role of electronic collisions from vibrationally excited molecules, M. Cacciatore, M. Capitelli and G. Gorse 66 (1982) 141
The factorization method for the treatment of local mode vibrations in polyatomic molecules: structural features of XH stretching overtone bands, M.A. Mohammadi 66 (1982) 153
Optical–optical double resonance spectra of CH_3F and CD_3F using isotopic CO_2 lasers, G. Duxbury and H. Kato 66 (1982) 161
A simple method for the evaluation of the second-order perturbation energy from external double-excitations with a CASSCF reference wavefunction, B.O. Roos, P. Linse, P.E.M. Siegbahn and M.R.A. Blomberg 66 (1982) 197
Non-adiabatic interactions in the symmetric ring opening process of dioxirane, R. Cimiraglia, T.-K. Ha, R. Meyer and Hs.H. Günthard 66 (1982) 209
Photofragment spectroscopy of ICN at 266.0 nm and 299.4 nm: vibrational and rotational distributions of $CN(X^2\Sigma^+)$, A.P. Baronavski 66 (1982) 217
Photochemical formation of complexed HNO in low temperature matrices, R.P. Müller, S. Murata and J.R. Huber 66 (1982) 237
Electron impact dissociation of molecular hydrogen and deuterium: translational energy distribution of atomic hydrogen and deuterium ($n = 3, 4, 5$), M. Higo, S. Kamata and T. Ogawa 66 (1982) 243
Clarification of the assignment of the electronic spectrum of hydrogen chloride based on ab initio CI calculations, M. Bettendorff, S.D. Peyerimhoff and R.J. Buenker 66 (1982) 261

Analysis of the infrared emission and absorption spectra from isotopic CO molecules in solid α-CO, N. Legay-Sommaire and F. Legay 66 (1982) 315
Energy selection experiments in glassy matrices: the fluorescence spectrum of a synthetic isobacteriochlorin, F.A. Burkhalter and U.P. Wild 66 (1982) 327
Influence of solvent viscosity on excited state lifetime and fluorescence quantum yield of dye molecules, B. Wilhelmi 66 (1982) 351
Measurement of vibration–vibration pumped population distribution in nitric oxide, R.C. Bergman, M.J. Williams and J.W. Rich 66 (1982) 357
Laser induced fluorescence spectroscopy of NaLi in beam and bulk, F. Engelke, G. Ennen and K.H. Meiwes 66 (1982) 391
On the validity of the Xα method in the computation of ionization potentials. A comparison of the results for small molecules, G. De Alti, P. Decleva and A. Lisini 66 (1982) 425
Experimental and theoretical studies of the valence-shell dipole excitation spectrum of molecular fluorine, A.P. Hitchcock, C.E. Brion, G.R.J. Williams and P.W. Langhoff 66 (1982) 435
Double ionization of methane, P.E.M. Siegbahn 66 (1982) 443
Effective core potential calculations on the NiH_4^{2-} ion as a test case for studying rotational barriers, O. Gropen, U. Wahlgren and L. Pettersson 66 (1982) 453
Effective core potential calculations on small molecules containing transition metal atoms, O. Gropen, U. Wahlgren and L. Pettersson 66 (1982) 459
Photofragmentation of $SnCl_2$ at 193 nm, N.J.A. van Veen, G.N.A. van Veen, M.S. de Vries and A.F. de Vries 66 (1982) 465
Semiclassical calculation of energy transfer in polyatomic molecules. VII. Intra- and intermolecular energy transfer in $N_2 + CO_2$, G.D. Billing 67 (1982) 35
Study and assignment of ion pair states of the I_2 molecule in the 40000 cm^{-1} region, J. Chevaleyre, J.P. Perrot, J.M. Chastan, S. Valignat and M. Broyer 67 (1982) 59
An approach to laser–molecule dynamics using raising and lowering operators, S. Leasure 67 (1982) 83
Fluorescence polarization anisotropy and kinetics of malachite green measured as a function of solvent viscosity, F. Pellegrino, A. Dagen and R.R. Alfano 67 (1982) 111
Observed adiabatic corrections to the Born–Oppenheimer approximation for diatomic molecules with ten valence electrons, E. Tiemann, H. Arnst, W.U. Stieda, T. Törring and J. Hoeft 67 (1982) 133
The phase modulated semiclassical sudden approximation. Study of the transitions $v = 1$, $j \rightarrow v = 0, j'$ in the $pH_2 + He^4$ system, A. Grosjean and G. Jolicard 67 (1982) 139
Perturbation corrections to Koopmans' theorem. V. A study with large basis sets, D.P. Chong and S.R. Langhoff 67 (1982) 153
Emission cross sections from fragments produced by electron impact on silane, J. Perrin and J.P.M. Schmitt 67 (1982) 167
Dipole oscillator strength distributions, sums, and dispersion energy coefficients for CO and CO_2, B.L. Jhanwar and W.J. Meath 67 (1982) 185
Competitive collisional activation in vibrational energy transfer with cyclopropane-$1t_1$-$2,2d_2$. A three-channel system, V.V. Krongauz and B.S. Rabinovitch 67 (1982) 201
The parameter dependence of calculated Koopmans' defects in the framework of a model hamiltonian verified in the case of transition metal compounds, M.C. Böhm 67 (1982) 255
Translational spectroscopy of electron impact dissociation of molecules isoelectronic with Ne by Doppler profile measurements of Balmer-α emission, N. Kouchi, M. Ohno, K. Ito, N. Oda and Y. Hatano 67 (1982) 287
Xanthone. I. Optical detection of an extremely large sublevel splitting in the lowest triplet state, H.J. Griesser and R. Bramley 67 (1982) 361

Xanthone. II. Vibronic coupling analysis from high resolution phosphorescence spectra, H.J. Griesser and R. Bramley 67 (1982) 373
Focusing, rotational state selection and orientation of CH_3I in a seeded supersonic beam, K.K. Chakravorty, D.H. Parker and R.B. Bernstein 68 (1982) 1
Isotopic field shift in the transition $A\,0^+ - X\,^1\Sigma^+$ of PbS, H. Knöckel and E. Tiemann 68 (1982) 13
Isotopic field shift of the rotational energy of the Pb-chalcogenides and Tl-halides, J. Schlembach and E. Tiemann 68 (1982) 21
An analytical representation of the $H_2 + CO$ potential, L.L. Poulsen 68 (1982) 29
Vibrational frequencies from anharmonic ab initio/empirical potential energy functions. III. Stretching vibrations of hydrogen cyanide and acetylenes, P. Botschwina 68 (1982) 41
Sorption energy of helium in solid rare gases and SF_6, H. Abe 68 (1982) 89
Detailed energy partitioning in the decomposition of chemically energized C_2H_3F, D.J. Donaldson, D.G. Watson and J.J. Sloan 68 (1982) 95
Monte Carlo calculations of classical density of states for non-separable polyatomic potential energy surfaces, S.C. Farantos, J.N. Murrell and J.C. Hajduk 68 (1982) 109
Position dependent deuterium effects on the vapor phase fluorescence lifetimes of tetradeuterophenanthrenes, J.J. O'Brien, M.D. Horne, B.K. Selinger and B.R. Henry 68 (1982) 123
Kinetic observations on the E region states of iodine excited by two-photon spectroscopy, G.W. King, I.M. Littlewood and J.R. Robins 68 (1982) 129
Perturbed rotational state method for collisions between an ion and an asymmetric-top rigid rotor, K. Sakimoto 68 (1982) 155
Dual phosphorescence of halogenated benzenes in rigid-glass solution, T. Takemura, Y. Yamada and H. Baba 68 (1982) 171
Optically resolved zero field splittings in the phosphorescence spectra of aromatic thioketones, M.-R. Taherian and A.H. Maki 68 (1982) 179
Sharp line vibronic spectra of chlorophyll and its derivatives in solid solutions, K.K. Rebane and R.A. Avarmaa 68 (1982) 191
A dissociative electroionization study of nitrous oxide. The NO^+ and N_2^+ dissociation channels, J.L. Olivier, R. Locht and J. Momigny 68 (1982) 201
Differential cross sections for elastic scattering and electron detachment in collisions of halogen anions with noble gas atoms, C. de Vreugd, R.W. Wijnaendts van Resandt, J.B. Delos and J. Los 68 (1982) 261
Energy distributions of electrons detached in Cl^- + noble gas atom collisions, C. de Vreugd, R.W. Wijnaendts van Resandt, J.B. Delos and J. Los 68 (1982) 275
$SO(B\,^3\Sigma^-, A\,^3\Pi - X\,^3\Sigma^-)$ emission from low temperature rare gas–sulfur dioxide afterglows, K.T. Wu, H. Morgner and A.J. Yencha 68 (1982) 285
A shock tube study of vibrational relaxation in pure N_2O, and mixtures of N_2O with argon, helium-4, helium-3, deuterium, hydrogen deuteride, normal and para-hydrogen, C.J.S.M. Simpson, P.D. Gait, T.J. Price and M.G. Foster 68 (1982) 293
Atom–molecule sudden theory of scattering: ab initio corrections and range of validity of the collision model, E. Ficocelli Varracchio and R. Celiberto 68 (1982) 303
The role of memory effects in stochastic approach to collinear diatom–diatom collisions, A.J. Makowski 68 (1982) 317
Thermal dissociation of diatomic molecules with bound electronically excited states, N.M. Kuznetsov and A.M. Samusenko 68 (1982) 359
Dephasing in isolated one-dimensional quantum systems, J. Brickmann and P. Russegger 68 (1982) 369
Calculations of the Auger transition rates in molecules. I. Effect of the nonspherical potential: application to CH_4, M. Higashi, E. Hiroike and T. Nakajima 68 (1982) 377

Effects of unresolved hyperfine structure in the microwave rotational spectra of the $^2\Sigma$-radicals CaBr and CaCl, K. Möller, H.-U. Schütze-Pahlmann, J. Hoeft and T. Törring 68 (1982) 399
Energy dependence of the S_1-decay of propynal and propynal-d_1 and the influence of collisions, U. Brühlmann and J.R. Huber 68 (1982) 405
On the interatomic potentials for noble gas mixtures, K. Watanabe, A.R. Allnatt and W.J. Meath 68 (1982) 423
Line broadening by diagonal disorder in the vibrational transition of CO in solid α-CO, F. Legay, N. Legay-Sommaire and G. Zumofen 68 (1982) 437
CEPA calculations of potential energy surfaces for open-shell systems. II. The reaction of C^+ ions with molecular hydrogen, R. Jacquet and V. Staemmler 68 (1982) 479
Optical activity due to deuterium substitution in adamantanone and adamantanethione. Barrier to inversion in the $^1n\pi^*$ excited state, P.H. Schippers and H.P.J.M. Dekkers 69 (1982) 19
Master equation description of the multiphoton decomposition of ethyl acetate, J.E. Eberhardt, R.B. Knott, A.W. Pryor and R.G. Gilbert 69 (1982) 45
Absolute rate constants for the reactions of $CH(X\,^2\Pi)$ with NO, N_2O, NO_2, and N_2 at room temperature, S.S. Wagal, T. Carrington, S.V. Filseth and C.M. Sadowski 69 (1982) 61
Modeling of the fast photoisomerisation process in polymethine dyes, S.K. Rentsch 69 (1982) 81
Effects of relativity in the He(I) photoelectron spectrum of CI_4, G. Jonkers, C.A. de Lange and J.G. Snijders 69 (1982) 109
He(I) photoelectron spectroscopy of tetraiodoethylene (C_2I_4), G. Jonkers, S.M. van der Kerk, R. Mooyman, C.A. de Lange and J.G. Snijders 69 (1982) 115
Vibronic effects in photolysis of metalloporphyrins and hemoproteins, I.B. Bersuker, S.S. Stavrov and B.G. Vekhter 69 (1982) 165
Semi-empirical potential energy surfaces for the linear HXY (X, Y = F, Cl, Br, I) systems, I. Last 69 (1982) 193
Angular distribution of photopredissociation fragments from CH_3I^+, M. Tadjeddine, G. Bouchoux, L. Malegat, J. Durup, C. Pernot and J. Weiner 69 (1982) 229
Investigation of the Stark effect on the lowest triplet states of 1-indanone single crystals, J.S. Patel and D.M. Hanson 69 (1982) 249
Further development and application of the ECS scaling theory: non-linear molecules, A.M. Richard and A.E. DePristo 69 (1982) 273
MCSCF and multi-reference CI calculations of the potential energy surface for ground state H_2O, W.P. Kraemer, B.O. Roos and P.E.M. Siegbahn 69 (1982) 305
Ab initio calculation of nuclear spin–spin coupling constant of HF and CN^-, M.T. Reyez, E. Neumann, J. Hoarau and F. Achard 69 (1982) 323
Binary (e, 2e) spectroscopy and momentum-space chemistry of CO_2, J.P.D. Cook and C.E. Brion 69 (1982) 339
Dynamic constraints associated with the formation of $SiS(a^3\Sigma^+)$ from the Si–OCS chemiluminescent reaction, J.L. Gole and G.J. Green 69 (1982) 357
Observation of new bands in the N_2 Herman infrared system and kinetic study of its formation in a pulsed-discharge apparatus, I. Nadler, A. Rotem and S. Rosenwaks 69 (1982) 375
Photoelectron angular distribution and assignments of photoelectron spectra of nitrogen dioxide, nitromethane and nitrobenzene, S. Katsumata, H. Shiromaru, K. Mitani, S. Iwata and K. Kimura 69 (1982) 423
On statistics of an ensemble of oscillators under excitation. III. Quantum non-linear oscillators with fast phase relaxation in a non-monochromatic external field, V.N. Sazonov, A.A. Stuchebrukhov and S.V. Zatsepin 69 (1982) 459

Theoretical probabilities of V–V energy transfer: CO with isotopes of N_2 and deactivation of laser-excited SO_2, V. Revelant and C. Manzanares I. 69 (1982) 473
Transition probabilities in electron–nuclear double- and multiple-resonance spectroscopy with non-coherent and coherent radio-frequency fields, A. Schweiger and Hs.H. Günthard 70 (1982) 1
Matrix-isolation spectroscopy of small antimony clusters, H. Sontag and R. Weber 70 (1982) 23
Vacuum UV photolysis of CO_2. Rare-gas oxide formation in matrices, J. Fournier, H.H. Mohammed, J. Deson and D. Maillard 70 (1982) 39
He(I) photoelectron spectroscopy of transient species: germanium dichloride and germanium dibromide, G. Jonkers, S.M. van der Kerk and C.A. de Lange 70 (1982) 69
The challenge of fitting ab initio surfaces. I. Rigid-rotor CO_2–H_2 potential, C.P. Shukla, A.K. Bachhawat and N. Sathyamurthy 70 (1982) 83
Semiclassical analysis of measurements of the total cross section Q and the small-angle differential cross section for CsF–Ar: an accurate method for absolute Q values, J.M. Henrichs, H.C.W. Beijerinck and N.F. Verster 70 (1982) 93
Simulation of Doppler profiles of atomic radiation excited by molecular dissociation. The effect of population of magnetic sublevels, H. Kouchi, H. Ito, Y. Hatano and N. Oda 70 (1982) 105
Theoretical study of the kinetic isotope effect in proton-transfer reactions. Influence of the interaction potential of reactants on the kinetic isotope effect, J. Sühnel and K. Gustav 70 (1982) 109
Classical path calculation of differential cross sections for rotational excitation of CO colliding with D_2 at 87.2 meV, G.D. Billing and L.L. Poulsen 70 (1982) 119
A new INDO-type procedure for conjugated non-rigid molecules. I. Ground-state conformations and barriers to internal rotation. F. Momicchioli, I. Baraldi and M.C. Bruni 70 (1982) 161
Potential surfaces for the Rydberg states of H_3, Ch. Nager and M. Jungen 70 (1982) 189
Medium stabilization of localized Born–Oppenheimer states, M. Bixon 70 (1982) 199
Multiphoton absorption of SF_6: a numerical analysis of the density-matrix approach, M. Dilonardo, G. Petrocelli and M. Capitelli 70 (1982) 247
Raman excitation profiles for some A_g modes of biphenyl in the pre-resonance region, A. Bree, R. Swarich and C. Taliani 70 (1982) 257
Near-infrared-induced conformational isomerization of 2-chloroethanol in an argon matrix, H. Takeuchi and M. Tasumi 70 (1982) 275
Hydrogen-bonded complex between HNO and formaldehyde. Photolysis of methyl nitrite in an argon matrix, R.P. Müller, P. Russegger and J.R. Huber 70 (1982) 281
Electron energy-loss spectroscopy of forbidden transitions to valence and Rydberg states of formaldehyde, S. Taylor, D.G. Wilden and J. Comer 70 (1982) 291
Rotational and hyperfine structure in the $B\,^3\Pi_0$- excited state of ICl, H. Knöckel and E. Tiemann 70 (1982) 345
Low-temperature dielectric losses of hydrocarbon media containing polar additives, J. le G. Gilchrist 70 (1982) 353

Free radicals

Chemiluminescent spectra of $C_2^*(d\,^3\Pi_g - a\,^3\Pi_u)$ and deactivation of the $C_2^*\ d\,^3\Pi_g$ state in Na vapour, Wang X.Y., Li C.X. and Lou N.Q. 61 (1981) 25
Translational energy distribution and production mechanism of excited hydrogen atoms produced in electron–CH_4 collisions, T. Ogawa, J. Kurawaki and M. Higo 61 (1981) 181
$C_2O(\tilde{A}\,^3\Pi_i \leftrightarrow \tilde{X}\,^3\Sigma^-)$: laser induced excitation and fluorescence spectra, V.M. Pitts, V.M. Donnelley, A.P. Baronavski and J.E. McDonald 61 (1981) 451
Excited state dynamics of $C_2O(\tilde{A}\,^3\Pi_i)$, V.M. Pitts, V.M. Donnelley, A.P. Baronavski and J.R. MacDonald 61 (1981) 465

Radiative lifetimes of metastable states of free radicals. I. NF $b^1\Sigma^+$, P.H. Tennyson, A. Fontijn and M.A.A. Clyne 62 (1981) 171
The dynamic of the F/HNCO and F/HNF reactions, J.J. Sloan, D.G. Watson and J.S. Wright 63 (1981) 283
The SrCl(A–X, B–X) bands in thermal and non-thermal reactive excitation using metastable Sr atoms, U. Brinkmann, V.H. Schmidt and H. Telle 64 (1982) 19
Mutual effect of nuclei upon CINDP in high fields. Violation of the Kaptein rules, K.M. Salikhov 64 (1982) 371
Radiative lifetimes of metastable states of free radicals. II. PF $b^1\Sigma^+$ and CO $a\,^3\Pi$, F.R. Burden, M.A.A. Clyne and A. Fontijn 65 (1982) 123
Dynamics of CO formation in the photodissociation of HNCO and CH_2CO at 193 nm, G.T. Fujimoto, M.E. Umstead and M.C. Lin 65 (1982) 197
Building-up principles for diradical states, A. Ceulemans 66 (1982) 169
Initial vibrational distribution and relaxation of $^3CF_2$ produced in the reaction of oxygen atoms with tetrafluoroethylene, S. Koda 66 (1982) 383
A quantum chemical investigation of the ammonium radical. I. SCF-Xα-SW calculations of the electronic structure and Rydberg spectra, E. Broclawik, J. Mrozek and V.H. Smith Jr. 66 (1982) 417
Electron exchange effect on CIDNP formation in electron transfer reactions, A.I. Kruppa, T.V. Leshina, R.Z. Sagdeev, K.M. Salikhov and F.S. Sarvarov 67 (1982) 27
Ab initio calculation of geometries and hfs constants of CH_3, SiH_3, and GeH_3 radicals, K. Ohta, H. Nakatsuji, I. Maeda and T. Yonezawa 67 (1982) 49
Emission cross sections from fragments produced by electron impact on silane, J. Perrin and J.P.M. Schmitt 67 (1982) 167
Production of the NH radical from the catalytic decomposition of NH_3 on polycrystalline Pt and Fe surfaces at high temperatures, G.S. Selwyn and M.C. Lin 67 (1982) 213
Muonium substituted organic free radicals in liquids. Muon–electron hyperfine coupling constants of alkyl and allyl radicals, E. Roduner, W. Strub, P. Burkhard, J. Hochmann, P.W. Percival, H. Fischer, M. Ramos and B.C. Webster 67 (1982) 275
Detailed energy partitioning in the decomposition of chemically energized C_2H_3F, D.J. Donaldson, D.G. Watson and J.J. Sloan 68 (1982) 95
SO($B\,^3\Sigma^-$, $A\,^3\Pi$–$X\,^3\Sigma^-$) emission from low temperature rare gas–sulfur dioxide afterglows, K.T. Wu, H. Morgner and A.J. Yencha 68 (1982) 285
Effects of unresolved hyperfine structure in the microwave rotational spectra of the $^2\Sigma$-radicals CaBr and CaCl, K. Möller, H.-U. Schütze-Pahlmann. J. Hoeft and T. Törring 68 (1982) 399
Temperature dependence of the $C_2(X\,^1\Sigma_g^+)$ reaction with H_2 and CH_4 and $C_2(X\,^1\Sigma_g^+$ and $a\,^3\Pi_u$ equilibrated states) with O_2, W.M. Pitts, L. Pasternack and J.R. McDonald 68 (1982) 417
$\tilde{A} \rightarrow \tilde{X}$ fluorescence spectra of CH_3O and C_2H_5O generated by the ArF laser photolysis of alkyl nitrites, T. Ebata, H. Yanagishita, K. Obi and I. Tanaka 69 (1982) 27
Absolute rate constants for the reactions of CH($X\,^2\Pi$) with NO, N_2O, NO_2, and N_2 at room temperature, S.S. Wagal, T. Carrington, S.V. Filseth and C.M. Sadowski 69 (1982) 61
O_3 photolysis at 248 nm and $O(^1D_2)$ quenching by H_2O, CH_4, H_2 and N_2O: $O(^3P_j)$ yields, P.H. Wine and A.R. Ravishankara 69 (1982) 365
The reaction of F atoms with acetaldehyde and ethylene oxide. Vibrational spectra of the CH_3CO and CH_2CHO free radicals trapped in solid argon, M.E. Jacox 69 (1982) 407
Relaxation of dihaloacetylene cations in their $\tilde{A}$ and $\tilde{B}$ states studied by photoelectron–photon coincidence spectroscopy, J.P. Maier and F. Thommen 70 (1982) 325

Excitons
Charge transfer transitions in solid tetracene and pentacene studied by electroabsorption, L. Sebastian, G. Weiser and H. Bässler 61 (1981) 125
Interactions between Frenkel excitons, I. Formalism and preliminary results, D. Fox 61 (1981) 477
Electroreflectance studies in the excitons in PTS and DCHD single crystals, L. Sebastian and G. Weiser 62 (1981) 447
Spectroscopic studies of interaction and dynamics in the naphthalene: perfluorobiphenyl crystalline complex, R.R. McCaffrey and P.N. Prasad 63 (1981) 13
Charge-transfer excitons in anthracene crystals. A theoretical investigation of their optical absorption and thermal dissociation, P.J. Bounds, P. Petelenz and W. Siebrand 63 (1981) 303
Nonlinear polariton effects in the phenanthrene crystal, C.K. Johnson and G.J. Small 64 (1982) 83
Spectra of direct excitation of phosphorescence in an isotopic mixed naphthalene crystal. High resolution excitation of the two Davydov components of the N-d_g host crystal, Ph. Pee, J.P. Lemaistre, F. Dupuy, R. Brown, J. Megel and Ph. Kottis 64 (1982) 389
Dynamic instabilities in excited molecular crystals. Packing calculations in anthracenic systems, D.P. Graig and C.P. Mallett 65 (1982) 129
Surface plasmon absorption of various colloidal metal particles, H. Abe, K.-P. Charlé, B. Tesche and W. Schulze 68 (1982) 137
Overtone spectra of crystalline $CaWO_4$: vibrational exciton density-of-states functions, S.D. Colson and K.N. Wong 69 (1982) 223
Investigation of the Stark effect on the lowest triplet states of 1-indanone single-crystals, J.S. Patel and D.M. Hanson 69 (1982) 249
Electronic excited state transport and trapping in one- and two-dimensional disordered systems, R.F. Loring and M.D. Fayer 70 (1982) 139
Energy-dependent incoherent singlet exciton motion in an amorphous organic solid (polyvinylcarbazole), K.-D. Rockwitz and H. Bässler 70 (1982) 307

Defects and impurities
Temperature dependence and anisotropy of the hole drift mobility in dibenzothiophene, A. Cehak and Z. Zboiński 62 (1981) 333
The temperature dependence of positron lifetimes in solid pivalic acid, M. Eldrup, D. Lightbody and J.N. Sherwood 63 (1981) 51
Consistent force field model treatment of the normal coordinate problem of matrix isolated molecules, R. Gunde, P. Felder and Hs.H. Günthard 64 (1982) 313
Dynamic instabilities in excited molecular crystals. Packing calculations in anthracenic systems, D.P. Craig and C.P. Mallett 65 (1982) 129
Radiative decay times and kinetic of the luminescence from $KI:Sn^{2+}$, L.S. Dang, P.W.M. Jacobs, K. Schmitt, V.S. Sivasankar and D.J. Simkin 66 (1982) 51
Enhancement of low-temperature chemical reactions in phase transitions, Yu.I. Dakhnovskii, A.A. Ovchinnikov and V.A. Benderskii 66 (1982) 93
Energy selection experiments in glassy matrices: the fluorescence spectrum of a synthetic isobacteriochlorin, F.A. Burkhalter and U.P. Wild 66 (1982) 327
Matrix trapping site for H atoms in solid Ne and Ar, S. Ossicine and F. Forstmann 66 (1982) 333
Low temperature chemical reactions. I. Models, V.A. Benderskii, P.G. Philippov, Yu.I. Dakhnovskii and A.A. Ovchinnikov 67 (1982) 301
Slip planes crystal growth and the photodimerisation of anthracene, G.M. Crisp and S.H. Walmsley 68 (1982) 213
The magnetic circular dichroism of $KBr:Sn^{2+}$, A. Scacco, P.W.M. Jacobs and H.J. Stillman 68 (1982) 473

Theory of tunnel transitions of atoms in solids, L.I. Trakhtenberg, V.L. Klochikhin and S.Ya. Pshezhetsky 69 (1982) 121

Ions and complexes

Multiple-scattering Xα calculations of the electronic structure of $Co(CN)_5OH^{3-}$ and related photochemical properties, A. Goursot and E. Pénigault 61 (1981) 83

Theory of ligand-induced non-radiative relaxation in lanthanide complexes, D.S. Ray and M. Chowdhury 61 (1981) 157

An ICR study of sequential two-photon dissociation of benzene, cyanobenzene and bromobenzenes molecular ions, P.N.T. van Velzen and W.J. van der Hart 61 (1981) 325

Isomerization of molecular ions of alkenes and cycloalkanes studied by photodissociation in an ICR spectrometer, P.N.T. van Velzen and W.J. van der Hart 61 (1981) 335

Photoionization study of the kinetics of unimolecular decomposition of halobenzene ions, S.T. Pratt and W.A. Chupka 62 (1981) 153

Theoretical study on an anomalous isotopic effect on the position and integrated intensity of the IR stretching vibration band for medium-strong and strong hydrogen bonds, Y. Guissani and H. Ratajczak 62 (1981) 319

An LCAO HFS investigation of the electronic structure of cobaltocene, C. Famiglietti and E.J. Baerends 62 (1981) 407

A statistical model for the density dependence of electron attachment to O_2 molecules, D.R.A. McMahon 63 (1981) 95

The dynamics of the F/HNCO and F/HNF reactions, J.J. Sloan, D.G. Watson and J.S. Wright 63 (1981) 283

Molecular polarization and laser photopredissociation in the presence of a magnetic field, M. Broyer, M. Larzilliere, M. Carre, M.L. Gaillard, M. Velghe and J.B. Ozenne 63 (1981) 445

Geometry optimization in ab initio SCF calculations. VII. Proton affinities and ion structures calculated with floating orbital geometry optimization (FOGO), H. Huber and J. Vogt 64 (1982) 399

Applying the polarization model to selected ionic substances, P. Turner, E.E. David and C.W. David 64 (1982) 437

Mechanism of the metastable reaction $H_2S^+ \rightarrow S^+ + H_2$; product energy distributions and their dependence on temperature, M.F. Jarrold, A.J. Illies and M.T. Bowers 65 (1982) 19

High resolution translational energy spectroscopy: electronic transitions in Kr^+, and I^+ and vibronic transitions in N_2^+, A.J. Illies and M.T. Bowers 65 (1982) 281

Models of three and four body electron attachment to O_2 molecules, D.R.A. McMahon 66 (1982) 67

A model for multiphoton ionisation mass spectroscopy with application to benzene, W. Dietz, H.J. Neusser, U. Boesl, E.W. Schlag and S.H. Lin 66 (1982) 105

Structure and properties of cation-radical salts of arenes. II. Crystal structure, phase transitions and analysis of the electrochemical crystallization process of fluoranthenyl cation-radical salts, V. Enkelmann, B.S. Morra, Ch. Kröhnke, G. Wegner and J. Heinze 66 (1982) 303

Influence of resonant charge transfer on ion diffusion and generalized Einstein relations, M. Waldman, E.A. Mason and L.A. Viehland 66 (1982) 339

Dielectric saturation and dielectric friction on an ion in a polar solvent, J.B. Hubbard and R.F. Kayser 66 (1982) 377

Photoelectron–photoion coincidence study of CF_3I. Implications for the cw IR laser multiphoton dissociation of CF_3I^+, R. Bombach, J. Dannacher, J.-P. Stadelmann, J. Vogt, L.R. Thorne and J.L. Beauchamp 66 (1982) 403

The mechanism of NO_3^- formation from gaseous ethyl nitrate, S. Włodek, Z. Łuczyński and H. Wincel 67 (1982) 221
Semiclassical model of a trinuclear mixed valence system, J.P. Launay and F. Barbonneau 67 (1982) 295
Laser induced fluorescence study of thermal energy charge transfer reactions from $Ar^+(^2P_{1/2}, ^2P_{3/2})$ and $CO^+(X\,^2\Sigma, v'')$ to CO, J. Danon and R. Marx 68 (1982) 255
Intermediate coupling approach to the collisional stabilization step in ternary ion-molecule association reactions, E. Herbst 68 (1982) 323
Electron impact dissociation of $CH_4(CD_4)$: laser induced fluorescence of product CH^+ (CD^+), B.N. Mahan and A. O'Keefe 69 (1982) 35
Molecular dynamics simulations of restricted primitive model 1 : 1 electrolytes, D.M. Heyes 69 (1982) 155
Strong non-Condon effects induced by electron correlation: N_2O^+, H. Köppel, L.S. Cederbaum and W. Domcke 69 (1982) 175
Angular distribution of photopredissociation fragments from CH_3I^+, M. Tadjeddine, G. Bouchoux, L. Malegat, J. Durup, C. Pernot and J. Weiner 69 (1982) 229
Relativistic calculation of the electronic structure of $IrCl_6^{3-}$, A. Goursot and H. Chermette 69 (1982) 329
Dynamics of ion–molecule processes: a crossed-beam study of the reaction $B^+(^3P) + H_2 \rightarrow BH^+ + H$, B. Friedrich and Z. Herman 69 (1982) 433
Transition probabilities in electron–nuclear double- and multiple-resonance spectroscopy with non-coherent and coherent radio-frequency fields, A. Schweiger and Hs.H. Günthard 70 (1982) 1
Resonance Raman studies on $[FeCl_4]^-$ and $[FeBr_4]^-$, R.J.H. Clark and T.J. Dines 70 (1982) 269
A photoelectron–photoion coincidence study of acetaldehyde and ethylene oxide molecular ions, K. Johnson, I. Powis and C.J. Danby 70 (1982) 329

Dimers and molecular clusters

Pseudopotential calculations on P_2, P_2^+, P_4 and P_4H^+, U. Wedig, H. Stoll and H. Preuss 61 (1981) 117
The effect of strong coupling between vibrations in hydrogen bonds on the polarized spectra of the mercaptobenzothiazole crystal: an "anomalous" isotopic effect, H.T. Flakus 62 (1981) 103
Do protons tunnel in the formic acid dimer and in the crystal? G.N. Robertson and M.C. Lawrence 62 (1981) 131
Concentration quenching of pyrene $^1B_{1u}$ in the vapour phase, A Davis, M.J. Pilling and M.J. Westby 63 (1981) 209
Analysis of the ortho H_2–para H_2 hyperfine dimer spectrum, M. Waaijer, M. Jacobs and J. Reuss 63 (1981) 257
Measurements of the hyperfine dimer spectrum for H_2–Ne, H_2–Ar, H_2-Kr by the magnetic beam resonance technique, M. Waaijer and J. Reuss 63 (1981) 263
Intramolecular reorientations and the effects of thermal history and hydrogen bonding in four closely related organic molecular solids, M. Aronson, P. Beckmann, B. Ross and S.L. Tan 63 (1981) 349
Curve crossing and vibrational predissociation of van der Waals molecules, G.W. Ewing 63 (1981) 411
Tetracene–argon van der Waals molecules, A.M. Griffiths and P.A. Freedman 63 (1981) 469
Comparisons of the effects of symmetric versus asymmetric H bonding on ^2H and ^{17}O nuclear quadrupole coupling constants: application to formic acid and the hydrogen diformate anion, J.E. Gready, G.B. Bacskay and N.S. Hush 64 (1982) 1

$Na_2 b^3\Pi_u - X^1\Sigma_g^+$ intercombination bands: direct observation through high resolution laser fluorescence spectroscopy in a supersonic nozzle beam, F. Engelke, H. Hage and C.D. Caldwell 64 (1982) 221
Ab initio studies on hydrogen bonded chains. II. Equilibrium geometry and vibrational spectra of the bent chain of hydrogen fluoride molecules, A. Beyer and A. Karpfen 64 (1982) 343
Applying the polarization model to selected ionic substances, P. Turner, E.E. David and C.W. David 64 (1982) 437
The electric saturation of molecular alignment in liquid nitrobenzene as studied by NMR, T.M. Plantenga, F.J.J. de Kanter, H. Bulsink and C. MacLean 65 (1982) 77
Spectroscopy of the fluorene molecule in planar supersonic expansions, A. Amirav, E. Even and J. Jortner 67 (1982) 1
Semiclassical model of a trinuclear mixed valence system, J.P. Launay and F. Babonneau 67 (1982) 295
Vibrational energy relaxation of high density HCl fluid in the 150–345 K range, J. Chesnoy and D. Ricard 67 (1982) 347
Nonlinear dielectric study of molecular association of phenyl and of methyl isothiocyanates, M. Dutkiewicz 68 (1982) 83
Laser induced fluorescence study of the first part of a Na/Na_2 free jet expansion: dimer formation and excitation-energy transfer, F. Aerts, H. Hulsman and P. Willems 68 (1982) 233
Transient intermediates in the flash photolysis of mercury vapour. Dimers, trimers and the enigmatic 2480 Å bands, A.B. Callear and K.-L. Lai 69 (1982) 1
Relativistic calculation of the electronic structure of $ItCl_6^3$, A Goursot and H. Chermette 69 (1982) 329
Absorption spectra of Na and Na_2 in inert-gas matrices, J. Hormes and B. Karrasch 70 (1982) 29
Correlation structure–magnetic properties in $(Cr_2O_{10})^{14-}$ dimeric units: a theoretical approach, M.F. Charlot, O. Kahn and M. Drillon 70 (1982) 177

Polymers and biological macromolecules
Vibrational transitions in excited states of molecules using coherent Stokes Raman spectroscopy: application to ferrocytochrome-c, J.R. Andrews, R.M. Hochstrasser and H.P. Trommsdorff 62 (1981) 87
Electronic structure in large finite aperiodic polypeptide chains, R.S. Day, S. Suhai and J. Ladik 62 (1981) 165
Electroreflectance studies on the excitons in PTS and DCHD single crystals, L. Sebastian and G. Weiser 62 (1981) 447
Theoretical models for activation of CO_2 towards hydration ($CO_2 + H_2O \rightarrow H_2CO_3$) by cationic binding sites, Y. Jean and F. Volatron 65 (1982) 107
The thermodynamic driving force in mutual diffusion of hard spheres, J.M. Schurr 65 (1982) 217
Order parameters in hydrocarbon chains, O. Edholm 65 (1982) 259
Theory of the decay of the fluorescence polarization anisotropy of macromolecules with local cylindrical symmetry, J.M. Schurr 65 (1982) 417
A theory of fluorescence depolarization in macroscopically ordered membrane systems, B.W. van der Meer, R.P.H. Kooyman and Y.K. Levine 66 (1982) 39
Electrolyte dissipation effects on polyion diffusion in low ionic strength buffers, K.S. Schmitz 66 (1982) 177
Electrolyte polarization effects on polyion diffusion in low ionic strength buffers, K.S. Schmitz, N. Parthasarathy and E. Vottler 66 (1982) 187
Theory of sorption of gases on polymers. I. Conformational effects and the double-sigmoid shape of sorption isotherm, P. Pyda and M. Kurzyński 67 (1982) 7
Motion of polymer chains in a molecular crystal, M.V. Basilevsky and S.I. Petrochenko 67 (1982) 319

Vibronic effects in photolysis of metalloporphyrins and hemoproteins, I.B. Bersuker, S.S. Stavrov and B.G. Vekhter 69 (1982) 165
ENDOR of quintet-state bicarbenes in diacetylene single crystals, W. Hartl and M. Schwoerer 69 (1982) 443
Energy-dependent incoherent singlet exciton motion in an amorphous organic solid (polyvinylcarbazole), K.-D. Rockwitz and H. Bässler 70 (1982) 307

PHENOMENA

Atomic and molecular structure

Ne matrix spectra of the sym-$C_6Br_3F_3^+$ radical cation, V.E. Bondybey, T.J. Sears, T.A. Miller, C. Vaughn, J.H. English and R.S. Shiley 61 (1981) 9
Multiple-scattering Xα calculations of the electronic structure of $Co(CN)_5OH^{3-}$ and related photochemical properties, A. Goursot and E. Pénigault 61 (1981) 83
Pseudopotential calculations on P_2, P_2^+, P_4 and P_4H^+, U. Wedig, H. Stoll and H. Preuss 61 (1981) 117
About the concentration dependence of the anisotropy in the magnetic susceptibility of some aromatic compounds in the liquid phase, studied by NMR, T.M. Plantenga, H. Bulsink, C. MacLean and J.A.B. Lohman 61 (1981) 271
A quadratically convergent Hartree–Fock (QS-SCF) method. Application to closed shell systems, G.B. Bacskay 61 (1981) 385
Radiative lifetimes of metastable states of free radicals. I. NF $b^1\Sigma^+$, P.H. Tennyson, A. Fontijn and MA.A. Clyne 62 (1981) 171
The magnetic field dependence of the dielectric constant of liquids, T.M. Plantenga, J. Bulthuis, J.P. van Dieren, W. Mels and C. MacLean 62 (1981) 207
An ab initio study of the influence of substituents and intramolecular hydrogen bonding on the carbonyl bond length, and the harmonic and anharmonic stretching force constants. I. Monosubstituted carbonyl compounds, C.W. Bock, M. Trachtman and P. George 62 (1981) 303
Force constants of trans and cis N-methylformamide from ab initio SCF MO calculations, Y. Sugawara, A.Y. Hirakawa, M. Tsuboi, S. Kato and K. Morokuma 62 (1981) 339
A non-empirical LCAO MO SCF investigation of the ground and core ionized states of tetrahedrane and cyclobutadiene, D.T. Clark and A. Harrison 62 (1981) 353
Two-photon sequential absorption spectroscopy of iodine monobromide in the 5 eV region, G.W. King, I.M. Littlewood and J.R. Robins 62 (1981) 359
Momentum distributions and binding energies for the valence orbitals of methanol, A. Minchinton, C.E. Brion and E. Weigold 62 (1981) 369
An LCAO HFS investigation of the electronic structure of cobaltocene, C. Famiglietti and E.J. Baerends 62 (1981) 407
The shifted scheme in the general-model-space diagrammatic perturbation theory, G. Hose and U. Kaldor 62 (1981) 469
Momentum distributions and ionization potentials for the valence orbitals of benzene, I. Fuss, I.E. McCarthy, A. Minchinton, E. Weigold and F.P. Larkins 63 (1981) 19
Absorption spectrum of bismuth in the vacuum ultraviolet. Observation of new transitions to Rydberg states, N. Damany, J. Figuet and A. Topouzkhanian 63 (1981) 157
Rydberg states and the observed spectrum of ArH, M. Berman, U. Kaldor, J. Shmulovich and S. Yatsiv 63 (1981) 165
Internally folded densities, A.J. Thakkar, A.M. Simas and V.H. Smith Jr. 63 (1981) 175
Theoretical studies of the temperature dependence of magnetic shielding tensors: H_2, HF and LiH, R. Ditchfield 63 (1981) 185

Tetracene–argon van der Waals molecules, A.M. Griffiths and P.A. Freedman 63 (1981) 469
On the vibrational structure of methyl iodide. I. Cubic and quartic normal mode coupling constants, R. Zygan-Maus and S.F. Fischer 63 (1981) 475
On the vibrational structure of methyl iodide. II. Relaxation pathways in the 3000 cm^{-1} energy regime, R. Zygan-Maus and S.F. Fischer 63 (1981) 485
Comparison of the effects of symmetric versus asymmetric H bonding on ^{2}H and ^{17}O nuclear quadrupole coupling constants: application to formic acid and the hydrogen diformate anion, J.E. Gready, G.B. Bacskay and N.S. Hush 64 (1982) 1
The SrCl(A–X, B–X) bands in thermal and non-thermal reactive excitation using metastable Sr atoms, U. Brinkmann, V.H. Schmidt and H. Telle 64 (1982) 19
Excited state properties from the equations of motion method. Application of the MCTDHF–MCRPA to the dipole moments and oscillator strengths of the $A\,^{1}\Pi$, $a\,^{3}\Pi$, $a'\,^{3}\Sigma^{+}$, and $d\,^{3}\Delta$ low-lying valence states of CO, D. Lynch, M.F. Herman and D.L. Yeager 64 (1982) 69
Molecular orbital momentum distributions and binding energies for nitric oxide, C.E. Brion, J.P.D. Cook, I.G. Fuss and E. Weigold 64 (1982) 287
Geometry optimization in ab initio SCF calculations. VII. Proton affinities and ion structures calculated with floating orbital geometry optimization (FOGO), H. Huber and J. Vogt 64 (1982) 399
Distribution and conjugation of the π-electrons in the T_1 state of some BNC-heterocycles, F.W. Deeg, Chr. Bräuchle and J. Voitländer 64 (1982) 427
The determination and assignment of a complete ^{14}N quadrupole coupling tensor in liquid solution, T.M. Plantenga, H. Bulsink, F.J.J. de Kanter and C. MacLean 65 (1982) 71
Hole-mixing effects in the ionization of some unsaturated oxo-compounds, W. von Niessen, G. Bieri, J. Schirmer and L.S. Cederbaum 65 (1982) 157
A quadratically convergent Hartree–Fock (QC-SCF) method. Application to open shell orbital optimization and coupled perturbed Hartree–Fock calculations, G.B. Bacskay 65 (1982) 383
Lifetimes and transition moment of the A–X band system of Bi_2, G. Ehret and G. Gerber 66 (1982) 27
A simple method for the evaluation of the second-order perturbation energy from external double-excitations with a CASSCF reference wavefunction, B.O. Roos, P. Linse, P.E.M. Siegbahn and M.R.A. Blomberg 66 (1982) 197
Non-adiabatic interactions in the symmetric ring opening process of dioxirane, R. Cimiraglia, T.-K. Ha, R. Meyer and Hs.H. Günthard 66 (1982) 209
Photochemical formation of complexed HNO in low temperature matrices, R.P. Müller, S. Murata and J.R. Huber 66 (1982) 237
Clarification of the assignment of the electronic spectrum of hydrogen chloride based on ab initio Cl calculations, M. Bettendorff, S.D. Peyerimhoff and R.J. Buenker 66 (1982) 261
Cubic spline method for solving second-order differential equations: theory and application to the Thomas–Fermi model for ions, S. Raynor 66 (1982) 409
A quantum chemical investigation of the ammonium radical. I. SCF-Xα-SW calculations of the electronic structure and Rydberg spectra, E. Broclawik, J. Mrozek and V.H. Smith Jr. 66 (1982) 417
On the validity of the Xα method in the computation of ionization potentials. A comparison of the results for small molecules, G. De Alti, P. Decleva and A. Lisini 66 (1982) 425
Double ionization of methane, P.E.M. Siegbahn 66 (1982) 443
Ab initio calculation of geometries and hfs constants of CH_3, SiH_3, and GeH_3 radicals, K. Ohta, H. Nakatsuji, I. Maeda and T. Yonezawa 67 (1982) 49
Study and assignment of ion pair states of the I_2 molecule in the 40000 cm^{-1} region, J. Chevaleyre, J.P. Perrot, J.M. Chastan, S. Valignat and M. Broyer 67 (1982) 59

The vibrational fine structure of the $^1A_{2g} \leftarrow {}^1A_{1g}$ polarized absorption band of trans-$[Co(NH_3)_4(CN)_2]^+$. The excited state geometry, U. Urushiyama, H. Kupka, J. Degen and H.-H. Schmidtke 67 (1982) 65
Symmetry distortions and pseudo-Jahn–Teller effect of peri- and cata-hexabenzocoronene in their triplet states as observed by ODMR techniques, C. Bräuchle 67 (1982) 97
Observed adiabatic corrections to the Born–Oppenheimer approximation for diatomic molecules with ten valence electrons, E. Tiemann, H. Arnst, W.U. Stieda, T. Törring and J. Hoeft 67 (1982) 133
X-ray photoelectron spectroscopic study of tetraphenyldithiapyranylidene and its polyiodides, J.-P. Boutique, J. Riga, J.J. Verbist, H. Strzelecka and J. Rivory 67 (1982) 355
Isotopic field shift in the transition $A\,0^+ - X\,^1\Sigma^+$ of PbS, H. Knöckel and E. Tiemann 68 (1982) 13
Isotopic field shift of the rotational energy of the Pb-chalcogenides and Tl-halides, J. Schlembach and E. Tiemann 68 (1982) 21
Vibrational frequencies from anharmonic ab initio/empirical potential energy functions. III. Stretching vibrations of hydrogen cyanide and acetylenes, P. Botschwina 68 (1982) 41
An ab initio study of the geometry of the C–C(H) = O group, the f_{C-C^2} stretching force constant, and the $f_{C=O,C-C}$ coupling constant in conjugated mono-substituted carbonyl compounds, C.W. Bock, M. Trachtman and P. George 68 (1982) 143
Dual phosphorescence of halogenated benzenes in rigid-glass solution, T. Takemura, Y. Yamada and H. Baba 68 (1982) 171
X-ray photoelectron spectra of 2-propenal and related compounds, G. Distefano, M. Guerra, D. Jones and A. Modelli 68 (1982) 383
Effects of unresolved hyperfine structure in the microwave rotational spectra of the $^2\Sigma$-radicals CaBr and CaCl, K. Möller, H.-U. Schütze-Pahlmann, J. Hoeft and T. Törring 68 (1982) 399
Energy dependence of the S_1-decay of propynal and propynal-d_1 and the influence of collisions, U. Brühlmann and J.R. Huber 68 (1982) 405
Transient intermediates in the flash photolysis of mercury vapour. Dimers, trimers and the enigmatic 2480 Å bands, A.B. Callear and K.-L. Lai 69 (1982) 1
Vibronic effects in photolysis of metalloporphyrins and hemoproteins, I.B. Bersuker, S.S. Stavrov and B.G. Vekhter 69 (1982) 165
An investigation of basis sets and basis set superposition error in transition metals using frozen core and frozen orbital techniques, L. Petterson and U. Wahlgren 69 (1982) 185
MCSCF and multi-reference CI calculations of the potential energy surface for ground state H_2O, W.P. Kraemer, B.O. Roos and P.E.M. Siegbahn 69 (1982) 305
Relativistic calculation of the electronic structure of $IrCl_6^{3-}$, A. Goursot and H. Chermette 69 (1982) 329
Binary (e, 2e) spectroscopy and momentum-space chemistry of CO_2, J.P.D. Cook and C.E. Brion 69 (1982) 339
ENDOR of quintet-state bicarbenes in diacetylene single crystals, W. Hartl and M. Schwoerer 69 (1982) 443
Matrix-isolation spectroscopy of small antimony clusters, H. Sontag and R. Weber 70 (1982) 23
Vacuum UV photolysis of CO_2. Rare-gas oxide formation in matrices, J. Fournier, H.H. Mohammed, J. Deson and D. Maillard 70 (1982) 39
He(I) photoelectron spectroscopy of transient species: germanium dichloride and germanium dibromide, G. Jonkers, S.M. van der Kerk and C.A. de Lange 70 (1982) 69
A new INDO-type procedure for conjugated non-rigid molecules. I. Ground-state conformations and barriers to internal rotation, F. Momicchioli, I. Baraldi and M.C. Bruni 70 (1982) 161
Potential surfaces for the Rydberg states of H_3, Ch. Nager and M. Jungen 70 (1982) 189

Medium stabilization of localized Born–Oppenheimer states, M. Bixon 70 (1982) 199
Near-infrared-induced conformational isomerization of 2-chloroethanol in an argon matrix, H. Takeuchi and M. Tasumi 70 (1982) 275
Hydrogen-bonded complex between HNO and formaldehyde. Photolysis of methyl nitrite in an argon matrix, R.P. Müller, P. Russegger and J.R. Huber 70 (1982) 281
Electron energy-loss spectroscopy of forbidden transitions to valence and Rydberg states of formaldehyde, S. Taylor, D.G. Wilden and J. Comer 70 (1982) 291
Zero-field Stark level crossing and Stark–Zeeman recrossing experiments in the 593 nm band of NO_2, F. Bylicki and H.G. Weber 70 (1982) 299
Rotational and hyperfine structure in the $B\,^3\Pi_{0^+}$ excited state of ICl, H. Knöckel and E. Tiemann 70 (1982) 345

Energy levels
Multiple-scattering Xα calculations of the electronic structure of $Co(CN)_5OH^{3-}$ and related photochemical properties, A. Goursot and E. Pénigault 61 (1981) 83
The sum rule, an assignment tool? D.M. de Leeuw and C.A. de Lange 61 (1981) 109
The electronic spectrum of hydrogen fluoride (7–46 eV), A.P. Hitchcock and C.E. Brion 61 (1981) 281
Internal rotation of para-substituted phenols. A low temperature dielectric relaxation study, J. le G. Gilchrist 61 (1981) 443
$C_2O(\tilde{A}\,^3\Pi_i \leftrightarrow \tilde{X}\,^3\Sigma^-)$: laser induced excitation and fluorescence spectra, W.M. Pitts, V.M. Donnelley, A.P. Baronavski and J.E. McDonald 61 (1981) 451
Decay kinetics of Kr^+ levels populated by ArF laser radiation, D.J. Wren and D.W. Setser 62 (1981) 43
Electronic structure in large finite aperiodic polypeptide chains, R.S. Day, S. Suhai and J. Ladik 62 (1981) 165
A non-empirical LCAO MO SCF investigation of the ground and core ionized states of tetrahedrane and cyclobutadiene, D.T. Clark and A. Harrison 62 (1981) 353
Two-photon sequential absorption spectroscopy of iodine monobromide in the 5 eV region, G.W. King, I.M. Littlewood and J.R. Robins 62 (1981) 359
Momentum distributions and ionization potentials for the valence orbitals of benzene, I. Fuss, I.E. McCarthy, A. Minchinton, E. Weigold and F.P, Larkins 63 (1981) 19
Absorption spectrum of bismuth in the vacuum ultraviolet. Observation of new transitions to Rydberg states, N. Damany, J. Figuet and A. Topouzkhanian 63 (1981) 157
Hydrogen bonding in potassium hydrogen maleate and some simple derivatives studied by inelastic neutron scattering spectroscopy, J. Tomkinson, I.J. Braid, J. Howard and T.C. Waddington 64 (1982) 151
Laser-induced fluorescence of the $\tilde{R}^{es}B_2$ state of CS_2 excited at 3547 Å, R. Vasudev 64 (1982) 167
Inelastic neutron scattering spectra of alkali metal (Na, K) bifluorides: the harmonic overtone of ν_3, T.C. Waddington, J. Howard, K.P. Brierley and J. Tomkinson 64 (1982) 193
Holé-mixing effects in the ionization of some unsaturated oxo-compounds, W. von Niessen, G. Bieri, J. Schirmer and L.S. Cederbaum 65 (1982) 157
An approach to the estimation of polyatomic vibrational radiative relaxation rates, E. Herbst 65 (1982) 185
Electronic transitions of vanadyl phthalocyanine in solution and in the solid state, T.-H. Huang and J.H. Sharp 65 (1982) 205
SCF-Xα scattered wave model cluster calculations for the adsorption systems CO/Ni and N_2/Ni, A schichl, D. Menzel and N. Rösch 65 (1982) 225

High resolution translational energy spectroscopy: electronic transitions in Kr^+, and I^+ and vibronic transitions in N_2^+, A.J. Illies and M.T. Bowers 65 (1982) 281
Resonance Raman and polarized light infrared spectra of 1,4-dihydroxyanthraquinone. Vibrational studies of the ground and excited electronic states, G. Smulevich, L. Angeloni, S. Giovannardi and M.P. Marzocchi 65 (1982) 313
Radiative decay times and kinetics of the luminescence from $KI:Sn^{2+}$, L.S. Dang, P.W.M. Jacobs, K. Schmitt, V.S. Sivasankar and D.J. Simkin 66 (1982) 51
The factorization method for the treatment of local mode vibrations in polyatomic molecules: structural features of XH stretching overtone bands, M.A. Mohammadi 66 (1982) 153
Building-up principles for diradical states, A. Ceulemans 66 (1982) 169
Non-adiabatic interactions in the symmetric ring opening process of dioxirane, R. Cimiraglia, T.-K. Ha, R. Meyer and Hs.H. Günthard 66 (1982) 209
Clarification of the assignment of the electronic spectrum of hydrogen chloride based on ab initio CI calculations, M. Bettendorff, S.D. Peyerimhoff and R.J. Buenker 66 (1982) 261
Matrix trapping site for H atoms in solid Ne and Ar, S. Ossicine and F. Forstmann 66 (1982) 333
Cubic spline method for solving second-order differential equations: theory and application to the Thomas–Fermi model for ions, S. Raynor 66 (1982) 409
A quantum chemical investigation of the ammonium radical. I. SCF-Xα-SW calculations of the electronic structure and Rydberg spectra, E. Broclawik, J. Mrozek and V.H. Smith Jr. 66 (1982) 417
The vibrational fine structure of the $^1A_{2g} \leftarrow {}^1A_{1g}$ polarized absorption band of trans-$[Co(NH_3)_4(CN)_2]^+$. The excited state geometry, A. Urushiyama, H. Kupka, J. Degen and H.-H. Schmidtke 67 (1982) 65
The electronic spectra of 10,10-dimethylanthracene-9-one crystals: spin–orbit/vibronic coupling in $^3n\pi^*$ states, S.R. Wilson and R. Bramley 67 (1982) 119
Study of the electronic structure of first and second row transition metal sulfides using SCF-SW-Xα cluster calculations, S. Harris 67 (1982) 229
Gas phase high temperature photoelectron spectroscopy: the tin monoxide molecule, J.M. Dyke, A. Morris, A.M.A. Ridha and J.G. Snijders 67 (1982) 245
X-ray photoelectron spectroscopic study of tetraphenyldithiapyranylidene and its polyiodides, J.-P. Boutique, J. Riga, J.J. Verbist, H. Strzelecka and J. Rivory 67 (1982) 355
Xanthone. I. Optical detection of an extremely large sublevel splitting in the lowest triplet state, H.J. Griesser, and R. Bramley 67 (1982) 361
Xanthone. II. Vibronic coupling analysis from high resolution phosphorescence spectra, H.J. Griesser and R. Bramley 67 (1982) 373
Fucusing, rotational state selection and orientation of CH_3I in a seeded supersonic beam, K.K. Chakravorty, D.H. Parker and R.B. Bernstein 68 (1982) 1
Vibrational frequencies from anharmonic ab initio/empirical potential energy functions. III. Stretching vibrations of hydrogen cyanide and acetylenes, P. Botschwina 68 (1982) 41
Sorption energy of helium in solid rare gases and SF_6, H. Abe 68 (1982) 89
Optically resolved zero field splittings in the phosphorescence spectra of aromatic thioketones, M.-R. Taherian and A.H. Maki 68 (1982) 179
Dephasing in isolated one-dimensional quantum systems, J. Brickmann and P. Russegger 68 (1982) 369
Physical adsorption of a heteronuclear diatomic molecule onto a solid surface: a theoretical approach, W.J. Welsh and D.D. Fitts 68 (1982) 441
Interpretation of the crystal field parameters by the angular overlap model – application to some f^n electron systems, C. Linarès, A. Louat and M. Blanchard 68 (1982) 453
An error analysis for Hartree–Fock crystal orbital calculations, S. Suhai, P.S. Bagus and J. Ladik 68 (1982) 467

Effects of relatively in the He(I) photoelectron spectrum of CI_4, G. Jonkers, C.A. de Lange and J.G. Snijders 69 (1982) 109
He(I) photoelectron spectroscopy of tetraiodoethylene (C_2I_4), G. Jonkers, S.M. van der Kerk, R. Mooyman, C.A. de Lange and J.G. Snijders 69 (1982) 115
Overtone spectra of crystalline $CaWO_4$: vibrational exciton density-of-states functions, S.D. Colson and K.N. Wong 69 (1982) 223
Relativistic calculation of the electronic structure of $IrCl_6^{3-}$, A. Goursot and H. Chermette 69 (1982) 329
The reaction of F atoms with acetaldehyde and ethylene oxide. Vibrational spectra of the CH_3CO and CH_2CHO free radicals trapped in solid argon, M.E. Jacox 69 (1982) 407
Matrix-isolation spectroscopy of small antimony clusters, H. Sontag and R. Weber 70 (1982) 23
Gas-phase phosphorescence of thioformaldehyde, D.J. Clouthier and C.M.L. Kerr 70 (1982) 55
He(I) photoelectron spectroscopy of transient species: germanium dichloride and germanium dibromide, G. Jonkers, S.M. van der Kerk and C.A. de Lange 70 (1982) 69
Potential surfaces for the Rydberg states of H_3, Ch. Nager and M. Jungen 70 (1982) 189
Electron energy-loss spectroscopy of forbidden transitions to valence and Rydberg states of formaldehyde, S. Taylor, D.G. Wilden and J. Comer 70 (1982) 291
Zero-field Stark level crossing and Stark–Zeeman recrossing experiments in the 593 nm band of NO_2, F. Bylicki and H.G. Weber 70 (1982) 299

Electric and magnetic properties

About the concentration dependence of the anisotropy in the magnetic susceptibility of some aromatic compounds in the liquid phase, studied by NMR, T.M. Plantenga, H. Bulsink, C. MacLean and J.A.B. Lohman 61 (1981) 271
Perturbation theory of the electron correlation effects for atomic and molecular properties. III. Fourth-order corrections to molecular dipole moments and polarizabilities, G.H.F. Diercksen and A.J. Sadlej 61 (1981) 293
A quadratically convergent Hartree–Fock (QS-SCF) method. Application to closed shell systems, G.B. Bacskay 61 (1981) 385
The magnetic field dependence of the dielectric constant of liquids, T.M. Plantenga, J. Bulthuis, J.P. van Dieren, W. Mels and C. MacLean 62 (1981) 207
Temperature dependence and anisotropy of the hole drift mobility in dibenzothiophene, A. Cehak and Z. Zboiński 62 (1981) 333
Structure of organic monomolecular layers of diacetylene studied by IR dichroism and ESR, F. Kajzar and J. Messier 63 (1981) 123
Theoretical studies of the temperature dependence of magnetic shielding tensors: H_2, HF and LiH, R. Ditchfield 63 (1981) 185
Charge-transfer excitons in anthracene crystals. A theoretical investigation of their optical absorption and thermal dissociation, P.J. Bounds, P. Petelenz and W. Siebrand 63 (1981) 303
Solvent effect on optical activity in dilute solutions, S. Woźniak and B. Linder 63 (1981) 377
Comparison of the effects of symmetric versus asymmetric H bonding on ^2H and ^{17}O nuclear quadrupole coupling constants: application to formic acid and the hydrogen diformate anion, J.E. Gready, G.B. Bacskay and N.S. Hush 64 (1982) 1
Dynamic polarizabilities and Raman intensities of CO, N_2, HCl and Cl_2, J. Oddershede and E.N. Svendsen 64 (1982) 359
Distribution and conjugation of the π-electrons in the T_1 state of some BNC-heterocycles, F.W. Deeg, Chr. Bräuchle and J. Voitländer 64 (1982) 427
The determination and assignment of a complete ^{14}N quadrupole coupling tensor in liquid solution, T.M. Plantenga, H. Bulsink, F.J.J. de Kanter and C. MacLean 65 (1982) 71

The electric saturation of molecular alignment in liquid nitrobenzene as studied by NMR, T.M. Plantenga, F.J.J. de Kanter, H. Bulsink and C. MacLean 65 (1982) 77
A quadratically convergent Hartree–Fock (QC-SCF) method. Application to open shell orbital optimization and coupled perturbed Hartree–Fock calculations, G.B. Bacskay 65 (1982) 383
Configuration interaction and perturbation study of the electron correlation contribution to the dipole polarizability of beryllium, G.H.F. Diercksen and A.J. Sadlej 65 (1982) 407
Studies of quadrupolar and dipolar electric field effects in the NMR spectra of binary mixtures of liquids, T.M. Plantenga, P.C.M. van Zijl and C. MacLean 66 (1982) 1
Ab initio calculation of geometries and hfs constants of CH_3, SiH_3 and GeH_3 radicals, K. Ohta, H. Nakatsuji, I. Maeda and T. Yonezawa 67 (1982) 49
Dipole oscillator strength distributions, sums, and dispersion energy coefficients for CO and CO_2, B.L. Jhanwar and W.J. Meath 67 (1982) 185
Muonium substituted organic free radicals in liquids, Muon–electron hyperfine coupling constants of alkyl and allyl radicals, E. Roduner, W. Strub, P. Burkhard, J. Hochmann, P.W. Percival, H. Fischer, M. Ramos and B.C. Webster 67 (1982) 275
A study of magnetic field effects upon triplet–triplet absorptions, D.J. Graham 68 (1982) 119
Investigation of the Stark effect on the lowest triplet states of 1-indanone single crystals, J.S. Patel and D.M. Hanson 69 (1982) 249
Ab initio calculation of nuclear spin–spin coupling constant of HF and CN^-, M.T. Rayez, E. Neumann, J. Hoarau and F. Achard 69 (1982) 323
Transition probabilities in electron–nuclear double- and multiple-resonance spectroscopy with non-coherent and coherent radio-frequency fields, A. Schweiger and Hs. H. Günthard 70 (1982) 1
Correlation structure-magnetic properties in $(Cr_2O_{10})^{14-}$ dimeric units: a theoretical approach, M.F. Charlot, O. Kahn and M. Drillon 70 (1982) 177
Potential surfaces for the Rydberg states of H_3, Ch. Nager and M. Jungen 70 (1982) 189
Low-temperature dielectric losses of hydrocarbon media containing polar additives, J. le G. Gilchrist 70 (1982) 353

Spectral bandshapes and intensities

Active nitrogen luminescence studies at liquid helium temperatures, E.B. Gordon, A.A. Pelmenov, O.F. Pugachev and V.V. Khmelenko 61 (1981) 35
Theoretical evaluation of the vibronic intensity distribution in the phosphorescence of benzene, G. Marconi, G. Orlandi, P. Palmieri and J. Vrbancich 61 (1981) 43
Inelastic neutron scattering studies of coordinate acetylene: the complex $Co_2(CO)_6 \cdot C_2H_2$, J. Howard, K. Robson and T.C. Waddington 61 (1981) 53
Photofragmentation of triatomic molecules. Theory of angular and state distribution of product fragments, G.G.Balint-Kurti and M. Shapiro 61 (1981) 137
Translational energy distribution and production mechanism of excited hydrogen atoms produced in electron–CH_4 collisions, T. Ogawa, J. Kurawaki and M. Higo 61 (1982) 181
Vibrational transitions in excited states of molecules using coherent Stokes Raman spectroscopy; application to ferrocytochrome-c, J.R. Andrews, R.M. Hochstrasser and H.P. Trommsdorff 62 (1981) 87
The effect of strong coupling between vibrations in hydrogen bonds on the polarized spectra of the mercaptobenzothiazole crystal: an "anomalous" isotopic effect, H.T. Flakus 62 (1981) 103
Do protons tunnel in the formic acid dimer and in the crystal? G.N. Robertson and M.C. Lawrence 62 (1981) 131

Fourth and sixth spectral moments in far infrared spectroscopy, M.W. Evans 62 (1981) 179
CNDO-calculation of second order vibronic coupling in the $^1B_{2u}$–$^1A_{1g}$ transition of benzene, G. Fischer, J.R. Reimers and I.G. Ross 62 (1981) 187
IR and Raman study of rotational relaxation of furan and thiophene. I. Bandwidths. Comparison of the rotations about the principal axes of inertia, J.P. Pinan-Lucarre, J. Loisel and J. Vincent-Geisse 62 (1981) 251
IR and Raman study of rotational relaxation of furan and thiophene. II. Correlation functions. Interpretation according to models, J.P. Pinan-Lucarre and T. Nguyen-Tan 62 (1981) 265
Vibrational spectra and dynamics of conformation and hydrogen bonding of N-methylacetamide. II. Dynamics of the NH... O hydrogen bond and NH (ND) stretching band structure, F. Fillaux 62 (1981) 287
Theoretical study on an anomalous isotopic effect on the position and integrated intensity of the IR stretching vibration band for medium-strong and strong hydrogen bonds, Y. Guissani and H. Ratajczak 62 (1981) 319
The determination of the complex refractive indices of some concentrated aqueous salt solutions at submillimetre wavelengths, M. Bennouna, H. Cachet, J.C. Lestrade and J.R. Birch 62 (1981) 439
The photophysics of tertiary aliphatic amines, C.G. Cureton, K. Hara, D.V. O'Connor and D. Phillips 63 (1981) 31
Determination of the translational energy of O(3s ^{3}S) excited in the dissociative excitation of O_2 and NO by He*(2 ^{3}S), L.G. Piper and M.A.A. Clyne 63 (1981) 77
Ab initio evaluation of the five-photon ionization cross sections of nitric oxide, P. Cremaschi 63 (1981) 85
Raman linewidth study of vibrational relaxation of benzonitrile in solution, K. Tanabe 63 (1981) 135
Charge-transfer excitons in anthracene crystals. A theoretical investigation of their optical absorption and thermal dissociation, P.J. Bounds, P. Petelenz and W. Siebrand 63 (1981) 303
Excited state properties from the equations of motion method. Application of the MCTDHF–MCRPA to the dipole moments and oscillator strengths of the A $^1\Pi$, a $^3\Pi$, a' $^3\Sigma^+$, and d $^3\Delta$ low-lying valence states of CO, D. Lynch, M.F. Herman and D.L. Yeager 64 (1982) 69
Theoretical fundamentals of high resolution Auger electron spectroscopy, A.V. Kondratenko and L.N. Mazalov 64 (1982) 139
Hydrogen bonding in potassium hydrogen maleate and some simple derivatives studied by inelastic neutron scattering spectroscopy, J. Tomkinson, I.J. Braid, J. Howard and T.C. Waddington 64 (1982) 151
Inelastic neutron scattering spectra of alkali metal (Na, K) bifluorides: the harmonic overtone of ν_3, T.C. Waddington, J. Howard, K.P. Brierley and J. Tomkinson 64 (1982) 193
Na_2 b $^3\Pi_u$–X $^1\Sigma_g^+$ intercombination bands: direct observation through high resolution laser fluorescence spectroscopy in a supersonic nozzle beam, F. Engelke, H. Hage and C.D. Caldwell 64 (1982) 221
Lineshape of rotationally predissociated van der Waals molecules: predicted infrared spectrum of Ar–N_2, J.A. Beswick and M. Shapiro 64 (1982) 333
Dynamic polarizabilities and Raman intensities of CO, N_2, HCl and Cl_2, J. Oddershede and E.N. Svendsen 64 (1982) 359
Spectra of direct excitation of phosphorescence in an isotopic mixed naphthalene crystal. High resolution excitation of the two Davydov components of the N-d_8 host crystal, Ph. Pee, J.P. Lemaistre, F. Dupuy, R. Brown, J. Megel and Ph. Kottis 64 (1982) 389

Sum rules for molecular electronic spectra: application to exact and reflection principle solutions, S.M. Adler-Golden 64 (1982) 421
Vibrational absorption spectrum of solid CO in the first harmonic region. Two-phonon transition, F. Legay and N. Legay-Sommaire 65 (1982) 49
Depolarization dispersion curves of resonance Raman fundamentals of metalloporphyrins and metallophthalocyanines subject to asymmetric perturbations, M.Z. Zgierski and M. Pawlikowski 65 (1982) 335
Influence of inhomogeneous broadening on resonance Raman characteristics of metalloporphyrins and metallophthalocyanines, M.Z. Zgierski 65 (1982) 369
Temperature dependence of single crystal Raman spectra of the complex (perylene)$_3$TCNQ, A.D. Bandrauk, K.D. Truong and C. Carlone 66 (1982) 293
Analysis of the infrared emission and absorption spectra from isotopic CO molecules in solid α-CO, N. Legay-Sommaire and F. Legay 66 (1982) 315
Energy selection experiments in glassy matrices: the fluorescence spectrum of a synthetic isobacteriochlorin, F.A. Burkhalter and U.P. Wild 66 (1982) 327
Laser induced fluorescence spectroscopy of NaLi in beam and bulk, F. Engelke, G. Ennen and K.H. Meiwes 66 (1982) 391
Spectroscopy of the fluorene molecule in planar supersonic expansions, A. Amirav, U. Even and J. Jortner 67 (1982) 1
An approach to laser–molecule dynamics using raising and lowering operators, S. Leasure 67 (1982) 83
Emission cross sections from fragments produced by electron impact on silane, J. Perrin and J.P.M. Schmitt 67 (1982) 167
Translational spectroscopy of electron impact dissociation of molecules isoelectronic with Ne by Doppler profile measurements of Balmer-α emission, N. Kouchi, M. Ohno, K. Ito, N. Oda and Y. Hatano 67 (1982) 287
Optically resolved zero field splittings in the phosphorescence spectra of aromatic thioketones, M.-R. Taherian and A.H. Maki 68 (1982) 179
Sharp line vibronic spectra of chlorophyll and its derivatives in solid solutions, K.K. Rebane and R.A. Avarmaa 68 (1982) 191
Calculations of the Auger transition rates in molecules. I. Effect of the nonspherical potential: application to CH_4, M. Higashi, E. Hiroike and T. Nakajima 68 (1982) 377
The magnetic circular dichroism of KBr:Sn^{2+} A. Scacco, P.W.M. Jacobs and M.J. Stillman 68 (1982) 473
Strong non-Condon effects induced by electron correlation: N_2O^+, H. Köppel, L.S. Cederbaum and W. Domcke 69 (1982) 175
High-resolution diode laser spectroscopy of CO in solid N_2: effect of dipolar broadening on vibrational transitions, H. Dubost, R. Charneau and M. Harig 69 (1982) 389
Simulation of Doppler profiles of atomic radiation excited by molecular dissociation. The effect of population of magnetic sublevels, N. Kouchi, K. Ito, Y. Hatano and N. Oda 70 (1982) 105
Raman excitation profiles for some A_g modes of biphenyl in the pre-resonance region, A. Bree, R. Zwarich and C. Taliani 70 (1982) 257
Resonance Raman studies on $[FeCl_4]^-$ and $[FeBr_4]^-$, R.J.H. Clark and T.J. Dines 70 (1982) 269

Relaxation phenomena

Picosecond fluorescence depolarisation measured by frequency conversion, G.C. Beddard, T. Doust and G. Portier 61 (1981) 17
Theory of ligand-induced non-radiative relaxation in lanthanide complexes, D.S. Ray and M. Chowdhury 61 (1981) 157

The predissociation of molecular oxygen cations $O_2^+(\tilde{B}\ ^2\Sigma_g)$, R. Bombach, A. Schmelzer and J.-P. Stadelmann 61 (1981) 214
Viscosity dependent radiationless relaxation rate of cyanine dyes. A picosecond laser spectroscopy study, V. Sundström and T. Gillbro 61 (1981) 257
An ICR study of sequential two-photon dissociation of benzene, cyanobenzene and bromobenzene molecular ions, P.N.T. van Velzen and W.J. van der Hart 61 (1981) 325
Close-coupling calculations of the cross sections and relaxation rates for ro-vibrational transitions in H_2 colliding with He, T. Orlikowski 61 (1981) 405
Internal rotation of para-substituted phenols. A low temperature dielectric relaxation study, J. le G. Gilchrist 61 (1981) 443
Decay kinetics of Kr^+ levels populated by ArF laser radiation, D.J. Wren and D.W. Setser 62 (1981) 43
A theoretical study of depolarized Rayleigh spectral linewidths in gases, A.F. Turfa and H.F.P. Knaap 62 (1981) 57
Vibrational transitions in excited states of molecules using coherent Stokes Raman spectroscopy: application to ferrocytochrome-c, J.R. Andrews, R.M. Hochstrasser and H.P. Trommsdorff 62 (1981) 87
Pressure and temperature dependence of the proton and deuteron spin–lattice relaxation times in liquid H_2S and D_2S, J. Hauer, E.W. Lang, and H.-D. Lüdemann 62 (1981) 195
Molecular beam diagnostics by Raman scattering, G. Luijks, S. Stolte and J. Reuss 62 (1981) 217
Concentration and temperature dependence of electronic and vibrational energy relaxation of O_2 in liquid mixtures, B. Faltermeier, R. Protz and M. Maier 62 (1981) 377
Itinerant oscillation with a cosine potential, M. Ferrario, M.W. Evans and W.T. Coffey 62 (1981) 481
The photophysics of tertiary aliphatic amines, C.G. Cureton, K. Hara, D.V. O'Connor and D. Phillips 63 (1981) 31
Investigation of T_1- and T_2-relaxation under the influence of a pump radiation, W. Schrepp and H. Mäder 63 (1981) 113
Raman linewidth study of vibrational relaxation of benzonitrile in solution, K. Tanabe 63 (1981) 135
Concentration dependence of the vibrational energy relaxation of O_2 in liquid mixtures, E.W. Knapp and S.F. Fischer 63 (1981) 203
On the vibrational structure of methyl iodide. I. Cubic and quartic normal mode coupling constants, R. Zygan-Maus and S.F. Fischer 63 (1981) 475
On the vibrational structure of methyl iodide. II. Relaxation pathways in the 3000 cm^{-1} energy regime, R. Zygan-Maus and S.F. Fischer 63 (1981) 485
Picosecond observation of fluorescence from B_u states of diphenylpolyenes, T.C. Felder, K.-J. Choi and M.R. Topp 64 (1982) 175
Slow electronic spin relaxation in high spin hexakis (pyridine-N-oxide)iron(II)perchlorate, G.H.M. Calis, A.E.M. Swolfs and J.M. Trooster 64 (1982) 259
Lineshape of rotationally predissociated van der Waals molecules: predicted infrared spectrum of $Ar–N_2$, J.A. Beswick and M. Shapiro 64 (1982) 333
Dielectric relaxation of amines by inversion and internal rotation, J. Gilchrist 65 (1982) 1
Solvent influence on photochemical isomerizations: photophysics of DODCI, S.P. Velsko and G.R. Fleming 65 (1982) 59
Radiative lifetimes of metastable states of free radicals. II. PF $b\ ^1\Sigma^+$ and CO $a\ ^3\Pi$, F.R. Burden, M.A.A. Clyne and A. Fontijn 65 (1982) 123
Electronic transitions of vanadyl phthalocyanine in solution and in the solid state, T.-H. Huang and J.H. Sharp 65 (1982) 205
The thermodynamic driving force in mutual diffusion of hard spheres, J.M. Schurr 65 (1982) 217

The effect of intramolecular modes on the velocity of non-radiative transitions in a polar medium, A.B. Helman 65 (1982) 271
Brillouin scattering in liquid mixtures: $CCl_4/CHCl_3$, D. Samios, Th. Dorfmüller and A. Asenbaum 65 (1982) 305
Theory of the decay of the fluorescence polarization anisotropy of macromolecules with local cylindrical symmetry, J.M. Schurr 65 (1982) 417
Temperature and deuterium effects on the phosphorescence lifetimes of dimethylbenzaldehydes in durene single crystals, A. Despres, V. Lejeune and E. Migirdicyan 66 (1982) 57
Electrolyte dissipation effects on polyion diffusion in low ionic strength buffers, K.S. Schmitz 66 (1982) 177
Electrolyte polarization effects on polyion diffusion in low ionic strength buffers, K.S. Schmitz, N. Parthasarathy and E. Vottler 66 (1982) 187
Influence of solvent viscosity on excited state lifetime and fluorescence quantum yield of dye molecules, B. Wilhelmi 66 (1982) 351
Measurement of vibration–vibration pumped population distribution in nitric oxide, R.C. Bergman, M.J. Williams and J.W. Rich 66 (1982) 357
Initial vibrational distribution and relaxation of $^3CF_2$ produced in the reaction of oxygen atoms with tetrafluoroethylene, S. Koda 66 (1982) 383
Non-maxwellian velocity distributions and molecular beam intensities in sonic nozzle expansions, C.E. Klots 67 (1982) 75
Symmetry distortions and pseudo-Jahn–Teller effect of peri- and cata-hexabenzocoronene in their triplet states as observed by ODMR techniques, C. Bräuchle 67 (1982) 97
Fluorescence polarization anisotropy and kinetics of malachite green measured as a function of solvent viscosity, F. Pellegrino, A. Dagen and R.R. Alfano 76 (1982) 111
Coherent state versus localized state quantum dynamics of isomerization reactions, P. Russegger 67 (1982) 161
Position dependent deuterium effects on the vapor phase fluorescence lifetimes of tetradeuterophenanthrenes, J.J. O'Brien, M.D. Horne, B.K. Selinger and B.R. Henry 68 (1982) 123
Kinetic observations on the E region states of iodine excited by two-photon spectroscopy, G.W. King, I.M. Littlewood and J.R. Robins 68 (1982) 129
Acoustic anomaly in a critical binary mixture of aniline and cyclohexane at low and ultrasonic frequencies, H. Tanaka, Y. Wada and H. Nakajima 68 (1982) 223
Theory of the time-dependent-thermal-lensing (TSTL) technique as used in energy-transfer experiments, J.R. Barker and T. Rothem 68 (1982) 331
Time-dependent-thermal-lensing (TDTL) studies on gas-phase azulene, P.L. Trevor, T. Rothem and J.R. Barker 68 (1982) 341
Gas phase thermal diffusivities by a thermal lens technique, R.T. Bailey, F.R. Cruickshank, D. Pugh, A. McLeod and W. Johnstone 68 (1982) 351
Dephasing in isolated one-dimensional quantum systems, J. Brickmann and P. Russegger 68 (1982) 369
X-ray photoelectron spectra of 2-propenal and related compounds, G. Distefano, M. Guerra, D. Jones and A. Modelli 68 (1982) 383
ESR studies of non-silicate inorganic glasses through their glass transformation ranges, R. Parthasarathy, K.J. Rao and C.N.R. Rao 68 (1982) 393
Modeling of the fast photoisomerisation process in polymethine dyes, S.K. Rentsch 69 (1982) 81
Further development and application of the ECS scaling theory: non-linear molecules, A.M. Richard and A.E. DePristo 69 (1982) 273
High-resolution diode laser spectroscopy of CO in solid N_2: effect of dipolar broadening on vibrational transitions, H. Dubost, R. Charneau and M. Harig 69 (1982) 389

On statistics of an ensemble of oscillators under excitation. III. Quantum non-linear oscillators with fast phase relaxation in a non-monochromatic external field, V.N. Sazonov, A.A. Stuchebrukhov and S.V. Zatsepin 69 (1982) 459
Gas-phase phosphorescence of thioformaldehyde, D.J. Clouthier and C.M.L. Kerr 70 (1982) 55
Experimental angular velocity correlation functions for $CHCl_3$, B. Janik, J. Ściesiński, M.W. Evans, E. Kluk, and T. Grochulski 70 (1982) 77
Simulation of relaxation by binary collisions: comparison with relaxation in a fluid for bromine in argon, D.L. Jolly, B.C. Freasier, N.D. Hamer and S. Nordholm 70 (1982) 127
Circulation reactions. IV. Applicability of phenomenological reaction rate constants: a stochastic approach, A.V. Zubkov 70 (1982) 157
On the calculation of classical time-correlation functions: diagonalization of the "Liouville matrix", J.W. Allen and D. J. Diestler 70 (1982) 241
Resonance Raman studies on $[FeCl_4]^-$ and $[FeBr_4]^-$, R.J.H. Clark and T.J. Dines 70 (1982) 269
Relaxation of dihaloacetylene cations in their $\tilde{A}$ and $\tilde{B}$ states studied by photoelectron–photon coincidence spectroscopy, J.P. Maier and F. Thommen 70 (1982) 325

Energy transfer and conversion
Chemiluminescent spectra of $C_2^*(d\,^3\Pi_g - a\,^3\Pi_u)$ and deactivation of the $C_2^*\ d\,^3\Pi_g$ state in Na vapor, Wang X.Y., Li X.C. and Lou N.Q. 61 (1981) 25
Activation threshold for vibrational excitation in $K-N_2$ collisions, U. Ross, W. Schepper and D. Beck 61 (1981) 95
Theory of ligand-induced non-radiative relaxation in lanthanide complexes, D.S. Ray and M. Chowdhury 61 (1981) 157
A calculation of the temperature dependent radiationless decay of the propynal triplet state T_1, P. Russegger and J.R. Huber 61 (1981) 205
Gas/gas and gas/wall energy transfer functions in the multichannel thermal decomposition of chloroethane-2-d_1, K.D. King, T.T. Nguyen and T.S. Gilbert 61 (1981) 221
On the forced harmonic oscillator with time-dependent frequency, H.-D. Meyer 61 (1981) 365
Semiclassical calculation of energy transfer in polyatomic molecules. VI. On the theory for linear triatomic molecules, G.D. Billing 61 (1981) 415
Excited state dynamics of $C_2O(\tilde{A}\,^3\Pi_i)$, W.M. Pitts, V.M. Donnelley, A.P. Baronavski and J.R. McDonald 61 (1981) 465
Importance of correlation energy in collision dynamics: quasiclassical trajectory study of collinear $He + K_2^+(v') \rightarrow HeH^+ + H$ using HF and CI potential-energy surfaces, N. Sathyamurthy 62 (1981) 1
Trajectory studies of collinear collision between a particle and a non-linear oscillator in a laser field, D.W. Noid and W.-K. Liu 62 (1981) 37
Comment on "V–V transfer rates for high-lying states of CO". I, Ph. Bréchignac 62 (1981) 239
A further analysis of V–V transfer rates for high-lying states of CO, A.E. DePristo and H. Rabitz 62 (1981) 243
Comment on "V–V transfer rates for high-lying states of CO". II, Ph. Bréchignac 62 (1981) 248
Concentration and temperature dependence of electronic and vibrational energy relaxation of O_2 in liquid mixtures, B. Faltermeier, R. Protz and M. Maier 62 (1981) 377
Vibrational energy transfer and relaxation processes in CH_3Br. A detailed kinetic analysis of lower vibrational levels, A.J. Ouderkirk, V.A. Apkarian and E. Weitz 62 (1981) 387
Scaling relationships in photoelectron–photoion coincidence studies: the acetone ion dissociation, K. Johnson, I. Powis and C.J. Danby 63 (1981) 1
Determination of the translational energy of $O(3s\ ^3S)$ excited in the dissociative excitation of O_2 and NO by He $*(2\ ^3S)$, L.G. Piper and M.A.A. Clyne 63 (1981) 77

Concentration quenching of pyrene $^1B_{1u}$ in the vapour phase, A. Davis, M.J. Pilling and M.J. Westby 63 (1981) 209
Study of multiphoton excitation of SF_6 molecules in two strong IR laser fields, E. Borsella, R. Fantoni, G. Petrocelli, G. Sanna, M. Capitelli and M. Dilonardo 63 (1981) 219
Photodissociation of vibrationally excited CH_3Br, P.F. Zittel and D.D. Little 63 (1981) 227
The Monte Carlo simulation of energy transfer processes in thermal unimolecular reactions. III. The simulation of pressure dependent behaviour, P.V. Sellers and A.J. Stace 63 (1981) 237
A high energy classical trajectory study of the reactions $O(^3P) + H_2 \rightarrow OH + H$ and $O(^3P) + H_2 \rightarrow O + H + H$, Z.B. Alfassi and M. Baer 63 (1981) 275
Time resolved vibrational chemiluminescence: rate constants for the reactions $F + HBr$, $HI \rightarrow HF + Br$, I and for the relaxation of $HF(v = 4)$ and $HF(v = 6)$ by HBr, HI, CO_2, N_2O, CO, N_2 and O_2, I.W.M. Smith and D.J. Wrighley 63 (1981) 321
Curve crossing and vibrational predissociation of van der Waals molecules, G.W. Ewing 63 (1981) 411
Stochastic theory for molecular collisions in the perturbed stationary state formulation, G. Jolicard and G.D. Billing 64 (1982) 123
Classical dynamics of multiphoton dissociation for a model system, D.L. Martin and R.E. Wyatt 64 (1982) 203
Donor fluorescence decay in solid solution, R. Twardowski, J. Kuśba and C. Bojarski 64 (1982) 239
The CO–He system revisited: V–T collisional relaxation from ab initio potentials, F.A. Gianturco, U.T. Lamanna and G. Petrella 64 (1982) 299
Vibrational excitation of SF_6 in collisions with He atoms, D.C. Clary 64 (1982) 413
Ab initio computation of vibrational relaxation rate coefficients for the collisions of CO_2 with helium and neon atoms, D.C. Clary 65 (1982) 247
Brillouin scattering in liquid mixtures: $CCl_4/CHCl_3$, D. Samios, Th. Dorfmüller and A. Asenbaum 65 (1982) 305
Comparison of quantum mechanical and semiclassical (classical path) probabilities for vibrational transitions in diatom–diatom collisions, G.D. Billing and G. Jolicard 65 (1982) 323
Dissociative excitation of water by metastable argon, H.L. Snyder, B.T. Smith, T.P. Parr and R.M. Martin 65 (1982) 397
Lifetimes and transition moment of the A–X band system of Bi_2, G. Ehret and G. Gerber 66 (1982) 27
Non-equilibrium dissociation and ionization of nitrogen in electrical discharges: the role of electronic collisions from vibrationally excited molecules, M. Cacciatore, M. Capitelli and C. Gorse 66 (1982) 141
Inhibition, antiinhibition and enhancement of positronium formation in some different hydrocarbon–solute mixture, G. Wikander 66 (1982) 227
Measurement of vibration–vibration pumped population distributions in nitric oxide, R.C. Bergman, M.J. Williams and J.W. Rich 66 (1982) 357
Delayed fluorescence from the lowest $^1B_{3u}^+$ state of anthracene, due to hetero-triplet–triplet annihilation of ^{3}anthracene* and ^{3}xanthone*, B. Nickel and G. Roden 66 (1982) 365
Photofragmentation of $SnCl_2$ at 193 nm, N.J.A. van Veen, G.N.A. van Veen, M.S. de Vries and A.E. de Vries 66 (1982) 465
Semiclassical calculation of energy transfer in polyatomic molecules. VII. Intra- and intermolecular energy transfer in $N_2 + CO_2$, G.D. Billing 67 (1982) 35
The phase modulated semiclassical sudden approximation. Study of the transitions $v = 1$, $j \rightarrow v = 0, j'$ in the $pH_2 + He^4$ system, A. Grosjean and G. Jolicard 67 (1982) 139
Competitive collisional activation in vibrational energy transfer with cyclopropane-$1t_1$-$2,2d_2$. A three-channel system, V.V. Krongauz and B.S. Rabinovitch 67 (1982) 201
Vibrational energy relaxation of high density HCl fluid in the 150–345 K range, J. Chesnoy and D. Ricard 67 (1982) 347

Classical model studies of polyatomic direct photofragmentation, M.D. Pattengill 68 (1982) 73
Detailed energy partitioning in the decomposition of chemically energized C_2H_3F, D.J. Donaldson, D.G. Watson and J.J. Sloan 68 (1982) 95
Laser induced fluorescence study of the first part of a Na/Na_2 free jet expansion: dimer formation and excitation-energy transfer, F. Aerts, H. Hulsman and P. Willems 68 (1982) 233
$SO(B^3\Sigma^-, A^3\Pi - X^3\Sigma^-)$ emission from low temperature rare gas–sulfur dioxide afterglows, K.T. Wu, H. Morgner and A.J. Yencha 68 (1982) 285
A shock tube study of vibrational relaxation in pure N_2O, and mixtures of N_2O with argon, helium-4, helium-3, deuterium, hydrogen deuteride, normal and para-hydrogen, C.J.S.M. Simpson, P.D., Gait, T.J. Price and M.G. Foster 68 (1982) 293
Atom–molecule sudden theory of scattering: ab initio corrections and range of validity of the collision model, E. Ficocelli Varracchio and R. Celiberto 68 (1982) 303
The role of memory effects in stochastic approach to collinear diatom–diatom collisions, A.J. Makowski 68 (1982) 317
Intermediate coupling approach to the collisional stabilization step in ternary ion–molecule association reactions, E. Herbst 68 (1982) 323
Theory of the time-dependent-thermal-lensing (TSTL) technique as used in energy-transfer experiments, J.R. Barker and T. Rothem 68 (1982) 331
Time-dependent-thermal-lensing (TDTL) studies on gas-phase azulene, P.L. Trevor, T. Rothem and J.R. Barker 68 (1982) 341
Master equation description of the multiphoton decomposition of ethyl acetate, J.E. Eberhardt, R.B. Knott, A.W. Pryor and R.G. Gilbert 69 (1982) 45
Rotational rainbows in atom–rigid rotor scattering: a comparison of the classical IOS approximation with classical trajectory calculations, H.J. Korsch and D. Poppe 69 (1982) 99
On the calculation of classical vibrational energy exchange, J.P. Gibbons and J.D. Stettler 69 (1982) 141
Further development and application of the ECS scaling theory: non-linear molecules, A.M. Richard and A.E. De Pristo 69 (1982) 273
Dynamic constraints associated with the formation of $SiS(a^3\Sigma^+)$ from the Si–OCS chemiluminescent reaction, J.L. Gole and G.J. Green 69 (1982) 357
O_3 photolysis at 248 nm and $O(^1D_2)$ quenching by H_2O, CH_4, H_2, and N_2O: $O(^3P_J)$ yields, P.H. Wine and A.R. Ravishankara 69 (1982) 365
Observation of new bands in the N_2 Herman infrared system and kinetic study of its formation in a pulsed-discharge apparatus, I. Nadler, A. Rotem and S. Rosenwaks 69 (1982) 375
Theoretical probabilities of V–V energy transfer: CO with isotopes of N_2 and deactivation of laser-excited SO_2, V. Revelant and C. Manzanares I. 69 (1982) 473
Classical path calculation of differential cross sections for rotational excitation of CO colliding with D_2 at 87.2 meV, G.D. Billing, and L.L. Poulsen 70 (1982) 119
Simulation of relaxation by binary collisions: comparison with relaxation in a fluid for bromine in argon, D.L. Jolly, B.C. Freasier, N.D. Hamer and S. Nordholm 70 (1982) 127
Electronic excited state transport and trapping in one- and two-dimensional disordered systems, R.F. Loring and M.D. Fayer 70 (1982) 139
On a semiclassical approach to energy transfer by atom/molecule–surface collisions, G.D. Billing 70 (1982) 223
Near-infrared-induced conformational isomerization of 2-chloroethanol in an argon matrix, H. Takeuchi and M. Tasumi 70 (1982) 275
Energy-dependent incoherent singlet exciton motion in an amorphous organic solid (polyvinylcarbazole), K.-D. Rockwitz and H. Bässler 70 (1982) 307
Vibrational relaxation of deuterium in argon fluid, P. Roussignol, C. Delalande and G.M. Gale 70 (1982) 319

Relaxation of dihaloacetylene cations in their $\tilde{A}$ and $\tilde{B}$ states studied by photoelectron-photon coincidence spectroscopy, J.P. Maier and F. Thommen 70 (1982) 325

Reactions

Rate coefficients for the combination of metastable and ground state mercury atoms into excited dimer states, A.B. Callear, C.P. Devonport and D.R. Kendall 61 (1981) 65

Photofragmentation of triatomic molecules. Theory of angular and state distribution of product fragments G.G. Balint-Kurti and M. Shapiro 61 (1981) 137

The rotating rod model: opacity, excitation, deflection and angular distribution functions from collinear reaction probabilities, N. Agmon 61 (1981) 189

Gas/gas and gas/wall energy transfer functions in the multichannel thermal decomposition of chloroethane-2-d_1, K.D. King, T.T. Nguyen and T.G. Gilbert 61 (1981) 221

Energetics and mechanism for hydroxyl radical production from the Pt-catalyzed decomposition of water, L.D. Talley and M.C. Lin 61 (1981) 249

Periodic orbitals, adiabaticity and stability, E. Pollak 61 (1981) 305

Analysis of kinetic models for the tunnel electron transfer reactions. Reaction kinetics for various radial and angular dependence of the tunneling probability, A.B. Doktorov, R.F. Khairutdinov and K.I. Zamaraev 61 (1981) 351

Importance of correlation energy in collision dynamics: quasiclassical trajectory study of collinear $He + H_2^+(v') \rightarrow HeH^+ + H$ using HF and CI potential-energy surfaces, N. Sathyamurthy 62 (1981) 1

Intramolecular electron localization and local-density calculations on silicon-containing molecules: tetramethylsilane and hexamethyldisilane, Z. Berkovitch-Yellin, D.E. Ellis and M.A. Ratner 62 (1981) 21

Photoionization study of the kinetics of unimolecular decomposition of halobenzene ions, S.T. Pratt and W.A. Chupka 62 (1981) 153

Strong collision rate coefficients in unimolecular reaction rate theory, S. Nordholm and H.W. Schranz 62 (1981) 459

Scaling relationships in photoelectron–photoion coincidence studies: the acetone ion dissociation, K. Johnson, I. Powis and C.J. Danby 63 (1981) 1

Unsteady kinetics of transport-controlled reactions between strongly interacting particles, A.A. Ovchinnikov and S.F. Burlatsky 63 (1981) 67

The Monte Carlo simulation of energy transfer processes in thermal unimolecular reactions. III. The simulation of pressure dependent behaviour, P.V. Sellers and A.J. Stace 63 (1981) 237

A high energy classical trajectory study of the reactions $O(^3P) + H_2 \rightarrow OH + H$ and $O(^3P) + H_2 \rightarrow O + H + H$, Z.B. Alfassi and M. Baer 63 (1981) 275

The dynamics of the F/HNCO and F/HNF reactions, J.J. Sloan, D.G. Watson, and J.S. Wright 63 (1981) 283

Time resolved vibrational chemiluminescence: rate constants for the reactions $F + HBr$, $HI \rightarrow HF + Br$, I and for the relaxation of $HF(v = 4)$ and $HF(v = 6)$ by HBr, HI, CO_2, N_2O, CO, N_2 and O_2, I.W.M. Smith and D.J. Wrighley 63 (1981) 321

Bifurcation and coexistence of several limit cycles in models of open two-variable quadratic mass-action systems, C. Escher 63 (1981) 337

Strict Lindemann behaviour because of an activation bottleneck, S.R. Vatsya and H.O. Pritchard 63 (1981) 383

Picosecond proton transfer studies in water–alcohols solutions, D. Huppert and E. Kolodney 63 (1981) 401

Ion transport in polar gases, K. Sakimoto 63 (1981) 419

The SrCl (A–X, B–X) bands in thermal and non-thermal reactive excitation using metastable Sr atoms, U. Brinkmann, V.H. Schmidt and H. Telle 64 (1982) 19
Vibrational and translational enhancement of endothermic reactions: K + HCl ($v = 0,1$) and K + HF ($v = 0,1$), F. Heismann and H.J. Loesch 64 (1982) 43
Mutual effect of nuclei upon CINDP in high fields. Violation of the Kaptein rules, K.M. Salikhov 64 (1982) 371
Mechanism of the metastable reaction $H_2S^+ \rightarrow S^+ + H_2$; product energy distribution and their dependence on temperature, M.F. Jarrold, A.J. Illies and M.T. Bowers 65 (1982) 19
The reaction $X + Cl_2 \rightarrow XCl + Cl$ (X = Mu, H, D). II. Comparison of experimental data with theoretical results derived from a new potential energy surface, J.N.L. Connor, W. Jakubetz, A. Laganà, J. Manz and J.C. Whitehead 65 (1982) 29
Laser diagnostics of the surface catalyzed equilibrium $2Na–Na_2$, J.P. Woerdman and S.S. Eskildsen 65 (1982) 83
The kinetics of the photochemical hydrogen abstraction in crystals of fluorene doped with acridine, J.P. Colpa and D. Stehlik 65 (1982) 97
Theoretical models for activation of CO_2 towards hydration ($CO_2 + H_2O \rightarrow H_2CO_3$) by cationic binding sites, Y. Jean and F. Volatron 65 (1982) 107
Energy partitioning in the reaction $O(^1D) + H_2O \rightarrow OH + OH$. V. Rotational relaxation of $OH(X\,^2\Pi, v'', j'')$, K.-H. Gericke and F.J. Comes 65 (1982) 113
Dynamics of CO formation in the photodissociation of HNCO and CH_2CO at 193 nm, G.T. Fujimoto, M.E. Umstead and M.C. Lin 65 (1982) 197
The effect of intramolecular modes on the velocity of non-radiative transitions in a polar medium, A.B. Helman 65 (1982) 271
Dissociative excitation of water by metastable argon, H.L. Snyder, B.T. Smith, T.P. Parr and R.M. Martin 65 (1982) 397
Generalized lagrangian equations of nonlinear reaction–diffusion, M.A. Biot 66 (1982) 11
Molecular beam chemiluminescence: excitation functions for reactions of barium atoms with NO_2-monomers and $(NO_2)_n$-clusters, D.J. Wren and M. Menzinger 66 (1982) 85
Enhancement of low-temperature chemical reactions in phase transitions, Yu.I. Dakhnovskii, A.A. Ovchinnikov and V.A. Benderskii 66 (1982) 93
Non-equilibrium dissociation and ionization of nitrogen in electrical discharges: the role of electronic collisions from vibrationally excited molecules, M. Cacciatore, M. Capitelli and C. Gorse 66 (1982) 141
Building-up principles for diradical states, A. Ceulemans 66 (1982) 169
Electron impact dissociation of molecular hydrogen and deuterium: translational energy distribution of atomic hydrogen and deuterium ($n = 3, 4, 5$), M. Higo, S. Kamata and T. Ogawa 66 (1982) 243
Initial vibrational distribution and relaxation of $^3CF_2$ produced in the reaction of oxygen atoms with tetrafluoroethylene, S. Koda 66 (1982) 383
Double ionization of methane, P.E.M. Siegbahn 66 (1982) 443
Theory of sorption of gases on polymers. I. Conformational effects and the double-sigmoid shape of sorption isotherm, M. Pyda and J. Kurzyński 67 (1982) 7
Determination of bifurcation in chemical systems. An experimental method, J. Masełko 67 (1982) 17
Electron exchange effect on CIDNP formation in electron transfer reactions, A.I. Kruppa, T.V. Leshina, R.Z. Sagdeev, K.M. Salikhov and F.S. Sarvarov 67 (1982) 27
Coherent state versus localized state quantum dynamics of isomerization reactions, P. Russegger 67 (1982) 161

Competitive collisional activation in vibrational energy transfer with cyclopropane-$1t_1$-$2,2d_2$. A three-channel system, V.V. Krongauz and B.S. Rabinovitch 67 (1982) 201
The mechanism of NO_3^- formation from gaseous ethyl nitrate, S. Włodek, Z. Łuczyński and H. Wincel 67 (1982) 221
Double Hopf-bifurcation in plane quadratic mass-action systems, C. Escher 67 (1982) 239
Low temperature chemical reactions. I. Models, V.A. Benderskii, P.G. Philippov, Yu.I. Dakhnovskii and A.A. Ovchinnikov 67 (1982) 301
Motion of polymer chains in a molecular crystal, M.V. Basilevsky and S.I. Petrochenko 67 (1982) 319
The topography of potential energy surfaces, M.V. Basilevsky 67 (1982) 337
Detailed energy partitioning in the decomposition of chemically energized C_2H_3F, D.J. Donaldson, D.G. Watson and J.J. Sloan 68 (1982) 95
Monte Carlo calculations of classical density of states for non-separable polyatomic potential energy surfaces, S.C. Farantos, J.N. Murrell and J.C. Hajduk 68 (1982) 109
Slip planes crystal growth and the photodimerisation of anthracene, G.M. Crisp and S.H. Walmsley 68 (1982) 213
Energy disposal in the rotational pre-dissociation of ND_3^+, I. Powis 68 (1982) 251
Laser induced fluorescence study of thermal energy charge transfer reactions from $Ar^+(^2P_{1/2}, ^2P_{3/2})$ and $CO^+(X\ ^2\Sigma, v'')$ to CO, J. Danon and R. Marx 68 (1982) 255
Intermediate coupling approach to the collisional stabilization step in ternary ion–molecule association reactions, E. Herbst 68 (1982) 323
Thermal dissociation of diatomic molecules with bound electronically excited states, N.M. Kuznetsov and A.M. Samusenko 68 (1982) 359
Temperature dependence of the $C_2(X\ ^1\Sigma_g^+)$ reaction with H_2 and CH_4 and $C_2(X\ ^1\Sigma_g^+$ and $a\ ^3\Pi_u$ equilibrated states) with O_2, W.M. Pitts, L. Pasternack and J.R. McDonald 68 (1982) 417
CEPA calculations of potential energy surfaces for open-shell systems. II. The reaction of C^+ ions with molecular hydrogen, R. Jacquet and V. Staemmler 68 (1982) 479
Master equation description of the multiphoton decomposition of ethyl acetate, J.E. Eberhardt, R.B. Knott, A.W. Pryor and R.G. Gilbert 69 (1982) 45
Absolute rate constants for the reactions of $CH(X\ ^2\Pi)$ with NO, N_2O, NO_2 and N_2 at room temperature, S.S. Wagal, T. Carrington, S.V. Filseth and C.M. Sadowski 69 (1982) 61
Semi-empirical potential energy surfaces for the linear HXY (X, Y = F, Cl, Br, I) systems, I. Last 69 (1982) 193
Steric factor in diffusion-controlled chemical reactions, V.M. Berdnikov and A.B. Doktorov 69 (1982) 205
Charge transfer between helium ions and metastable helium, R.H. Neynaber and S.Y. Tang 69 (1982) 213
A comparison of tunneling transfer theories for asymmetric isomerization reactions, P.H. Cribb, S. Nordholm and N.S. Hush 69 (1982) 259
Quasiclassical trajectory calculations for $H + H_2$ ($v = 0$, 1) on a potential energy surface from force field data, A.J.C. Varandas 69 (1982) 295
Dynamic constraints associated with the formation of $SIS(a\ ^3\Sigma^+)$ from the Si–OCS chemiluminescent reaction, J.L. Gole and G.J. Green 69 (1982) 357
O_3 photolysis at 248 nm and $O(^1D_2)$ quenching by H_2O, CH_4, H_2, and N_2O: $O(^3P_J)$ yields, P.H. Wine and A.R. Ravishankara 69 (1982) 365
Determination of the rate constant of reaction of $N(^4S_{3/2})$ with NO_2 using resonance fluorescence in a discharge flow system, M.A.A. Clyne and Y. Ono 69 (1982) 381
The reaction of F atoms with acetyldehyde and ethylene oxide. Vibrational spectra of the CH_3CO and CH_2CHO free radicals trapped in solid argon, M.E. Jacox 69 (1982) 407

Dynamics of ion–molecule processes: a crossed-beam study of the reaction $B^+(^3P) + H_2 \rightarrow BH^+ + H$, B. Friedrich and Z. Herman 69 (1982) 433
ENDOR of quintet-state bicarbenes in diacetylene single crystals, W. Hartl and M. Schwoerer 69 (1982) 443
Theoretical study of the kinetic isotope effect in proton-transfer reactions. Influence of the interaction potential of reactants on the kinetic isotope effect, J. Sühnel and K. Gustav 70 (1982) 109
Circulation reactions. IV. Applicability of phenomenological reaction rate constants: a stochastic approach, A.V. Zubkov 70 (1982) 157
Density and flux analysis for the collinear $H + H_2$ reaction, E. Pollak, J.F. McNutt and R.E. Wyatt 70 (1982) 207
Hydrogen-bonded complex between HNO and formaldehyde. Photolysis of methyl nitrite in an argon matrix, R.P. Müller, P. Russegger and J.R. Huber 70 (1982) 281
A photoelectron–photoion coincidence study of acetaldehyde and ethylene oxide molecular ions, K. Johnson, I. Powis and C.J. Danby 70 (1982) 329

Intermolecular interactions
Brillouin scattering and refractive index measurements on low temperature liquids. III. CH_3Cl, CH_2Cl_2, $CHCl_3$ and CHF_3, A. Yoshihara, A. Anderson, R.A. Aziz and C.C. Lim 61 (1981) 1
Moment analysis of the Mori continued fraction: dipole absorption in bromoethane and 1-bromonaphthalene, G.J. Davies, M. Veerappa and M.W. Evans 61 (1981) 73
Activation threshold for vibrational excitation in $K–N_2$ collisions, U. Ross, W. Schepper and D. Beck 61 (1981) 95
Pseudopotential calculations on P_2, P_2^+, P_4 and P_4H^+, U. Wedig, H. Stoll and H. Preuss 61 (1981) 117
Intramolecular electron localization and local-density calculations on silicon-containing molecules: tetramethylsilane and hexamethyldisilane, Z. Berkovitsh-Yellin, D.E. Ellis and M.A. Ratner 62 (1981) 21
Trajectory studies of collinear collision between a particle and a non-linear oscillator in a laser field, D.W. Noid and W.-K. Liu 62 (1981) 37
The effect of strong coupling between vibrations in hydrogen bonds on the polarized spectra of the mercaptobenzothiazole crystal: an "anomalous" isotopic effect, H.T. Flakus 62 (1981) 103
Factors affecting anisotropic reorientation in a series of aromatic molecules dissolved in carbon disulfide, H. Nery, D. Canet and J.L. Rivail 62 (1981) 123
Pressure and temperature dependence of the proton and deuteron spin–lattice relaxation times in liquid H_2S and D_2S, J. Hauer, E.W. Lang and H.-D. Lüdemann 62 (1981) 195
Van der Waals forces, scattering functions and charge density susceptibility. II. Application to the He–He interaction potential, P. Malinowski, A.C. Tanner, K.F. Lee and B. Linder 62 (1981) 423
Spectroscopic studies of interaction and dynamics in the naphthalene: perfluorobiphenyl crystalline complex, R.R. McCaffrey and P.N. Prasad 63 (1981) 13
Unsteady kinetics of transport-controlled reactions between strongly interacting particles, A.A. Ovchinnikov and S.F. Burlatsky 63 (1981) 67
Raman linewidth study of vibrational relaxation of benzonitrile in solution, K. Tanabe 63 (1981) 135
Concentration quenching of pyrene $^1B_{1u}$ in the vapour phase, A. Davis, M.J. Pilling and M.J. Westby 63 (1981) 209
Calculation of the hyperfine spectrum for $H_2–Ne$, $H_2–Ar$, $H_2–Kr$ dimers, M. Waaijer, M. Jacobs and J. Reuss 63 (1981) 247

Analysis of the ortho H_2–para H_2 hyperfine dimer spectrum, M. Waaijer, M. Jacobs and J. Reuss 63 (1981) 257
Measurements of the hyperfine dimer spectrum for H_2–Ne, H_2–Ar, H_2–Kr by the magnetic beam resonance technique, M. Waaijer and J. Reuss 63 (1981) 263
The dynamics of the F/HNCO and F/HNF reactions, J.J. Sloan, D.G. Watson and J.S. Wright 63 (1981) 283
Intramolecular reorientations and the effects of thermal history and hydrogen bonding in four closely related organic molecular solids, M Aronson, P. Beckmann, B. Ross and S.L. Tan 63 (1981) 349
Methyl and tertiarybutyl reorientation in molecular solids, P. Beckmann 63 (1981) 359
Vibrational and translational enhancement of endothermic reactions: K + HCl ($v = 0, 1$) and K + HF($v = 0, 1$), F. Heismann and H.J. Loesch 64 (1982) 43
Intermolecular potential functions and the properties of water, J.R. Reimers, R.O. Watts and M.L. Klein 64 (1982) 95
An EPR determination of the helix pitch and relative handedness of some induced cholesteric mesophases, G. Gottarelli, G.F. Pedulli and C. Zannoni 64 (1982) 143
The CO–He system revisited: V–T collisional relaxation from ab initio potentials, F.A. Gianturco, U.T. Lamanna and G. Petrella 64 (1982) 299
Consistent force field model treatment of the normal coordinate problem of matrix isolated molecules, R. Gunde, P. Felder and Hs.H. Günthard 64 (1982) 313
Ab initio studies on hydrogen bonded chains. II. Equilibrium geometry and vibrational spectra of the bent chain of hydrogen fluoride molecules, A. Beyer and A. Karpfen 64 (1982) 343
Spectra of direct excitation of phosphorescence in an isotopic mixed naphthalene crystal. High resolution excitation of the two Davydov components of the N-d_8 host crystal, Ph. Pee, J.P. Lemaistre, F. Dupuy, R. Brown, J. Megel and Ph. Kottis 64 (1982) 389
Vibrational excitation of SF_6 in collisions with He atoms, D.C. Clary 64 (1982) 413
Applying the polarization model to selected ionic substances, P. Turner, E.E. David and C.W. David 64 (1982) 437
The reaction $X + Cl_2 \rightarrow XCl + Cl$ (X = Mu, H, D). II. Comparison of experimental data with theoretical results derived from a new potential energy surface, J.N.L. Connor, W. Jakubetz, A. Laganà, J. Manz and J.C. Whitehead 65 (1982) 29
Vibrational absorption spectrum of solid CO in the first harmonic region. Two-phonon transition, F. Legay and N. Legay-Sommaire 65 (1982) 49
The electric saturation of molecular alignment in liquid nitrobenzene as studied by NMR, T.M. Plantenga, F.J.J. de Kanter, H. Bulsink and C. MacLean 65 (1982) 77
Theoretical models for activation of CO_2 towards hydration ($CO_2 + H_2O \rightarrow H_2CO_3$) by cationic binding sites, Y. Jean and F. Volatron 65 (1982) 107
Dynamic instabilities in excited molecular crystals. Packing calculations in anthracenic systems, D.P. Graig and C.P. Mallett 65 (1982) 129
Ab initio computation of vibrational relaxation rate coefficients for the collisions of CO_2 with helium and neon atoms, D.C. Clary 65 (1982) 247
Studies of quadrupolar and dipolar electric field effects in the NMR spectra of binary mixtures of liquids, T.M. Plantenga, P.C.M. van Zijl and C. MacLean 66 (1982) 1
Sensitized dissociation of UF_6, $XeOF_4$ and SF_5Cl by SF_6 excited with a pulsed CO_2 laser, C. Ângelie, M. Cauchetier and J. Paris 66 (1982) 129
Inhibition, antiinhibition and enhancement of positronium formation in some different hydrocarbon–solute mixtures, G. Wikander 66 (1982) 227

Photochemical formation of complexed HNO in low temperature matrices, R.P. Müller, S. Murata and J.R. Huber 66 (1982) 237
Analysis of the infrared emission and absorption spectra from isotopic CO molecules in solid α-CO, N. Legay-Sommaire and F. Legay 66 (1982) 315
Delayed fluorescence from the lowest $^1B_{3u}^+$ state of anthracene, due to hetero-triplet–triplet annihilation of ^{3}anthracene* and ^{3}xanthone*, B. Nickel and G. Roden 66 (1982) 365
The phase modulated semiclassical sudden approximation. Study of the transitions $v = 1$, $j \rightarrow v = 0, j'$ in the $pH_2 + He^4$ system, A. Grosjean and G. Jolicard 67 (1982) 139
Collision-induced absorption in non-polar molecular liquids: tetrahedral molecules, H.-J. Arning, J. Samios, K. Tibulski and Th. Dorfmüller 67 (1982) 177
Dipole oscillator strength distributions, sums, and dispersion energy coefficients for CO and CO_2, B.L. Jhanwar and W.J. Meath 67 (1982) 185
Vibrational energy relaxation of high density HCl fluid in the 150-345 K range, J. Chesnoy and D. Ricard 67 (1982) 347
An analytical representation of the $H_2 + CO$ potential, L.L. Poulsen 68 (1982) 29
Classical model studies of polyatomic direct photofragmentation, M.D. Pattengill 68 (1982) 73
Nonlinear dielectric study of molecular association of phenyl and of methyl isothiocyanates, M. Dutkiewicz 68 (1982) 83
Laser induced fluorescence study of the first part of a Na/Na_2 free jet expansion: dimer formation and excitation-energy transfer, F. Aerts, H. Hulsman and P. Willems 68 (1982) 233
Energy dependence of the S_1-decay of propynal and propynal-d_1 and the influence of collisions, U. Brühlmann and J.R. Huber 68 (1982) 405
Temperature dependence of the $C_2(X\,^1\Sigma_g^+)$ reaction with H_2 and CH_4 and $C_2(X\,^1\Sigma_g^+)$ and a $^3\Pi_u$ equilibrated states) with O_2, W.M. Pitts, L. Pasternack and J.R. McDonald 68 (1982) 417
On the interatomic potentials for noble gas mixtures, K. Watanabe, A.R. Allnatt and W.J. Meath 68 (1982) 423
Line broadening by diagonal disorder in the vibrational transition of CO in solid α-CO, F. Legay, N. Legay-Sommaire and G. Zumofen 68 (1982) 437
Physical adsorption of a heteronuclear diatomic molecule onto a solid surface: a theoretical approach, W.J. Welsh and D.D. Fitts 68 (1982) 441
The influence of electrostatic interactions on Franck–Condon factors in electron transfer processes, J.W. van Leeuwen and Y.K. Levine 69 (1982) 89
Rotational rainbows in atom–rigid rotor scattering: a comparison of the classical IOS approximation with classical trajectory calculations, H.J. Korsch and D. Poppe 69 (1982) 99
On the calculation of classical vibrational energy exchange, J.P. Gibbons and J.D. Stettler 69 (1982) 141
Overtone spectra of crystalline $CaWO_4$: vibrational exciton density-of-states functions, S.D. Colson and K.N. Wong 69 (1982) 223
Quasiclassical trajectory calculations for $H + H_2(v = 0, 1)$ on a potential energy surface from force field data, A.J.C. Varandas 69 (1982) 295
MCSCF and multi-reference CI calculations of the potential energy surface for ground state H_2O, W.P. Kraemer, B.O. Roos and P.E.M. Siegbahn 69 (1982) 305
Observation of new bands in the N_2 Herman infrared system and kinetic study of its formation in a pulsed-discharge apparatus, I. Nadler, A. Rotem and S. Rosenwaks 69 (1982) 375
High-resolution diode laser spectroscopy of CO in solid N_2: effect of dipolar broadening on vibrational transitions, H. Dubost, R. Charneau and M. Harig 69 (1982) 389
Theoretical probabilities of V–V energy transfer: CO with isotopes of N_2 and deactivation of laser-excited SO_2, V. Revelant and C. Manzanares I. 69 (1982) 473
Vacuum UV photolysis of CO_2. Rare-gas oxide formation in matrices, J. Fournier, H.H. Mohammed, J. Deson and D. Maillard 70 (1982) 39

The challenge of fitting ab initio surfaces. I. Rigid-rotor CO_2–H_2 potential, C.P. Shukla, A.K. Bachhawat and N. Sathyamurthy 70 (1982) 83
Semiclassical analysis of measurements of the total cross section Q and the small-angle differential cross section for CsF–Ar: an accurate method for absolute Q values, J.M. Henrichs, H.C.W. Beijerinck and N.F. Verster 70 (1982) 93
Simulation of relaxation by binary collisions: comparison with relaxation in a fluid for bromine in argon, D.L. Jolly, B.C. Freasier, N.D. Hamer and S. Nordholm 70 (1982) 127
Gaseous ion transport coefficients, L.A. Viehland 70 (1982) 149
Hydrogen-bonded complex between HNO and formaldehyde. Photolysis of methyl nitrite in an argon matrix, R.P. Müller, P. Russegger and J.R. Huber 70 (1982) 281
Low-temperature dielectric losses of hydrocarbon media containing polar additives, J. le G. Gilchrist 70 (1982) 353

Ionic and excited state phenomena
Pseudopotential calculations on P_2, P_2^+, P_4 and P_4H^+, U. Wedig, H. Stoll and H. Preuss 61 (1981) 117
Translational energy distribution and production mechanism of excited hydrogen atoms produced in electron–CH_4 collisions, T. Ogawa, J. Kurawaki and M. Higo 61 (1981) 181
The predissociation of molecular oxygen cations O_2^+ ($\tilde{B}\ ^2\Sigma_g^-$), R. Bombach, A. Schmelzer and J.-P. Stadelmann 61 (1981) 214
An ICR study of sequential two-photon dissociation of benzene, cyanobenzene and bromobenzene molecular ions, P.N.T. van Velzen and W.J. van der Hart 61 (1981) 325
Isomerization of molecular ions of alkenes and cycloalkanes studied by photodissociation in an ICR spectrometer, P.N.T. van Velzen and W.J. van der Hart 61 (1981) 335
Semi-empirical calculation on core ionizations and simultaneous excitations by use of the π-electron and equivalent core approximations. The theoretical foundations of the method and the application to some π-conjugated molecules, N. Kosugi and H. Kuroda 61 (1981) 431
Photoionization study of the kinetics of unimolecular decomposition of halobenzene ions, S.T. Pratt and W.A. Chupka 62 (1981) 153
The infrared, Raman, resonance Raman spectra and the valence force field of the ZrS_3 layertype compound, C. Sourisseau and Y. Mathey 63 (1981) 143
De-excitation rate constants of Ne($^3P_2$, $^3P_1$ and $^3P_0$) by atoms and molecules as studied by the pulse radiolysis method, A. Yokoyama and Y. Hatano 63 (1981) 59
Determination of the translational energy of O(3s ^{3}S) excited in the dissociative excitation of O_2 and NO by He*(2 ^{3}S), L.G. Piper and M.A.A. Clyne 63 (1981) 77
The infrared, Raman, resonance Raman spectra and the valence force field of the ZrS_3 layer-type compound, C. Sourisseau and Y. Mathey 63 (1981) 143
Photodissociation of vibrationally excited CH_3Br, P.F. Zittel and D.D. Little 63 (1981) 227
Excited state properties from the equations of motion method. Application of the MCTDHF–MCRPA to the dipole moments and oscillator strengths of the A $^1\Pi$, a $^3\Pi$, a′ $^3\Sigma^+$, and d $^3\Delta$ low-lying valence states of CO, D. Lynch, M.F. Herman and D.L. Yeager 64 (1982) 69
The electronic structure and the He(I) photoelectron spectrum of bis(π-pentadienyl)di-nickel, M.C. Böhm and R. Gleiter 64 (1982) 183
Configuration interaction calculations of satellite structure in photoelectron spectra of H_2O, R. Arneberg, J. Müller and R. Manne 64 (1982) 249
Mechanism of the metastable reaction $H_2S^+ \rightarrow S^+ + H_2$; product energy distributions and their dependence on temperature, M.F. Jarrold, A.J. Illies and M.T. Bowers 65 (1982) 19

The kinetics of the photochemical hydrogen abstraction in crystals of fluorene doped with acridine, J.P. Colpa and D. Stehlik 65 (1982) 97
The Coulomb condensate of the nonlinear Poisson–Boltzmann equation: a unified theory, M.A. Lampert 65 (1982) 143
High resolution translational energy spectroscopy: electronic transitions in Kr^+, and I^+ and vibronic transitions in N_2^+, A.J. Illies and M.T. Bowers 65 (1982) 281
Dissociative excitation of water by metastable argon, H.L. Snyder, B.T. Smith, T.P. Parr and R.M. Martin 65 (1982) 397
Radiative decay times and kinetic of the luminescence from $KI:Sn^{2+}$, L.S. Dang, P.W.M. Jacobs, K. Schmitt, V.S. Sivasankar and D.J. Simkin 66 (1982) 51
Models of three and four body electron attachment to CO_2 molecules, D.R.A. McMahon 66 (1982) 67
Photofragment spectroscopy of ICN at 266.0 nm and 299.4 nm: vibrational and rotational distributions of $CN(X\,^2\Sigma^+)$, A.P. Baronavski 66 (1982) 217
Electron impact dissociation of molecular hydrogen and deuterium: translational energy distribution of atomic hydrogen and deuterium ($n = 3, 4, 5$), M. Higo, S. Kamata and T. Ogawa 66 (1982) 243
Absolute dipole oscillator strengths for molecular and dissociative photoionization of COS(10–50 eV) and CS_2(10–40 eV), F. Carnovale, A.P. Hitchcock, J.P.D. Cook and C.E. Brion 66 (1982) 249
Clarification of the assignment of the electronic spectrum of hydrogen chloride based on ab initio CI calculations, M. Bettendorff, S.D. Peyerimhoff and R.J. Buenker 66 (1982) 261
Energy selection experiments in glassy matrices: the fluorescence spectrum of a synthetic isobacteriochlorin, F.A. Burkhalter and U.P. Wild 66 (1982) 327
Photoelectron–photoion coincidence study of CF_3I. Implications for the cw IR laser multiphoton dissociation of CF_3I^+, R. Bombach, J. Dannacher, J.-P. Stadelmann, J. Vogt, L.R. Thorne and J.L. Beauchamp 66 (1982) 403
On the validity of the $X\alpha$ method in the computation of ionization potentials. A comparison of the results for small molecules, G. De Alti, P. Decleva and A. Lisini 66 (1982) 425
Experimental and theoretical studies of the valence-shell dipole excitation spectrum of molecular fluorine, A.P. Hitchcock, C.E. Brion, G.R.J. Williams and P.W. Langhoff 66 (1982) 435
Double ionization of methane, P.E.M. Siegbahn 66 (1982) 443
Symmetry distortions and pseudo-Jahn–Teller effect of peri- and cata-hexabenzocoronene in their triplet states as observed by ODMR techniques, C. Bräuchle 67 (1982) 97
The parameter dependence of calculated Koopmans' defects in the framework of a model hamiltonian verified in the case of transition metal compounds, M.C. Böhm 67 (1982) 255
Translational spectroscopy of electron impact dissociation of molecules isoelectronic with Ne by Doppler profile measurements of Balmer-α emission, N. Kouchi, M. Ohno, K. Ito, N. Oda and Y. Hatano 67 (1982) 287
Dual phosphorescence of halogenated benzenes in rigid-glass solution, T. Takemura, Y. Yamada and H. Baba 68 (1982) 171
A dissociative electroionization study of nitrous oxide. The NO^+ and N_2^+ dissociation channels, J.L. Olivier, R. Locht and J. Momigny 68 (1982) 201
Energy disposal in the rotational pre-dissociation of ND_3^+, I. Powis 68 (1982) 251
Laser induced fluorescence study of thermal energy charge transfer reactions from $Ar^+(^2P_{1/2}, ^2P_{3/2})$ and $CO^+(X\,^2\Sigma, v'')$ to CO, J. Danon and R. Marx 68 (1982) 255
Differential cross sections for elastic scattering and electron detachment in collisions of halogen anions with noble gas atoms, C. de Vreugd, R.W. Wijnaendts van Resandt, J.B. Delos and J. Los 68 (1982) 261

Energy distributions of electrons detached in Cl^- + noble gas atom collisions, C. de Vreugd, R.W. Wijnaendts van Resandt, J.B. Delos and J. Los 68 (1982) 275
$SO(B\,^3\Sigma^-, A\,^3\Pi\text{–}X\,^3\Sigma^-)$ emission from low temperature rare gas–sulfur dioxide afterglows, K.T. Wu, H. Morgner and A.J. Yencha 68 (1982) 285
$\tilde{A} \rightarrow \tilde{X}$ fluorescence spectra of CH_3O and C_2H_5O generated by the ArF laser photolysis of alkyl nitrites, T. Ebata, H. Yanagishita, K. Obi and I. Tanaka 69 (1982) 27
Electron impact dissociation of $CH_4(CD_4)$: laser induced fluorescence of product CH^+ (CD^+), B.H. Mahan and A. O'Keefe 69 (1982) 35
Correlation of positronium yield with excess electron mobility in liquid neopentane, F.M. Jacobsen, O.E. Mogensen and G. Trumpy 69 (1982) 71
Vibronic effects in photolysis of metalloporphyrins and hemoproteins, I.B. Bersuker, S.S. Stavrov and B.G. Vekhter 69 (1982) 165
Angular distribution of photopredissociation fragments from CH_3I^+, M. Tadjeddine, G. Bouchoux, L. Malegat, J. Durup, C. Pernot and J. Weiner 69 (1982) 229
Binary (e, 2e) spectroscopy and momentum-space chemistry of CO_2, J.P.D. Cook and C.E. Brion 69 (1982) 339
Simulation of Doppler profiles of atomic radiation excited by molecular dissociation. The effect of population of magnetic sublevels, N. Kouchi, K. Ito, Y. Hatano and N. Oda 70 (1982) 105
Relaxation of dihaloacetylene cations in their $\tilde{A}$ and $\tilde{B}$ states studied by photoelectron–photon coincidence spectroscopy, J.P. Maier and F. Thommen 70 (1982) 325
A photoelectron–photoion coincidence study of acetaldehyde and ethylene oxide molecular ions, K. Johnson, I. Powis and C.J. Danby 70 (1982) 329

Ionization
The sum rule, an assignment tool? D.M. de Leeuw and C.A. de Lange 61 (1981) 109
Charge transfer transitions in solid tetracene and pentacene studied by electroabsorption, L. Sebastian, G. Weiser and H. Bässler 61 (1981) 125
Photoionization study of the kinetics of unimolecular decomposition of halobenzene ions, S.T. Pratt and W.A. Chupka 62 (1981) 153
A non-empirical LCAO MO SCF investigation of the ground and core ionized states of tetrahedrane and cyclobutadiene, D.T. Clark and A. Harrison 62 (1981) 353
Momentum distributions and binding energies for the valence orbitals of methanol, A. Minchinton, C.E. Brion and E. Weigold 62 (1981) 369
Momentum distributions and ionization potentials for the valence orbitals of benzene, I. Fuss, I.E. McCarthy, A. Minchinton, E. Weigold and F.P. Larkins 63 (1981) 19
Internally folded densities, A.J. Thakkar, A.M. Simas and V.H. Smith Jr. 63 (1981) 175
Symmetry breaking and ionization from symmetry equivalent inner shells and lone pairs in $X\alpha$ theory, L. Noodleman, D. Post and E.J. Baerends 64 (1982) 159
Molecular orbital momentum distributions and binding energies for nitric oxide, C.E. Brion, J.P.D. Cook, I.G. Fuss and E. Weigold 64 (1982) 287
Collisional ionization of highly excited neon atoms by nonpolar hydrocarbons, M. Uematsu, H. Hiraishi, T. Fukuyama, T. Kondow and K. Kuchitsu 64 (1982) 381
Hole-mixing effects in the ionization of some unsaturated oxo-compounds, W. von Niessen, G. Bieri, J. Schirmer and L.S. Cederbaum 65 (1982) 157
A model for multiphoton ionisation mass spectroscopy with application to benzene, W. Dietz, H.J. Neusser, U. Boesl, E.W. Schlag and S.H. Lin 66 (1982) 105
Absolute dipole oscillator strengths for molecular and dissociative photoionization of COS(10–50 eV) and CS_2(10–40 eV), F. Carnovale, A.P. Hitchcock, J.P.D. Cook and C.E. Brion 66 (1982) 249

A quantum chemical investigation of the ammonium radical. I. SCF-Xα- SW calculations of the electronic structure and Rydberg spectra, E. Broclawik, J. Mrozek and V.H. Smith Jr. 66 (1982) 417
Perturbation corrections to Koopmans' theorem. V. A study with large basis sets, D.P. Chong and S.R. Langhoff 67 (1982) 153
Gas phase high temperature photoelectron spectroscopy: the tin monoxide molecule, J.M. Dyke, A. Morris, A.M.A. Ridha and J.G. Snijders 67 (1982) 245
A dissociative electroionization study of nitrous oxide. The NO^+ and N_2^+ dissociation channels, J.L. Oliver, R. Locht and J. Momigny 68 (1982) 201
Resonances in photoionization cross sections. A comparison of pseudo-bound-state methods, C.E. Woodward, S. Nordholm and G. Bacskay 69 (1982) 267
Photoelectron angular distribution and assignments of photoelectron spectra of nitrogen dioxide, nitromethane and nitrobenzene, S. Katsumata, H. Shiromaru, K. Mitani, S. Iwata and K. Kimura 69 (1982) 423
Multiphoton ionization and fragmentation mechanisms of CS_2, M. Seaver, J.W. Hudgens and J.J. de Corpo 70 (1982) 63
He(I) photoelectron spectroscopy of transient species: germanium dichloride and germanium dibromide, G. Jonkers, S.M. van der Kerk and C.A. de Lange 70 (1982) 69

Isotope effects

Diffusion of some species of different charge and mass in light and heavy water, C. Biondi and L. Bellugi 62 (1981) 145
Vibrational spectra and dynamics of conformation and hydrogen bonding of N-methylacetamide. I. Conformational dynamics of the $CH_3CONHCH_3$ molecule and NH out of plane band splitting, F. Fillaux and M.H. Baron 62 (1981) 275
Vibrational spectra and dynamics of conformation and hydrogen bonding of N-methylacetamide. II. Dynamics of the NH... O hydrogen bond and NH(ND) stretching band structure, F. Fillaux 62 (1981) 287
Theoretical study on an anomalous isotopic effect on the position and integrated intensity of the IR stretching vibration band for medium-strong and strong hydrogen bonds, Y. Guissani and H. Ratajczak 62 (1981) 319
Theoretical studies of the temperature dependence of magnetic shielding tensors: H_2, HF and LiH, R. Ditchfield 63 (1981) 185
Resonance Raman and polarized light infrared spectra of 1,4-dihydroxyanthraquinone. Vibrational studies of the ground and excited electronic states, G. Smulevich, L. Angeloni, S. Giovannardi and M.P. Marzocchi 65 (1982) 313
Sensitized dissociation of UF_6, $XeOF_4$ and SF_5Cl by SF_6 excited with a pulsed CO_2 laser, C. Angelie, M. Cauchetier and J. Paris 66 (1982) 129
Observed adiabatic corrections to the Born–Oppenheimer approximation for diatomic molecules with ten valence electrons, E. Tiemann, H. Arnst, W.U. Stieda, T. Törring and J. Hoeft 67 (1982) 133
Muonium substituted organic free radicals in liquids. Muon-electron hyperfine coupling constants of alkyl and allyl radicals, E. Roduner, W. Strub, P. Burkhard, J. Hochmann, P.W. Percival, H. Fischer, M. Ramos and B.C. Webster 67 (1982) 275
Isotopic field shift in the transition $A\,0^+ - X\,^1\Sigma^+$ of PbS, H. Knöckel and E. Tiemann 68 (1982) 13
Isotopic field shift of the rotational energy of the Pb-chalcogenides and Tl-halides, J. Schlembach and E. Tiemann 68 (1982) 21

Position dependent deuterium effects on the vapor phase fluorescence lifetimes of tetradeuterophenanthrenes, J.J. O'Brien, M.D. Horne, B.K. Selinger and B.R. Henry 68 (1982) 123
Optical activity due to deuterium substitution in adamantanone and adamantanethione. Barrier to inversion in the $^1n\pi^*$ excited state, P.H. Schippers and H.P.J.M. Dekkers 69 (1982) 19
Theory of tunnel transitions of atoms in solids, L.I. Trakhtenberg, V.L. Klochikhin and S.Ya. Pshezhetsky 69 (1982) 121
Observation of the inverse isotope effect in a tunnel electron transfer, A.I. Fiksel, V.N. Parmon and K.I. Zamaraev 69 (1982) 135
A comparison of tunneling transfer theories for asymmetric isomerization reactions, P.H. Cribb, S. Nordholm and N.S. Hush 69 (1982) 259
Theoretical study of the kinetic isotope effect in proton-transfer reactions. Influence of the interaction potential of reactants on the kinetic isotope effect, J. Sühnel and K. Gustav 70 (1982) 109

Surface effects
Gas/gas and gas/wall energy transfer functions in the multichannel thermal decomposition of chloroethane-2-d_1, K.D. King, T.T. Nguyen and T.G. Gilbert 61 (1982) 221
Energetics and mechanism for hydroxyl radical production from the Pt-catalyzed decomposition of water, L.D. Talley and M.C. Lin 61 (1981) 249
Trends in chemisorption energies with atomic number, F. Flores, I. Gabbay and N.H. March 63 (1981) 391
Laser diagnostics of the surface catalyzed equilibrium $2Na-Na_2$, J.P. Woerdman and S.S. Eskildsen 65 (1982) 83
A quasi-hard wall model for the scattering of atomic beams from solid surfaces, T. Maniv 65 (1982) 177
Production of the NH radical from the catalytic decomposition of NH_3 on polycrystalline Pt and Fe surfaces at high temperatures, G.S. Selwyn and M.C. Lin 67 (1982) 213

Optical activity
Solvent effect on optical activity in dilute solutions, S. Woźniak and B. Linder 63 (1981) 377
Surface plasmon absorption of various colloidal metal particles, H. Abe, K.-P. Charlé, B. Tesche and W. Schulze 68 (1982) 137
Optical activity due to deuterium substitution in adamantanone and adamantanethione. Barrier to inversion in the $^1n\pi^*$ excited state, P.H. Schippers and H.P.J.M. Dekkers 69 (1982) 19

Nonlinear optical effects
Vibrational transitions in excited states of molecules using coherent Stokes Raman spectroscopy: application to ferrocytochrome-c, J.R. Andrews, R.M. Hochstrasser and H.P. Trommsdorff 62 (1981) 87
The two-photon fluorescence excitation spectrum of dibenzothiophene, E. Castellucci, P. Foggi and P.R. Salvi 63 (1981) 437
Nonlinear polariton effects in the phenanthrene crystal, C.K. Johnson and G.J. Small 64 (1982) 83
Two-photon excitation spectra of the lowest electronic states of 2,2′-bipyridine, E. Castellucci, P.R. Salvi and P. Foggi 66 (1982) 281
An approach to laser–molecule dynamics using raising and lowering operators, S. Leasure 67 (1982) 83
Kinetic observations on the E region states of iodine excited by two-photon spectroscopy, G.W. King, I.M. Littlewood and J.R. Robins 68 (1982) 129
On statistics of an ensemble of oscillators under excitation. III. Quantum non-linear oscillators with fast phase relaxation in non-monochromatic external field, V.N. Sazonov, A.A. Stuchebrukhov and S.V. Zatsepin 69 (1982) 459

Optical dispersion and molar refractivities of alkali halide crystals and aqueous solutions, A. Penzkofer, H. Glas and J. Schmailzl 70 (1982) 47
Multiphoton ionization and fragmentation mechanisms of CS_2, M. Seaver, J.W. Hudgens and J.J. de Corpo 70 (1982) 63

Transport of charge and mass
Analysis of kinetic models for the tunnel electron transfer reactions. Reaction kinetics for various radial and angular dependences of the tunneling probability, A.B. Doktorov, R.F. Khairutdinov and K.I. Zamaraev 61 (1981) 351
Diffusion of some species of different charge and mass in light and heavy water, C. Biondi and L. Bellugi 62 (1981) 145
A statistical model for the density dependence of electron attachment to O_2 molecules, D.R.A. McMahon 63 (1981) 95
Ion transport in polar gases, K. Sakimoto 63 (1981) 419
The effect of intramolecular modes on the velocity of non-radiative transitions in a polar medium, A.B. Helman 65 (1982) 271
Generalized lagrangian equations of nonlinear reaction – diffusion, M.A. Biot 66 (1982) 11
Structure and properties of cation-radical salts of arenes. II. Crystal structure, phase transitions and analysis of the electrochemical crystallization process of fluoranthenyl cation-radical salts, V. Enkelmann, B.S. Morra, Ch. Kröhnke, G. Wegner and J. Heinze 66 (1982) 303
Influence of resonant charge transfer on ion diffusion and generalized Einstein relations, M. Waldman, E.A. Mason and L.A. Viehland 66 (1982) 339
Dielectric saturation and dielectric friction on an ion in a polar solvent, J.B. Hubbard and R.F. Kayser 66 (1982) 377
Low temperature chemical reactions. I. Models, V.A. Benderskii, P.G. Philippov, Yu.I. Dakhnovskii and A.A. Ovchinnikov 67 (1982) 301
Theory of tunnel transitions of atoms in solids, L.I. Trakhtenberg, V.L. Klochikhin and S.Ya. Pshezhetsky 69 (1982) 121
Observation of the inverse isotope effect in a tunnel electron transfer, A.I. Fiksel, V.N. Parmon and K.I. Zamaraev 69 (1982) 135

Thermodynamic properties
Moment analysis of the Mori continued fraction: dipole absorption in bromoethane and 1-bromonaphthalene, G.J. Davies, M. Veerappa and M.W. Evans 61 (1981) 73
Geometry optimization in ab initio SCF calculations. VII. Proton affinities and ion structures calculated wit floating orbital geometry optimization (FOGO), H. Huber and J. Vogt 64 (1982) 399
Approximative evaluations of the electrostatic free energy and internal energy changes in solution processes, S. Miertuš and J. Tomasi 65 (1982) 239
Generalized lagrangian equations of nonlinear reaction – diffusion, M.A. Biot 66 (1982) 11
Photoelectron–photoion coincidence study of CF_3I. Implications for the cw IR laser multiphoton dissociation of CF^3I^+, R. Bombach, J. Dannacher, J.-P. Stadelmann, J. Vogt, L.R. Thorne and J.L. Beauchamp 66 (1982) 403
Theory of sorption of gases on polymers. I. Conformational effects and the double-sigmoid shape of sorption isotherm, M. Pyda and M. Kurzyński 67 (1982) 7
Double Hopf-bifurcation in plane quadratic mass–action systems, C. Escher 67 (1982) 239

Structure of solids and liquids
Proton–deuterium polarization transfer in magic angle spinning polycrystalline solids in the rotating frame, L. Müller 61 (1981) 235
Factors affecting anisotropic reorientation in a series of aromatic molecules dissolved in carbon disulfide, H. Nery, D. Canet and J.L. Rivail 62 (1981) 123
Structure of organic monomolecular layers of diacetylene studied by IR dichroism and ESR, F. Kajzar and J. Messier 63 (1981) 123
Far-infrared and Raman spectra of mixed HCl–DCl crystals, J.-C. Bureau and L.C. Brunel 63 (1981) 293
Picosecond proton transfer studies in water–alcohols solutions, D. Huppert and E. Kolodney 63 (1981) 401
EXAFS structural parameters for some titanium halides, G. Vlaic, J.C.J. Bart, W. Cavigiolo, S. Mobilio and G. Navarra 64 (1982) 115
Consistent force field model treatment of the normal coordinate problem of matrix isolated molecules, R. Gunde, P. Felder and Hs.H. Günthard 64 (1982) 313
Ab initio studies on hydrogen bonded chains. II. Equilibrium geometry and vibrational spectra of the bent chain of hydrogen fluoride molecules, A. Beyer and A. Karpfen 64 (1982) 343
A quasi-hard wall model for the scattering of atomic beams from solid surfaces, T. Maniv 65 (1982) 177
Order parameters in hydrocarbon chains, O. Edholm 65 (1982) 259
Studies of quadrupolar and dipolar electric field effects in the NMR spectra of binary mixtures of liquids, T.M. Plantenga, P.C.M. van Zijl and C. MacLean 66 (1982) 1
A theory of fluorescence depolarization in macroscopically ordered membrane systems, B.W. van der Meer, R.P.H. Kooyman and Y.K. Levine 66 (1982) 39
Nonlinear dielectric study of molecular association of phenyl and of methyl isothiocyanates, M. Dutkiewicz 68 (1982) 83
Optical dispersion and molar refractivities of alkali halide crystals and aqueous solutions, A. Penzkofer, H. Glas and J. Schmailzl 70 (1982) 47

Phase transitions
Interactions between Frenkel excitons. I. Formalism and preliminary results, D. Fox 61 (1981) 477
Do protons tunnel in the formic acid dimer and in the crystal? G.N. Robertson and M.C. Lawrence 62 (1981) 131
Bifurcation and coexistence of several limit cycles in models of open two-variable quadratic mass–action systems, C. Escher 63 (1981) 337
A study of magnetic ordering and phase transitions in ferrous iodide by means of high field ^{57}Fe Mössbauer spectroscopy, G.H.M. Calis, A.E.M. Swolfs and J.M. Trooster 64 (1982) 273
Enhancement of low-temperature chemical reactions in phase transitions, Yu.I. Dakhnovskii, A.A. Ovchinnikov and V.A. Benderskii 66 (1982) 93
Structure and properties of cation-radical salts of arenes. II. Crystal structure, phase transitions and analysis of the electrochemical crystallization process of fluoranthenyl cation-radical salts, V. Enkelmann, B.S. Morra, Ch. Kröhnke, G. Wegner and J. Heinze 66 (1982) 303
Fluorescence polarization anisotropy and kinetics of malachite green measured as a function of solvent viscosity, F. Pellegrino, A. Dagen and R.R. Alfano 67 (1982) 111
Double Hopf-bifurcation in plane quadratic mass–action systems, C. Escher 67 (1982) 239
The effect of the lattice expansion on high spin $\rightleftharpoons$ low spin transitions, H. Spiering, E. Meissner, H. Köppen, E.W. Müller and P. Gütlich 68 (1982) 65
Acoustic anomaly in a critical binary mixture of aniline and cyclohexane at low and ultrasonic frequencies, H. Tanaka, Y. Wada and J. Nakajima 68 (1982) 223

Positron Annihilation

Proceedings of the Sixth International Conference on Positron Annihilation, The University of Texas at Arlington, April 3 - 7, 1982

edited by PAUL G. COLEMAN, SURESH C. SHARMA, LEONARD M. DIANA,
Center for Positron Studies, The University of Texas at Arlington, U.S.A.

1982 xxxii + 986 pages Price: US $123.50/Dfl. 290.00 ISBN 0-444-86534-9

Half a century after its discovery, the positron is at the center of a world-wide industry which extends into almost every field of scientific endeavor, giving us new insights into problems ranging from the structure of the atom to the workings of the human brain, from radiation damage in reactor materials to the weak interaction. The healthy state of low-energy positron science today is reflected by the steady growth of the numbers of participants and papers at the International Conferences on Positron Annihilation.

This book contains 31 review papers and progress reports and over 200 research papers on recent advances in all the areas of low-energy positron science, including atomic and molecular physics and chemistry, metallurgy studies of the solid state, surface science, positronium chemistry, astrophysics, and positron tomography. Also included is a memorable keynote address by Professor Martin Deutsch, who discovered positronium, and an insightful summary by Professor Stephan Berko. Important developments chronicled in this book include those resulting from the growth of positron beam technology and new applications and extensions of traditional techniques.

CONTENTS: Preface. **Invited Papers:** In Memoriam: John D. McNutt and Daniel R. Gustafson *(L. O. Roellig).* Fifty Years of Positrons Thirty Years of Positronium *(M. Deutsch).* Current Status of Fundamental Research Using Positrons and Positronium *(D. W. Gidley, A. Rich and F. P. Zitzewitz).* Positron Astrophysics *(R. J. Drachman).* Positron-Gas Collision Experiments *(T. S. Stein and W. E. Kauppila).* Positrons in Gases — A Progress Report *(T. C. Griffith et al.).* Chemical Stability and Approximate Quantum Mechanics *(D. M. Schrader).* Positron and Positronium Interactions at Surfaces *(A. P. Mills, Jr.).* Low Energy Positron Diffraction *(K. F. Canter).* Defects and Defect Structures in Metals Investigated by Monoenergetic Positrons *(W. Triftshäuser and F. Kögel).* Positron Trapping on Transient, Thermally Excited Dilations *(I. K. MacKenzie).* Two-Dimensional Angular Correlation: Comparison Between Theory and Experiment *(R. M. Singru).* Progress in 2-D Angular Correlation of Positron Annihilation Using High-Density Proportional Chambers *(A. A. Manuel et al.).* Electron and Positron States in Disordered Alloys *(A. Bansil).* Positron Annihilation Spectroscopy of Defects in Metals - An Assessment *(R. W. Siegel).* Thermal Equilibrium Studies of Vacancies in Metals by Positron Annihilation *(H. E. Schaefer).* Positron Lifetimes in Presence of a Non-Uniform Distribution of Traps *(A. Duspasquier).* Vacancy Annealing in Pure and Carbon-Doped Iron *(P. Hautojärvi).* Positron Studies of Amorphous Alloys *(N. Shiotani).* Positron Annihilation in Layered Structures *(F. Heinrich et al.).* Two Remarks Concerning Possibilities of the Annihilation Method to Structural Investigations of Systems Drastically Changing Their Constitution *(B. Rozenfeld et al.).* Motion of Positronium in Some Insulating Crystals *(K. Fujiwara).* Positrons in Semiconductors *(I. YA. Dekhtyar).* On Positron Studies of Molecular Crystals *(M. Eldrup).* Positronium Formation in Condensed Matter and High-Density Gases *(O. E. Mogensen).* Aggregation Phenomena in Solutions Studied by Positron Annihilation Technique *(H. J. Ache).* Positron-Induced Fluorescence in Organic Systems *(V. I. Goldanskii and V. P. Shantarovich).* Dynamic Positron Emission Tomography in Man Using Small Bismuth Germanate Crystals *(S. E. Derenzo et al.).* Time-of-Flight Assisted Positron Emission Tomography *(N. Mullani).* Towards High-Resolution Positron Emission Tomography for Small Volume *(B. T. A. McKee).* Summary of the Conference *(S. Berko).* **Sections: I.** Positronium: Fundamental Studies. **II.** Positron Astrophysics. **III.** Positron Interactions with Atoms and Molecules. **IV.** Surfaces. **V.** Metals and Alloys. **VI.** Two-Dimensional Angular Correlation. **VII.** Defects in Metals. **VIII.** Defects in Alloys. **IX.** Amorphous Alloys. **X.** Non-Metals. **XI.** Phase Transitions. **XII.** Positron Chemistry. **XIII.** Advances in Techniques. **XIV.** Positron Emission Tomography: Biomolecular Systems.

FERROMAGNETIC MATERIALS

A Handbook on the Properties of Magnetically Ordered Substances

edited by **E. P. WOHLFARTH,** *Department of Mathematics, Imperial College of Science and Technology, London, England*

This Handbook will be the most comprehensive work to date on the subject of ferromagnetic materials. It is intended as a work of reference as well as a textbook and aims to encompass the achievements both of earlier compilations of tables and of earlier monographs.
The work will eventually consist of 4 volumes.

The articles (about 32 in total are planned) are written by leading authorities active in research and development. Each article concentrates on a description of material properties in graphical and tabular form, discussed in a broad background of the physics, chemistry, metallurgy, structure, and, to a lesser extent, engineering aspects of these properties.

This impressive work is intended to replace the classical and monumental work on Ferro-magnetism by *Bozorth,* published some 30 years ago. As such, it will be of great value to industrial researchers and technologists. University departments of Pure and Applied Physics, Chemistry, Metallurgy, and Electrical Engineering will also welcome the publication of this Handbook.

A COMMENT FROM THE PRESS:

"...these volumes will be the most comprehensive work to date on the subject of ferromagnetism... wherever the experimentalists are playing, they will find these volumes a must..."

Physics Today

Volume 1

1980. x + 634 pages
Price: US $110.75/Dfl. 260.00 ISBN 0-444-85311-1

CONTENTS: *Chapters:* 1. Iron, Cobalt and Nickel *(E. P. Wohlfarth).* 2. Dilute Transition Metal Alloys: Spin Glasses *(J. A. Mydosh and G. J. Nieuwenhuys).* 3. Rare Earth Metals and Alloys *(S. Legvold).* 4. Rare Earth Compounds *(K. H. J. Buschow).* 5. Actinide Elements and Compounds *(W. Trzebiatowski).* 6. Amorphous Ferromagnets *(F. E. Luborsky).* 7. Magnetostrictive Rare Earth -Fe_2 Compounds *(A. E. Clark).* Author Index. Subject Index. Materials Index.

Volume 2

1980. x + 592 pages
Price: US $110.75/Dfl. 260.00 ISBN 0-444-85312-x

CONTENTS: *Chapters:* 1. Ferromagnetic Insulators: Garnets *(M. A. Gilleo).* 2. Soft Magnetic Metallic Materials *(G. Y. Chin and J. H. Wernick).* 3. Ferrites for Non-Microwave Applications *(P. I. Slick).* 4. Microwave Ferrites *(J. Nicolas).* 5. Crystalline Films for Bubbles *(A. H. Eschenfelder).* 6. Amorphous Films for Bubbles *(A. H. Enschenfelder).* 7. Recording Materials *(G. Bate).* 8. Ferromagnetic Liquids *(S. W. Charles and J. Popplewell).* Author Index. Subject Index. Materials Index.

Volume 3

1982 x + 836 pages
Price: US $159.50/Dfl. 375.00 ISBN 0-444-86378-8

CONTENTS: Preface. 1. Magnetism and Magnetic Materials: Historial Developments and Present Role in Industry and Technology *(U. Enz).* 2. Permanent Magnets; Theory *(H. Zijlstra).* 3. The Structure and Properties of Alnico Permanent Alloys *(R. A. McCurrie).* 4. Oxide Spinels *(S. Krupička and P. Novák).* 5. Fundamental Properties of Hexagonal Ferrites with Magnetoplumbite Structure *(H. Kojimo).* 6. Properties of Ferroxplana-Type Hexagonal Ferrites *(M. Sugimoto).* 7. Hard Ferrites and Plastoferrites *(H. Stäblein).* 8. Sulphospinels *(R. P. van Stapele).* 9. Transport Properties of Ferromagnets *(I. A. Cambell and A. Fert).* Indices.

INFORMATION TO AUTHORS

Papers in all areas of Chemical Physics are welcomed, but referees will be asked to judge whether experimental papers have been brought into sufficient relation with theory, and whether theoretical papers bear on experimental verification or exhibit progress in experimental developments to this end.

Contributions written in clear English should be sent *in triplicate* to one of the editors. Contributions may also be submitted to a member of the Advisory Editorial Board who is familiar with the research, in which case *two copies plus the original figures* should be sent simultaneously to one of the editors. In any event, all manuscripts will be refereed at the discretion of the editors.

Authors from the Americas, the Far East and Australia should submit their papers to the American editor; those from Europe, the Near and Middle East and Africa should deal with the European editor.

Manuscripts submitted should be first copies (or clear Xerox copies thereof) typed with double spacing and wide margins; all pages should be numbered, and the text arranged into paragraphs. Before mailing the manuscripts, please check the following points:

1. *Title*: The title should be chosen for its sufficient information content such that it conveys to the informed reader the particular nature of the contents he can expect from the paper. When the length exceeds 45 letters, an abbreviated running title should be indicated.
2. *Abstract*: The abstract of 100–150 words should contain all the substance of the methods and the results achieved as well as keywords of the paper.
3. *Address*: The name(s) of the author(s) and the name and address of the institute, where the research work was done should be indicated on the manuscript. Proofs will be sent by the publisher to this address, unless specifically requested otherwise.
4. *Figures*: The drawings for the figures must be submitted on separate sheets, drawn in black Indian ink in large size and carefully lettered (with the use of stencils). The lettering as well as the details should have proportionate dimensions so as not to become illegible or unclear after the usual reduction by the printers; in general the figures should be designed for a reduction factor of two to three. Each figure should have a number and a caption; the captions should be collected on a separate sheet. The appropriate place of a figure should be indicated in the margin. Your figure material will be returned after publication of the article.
5. *Formulae*: Displayed formulae should be numbered and typed or clearly written by hand. Vectors will be printed in bold-face italics (heavy, slanting type), and should be indicated by a wavy underlining in the type-script.

   Special attention should be paid to characters that can easily be misread, such as i (lower case), I (cap.), l (el), 1 (one), ′ (prime), o (lower case), O (cap.), 0 (zero), ° (degree), u, v (vee), ν (Greek nu), V (cap.) x, χ, X, z, Z, p, P, ρ (Greek rho), etc.
6. *Tables*: Tables should be typed on separate sheets. Each table should have a number and a title. The appropriate places for the insertion of the tables should be indicated in the margin.
7. *References*: In the text, reference to other parts of the paper should be made by section (or equation) number, not by page number. References to other papers should be consecutively numbered in the text and should be listed by number, preferably as in the following examples:

   For a book: A. Messiah, Quantum mechanics, Vol. 1 (North-Holland, Amsterdam, 1970).

   For a paper in a journal: C.J. Winscom and A.H. Maki, Chem. Phys. Letters 12 (1971) 264.

   For a paper in a contributed volume: A. Carrington, in: Magnetic resonance and radiofrequency spectroscopy, ed. P. Averbuch (North-Holland, Amsterdam, 1968) p. 23.

   For an unpublished paper: G.J. Lycett, Ph.D. Thesis, University of Birmingham, England (1970).
8. *Footnotes*: As far as possible, footnotes should be avoided.

Upon acceptance of an article, author(s) resident in the USA will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information under the US Copyright Law.

Superionic Solids

Principles and Applications

by SURESH CHANDRA, *Banaras Hindu University, Varanasi, India*

1981 xiv + 388 pages Price: US $78.00/Dfl. 160.00 ISBN 0-444-86039-8

Superionic Solids (or Solid Electrolytes) are recently discovered materials which have a high level of ionic conduction. This book presents a comprehensive overview of the subject, intelligible to new researchers and useful to specialists. An extensive list of superionic materials and their properties is given, and special structural and theoretical principles responsible for high ionic conduction are discussed.

This work has been written in such a style as to make it self-reading for those with an introductory knowledge of solid state physics. The first chapter provides a general introduction to ionic solids from a structural point of view, while chapter 2 presents a summary of superionic materials developed so far. Their electrical conductivity and structure which makes them a special group of ionic solids are also discussed. The third chapter summarizes important experimental methods used for studying superionic solids. In materials characterization, some techniques are more important than others for each specialized group of solids.

Chapter 4 explains the possible mechanisms of ion transport in "point-defect type superionic solids" while chapter 5 deals with superionic solids having a 'liquid-like sublattice'. Finally, chapter 6 summarizes various applications of superionic solids.

This publication will be of particular value to faculty and research scholars in university departments such as physics, chemistry, electrochemistry, materials science and metallurgy. Scientists concerned with materials groups of research laboratories and directors or chiefs of groups within the batteries industry will also find it to be a worthwhile addition to their bookshelves.

CONTENTS: Preface. *Chapters:* 1. Introduction. 2. Superionic Materials and Structures. 3. Experimental Probes. 4. Ion Transport in 'Point-Defect Type' Ionic and Superionic Solids. 5. Ion Transport in 'Molten-Sublattice-Type' Superionic Solids. 6. Applications of Superionic Solids. References.

Also of Interest:

Solid State Ionics

Scope:
This interdisciplinary journal is devoted to physics, chemistry and materials science of ion transport phenomena in solids and properties resulting from ion mobility. The major part of each issue contains papers on such topics as physics and chemistry of defects; ionic transport measurements and mechanisms; theories of ion transport; incorporation of ions into electronic conductors; many aspects of solid state electro-chemistry/physics including interfacial properties; processes such as corrosion oxidation, sintering and other solid state reactions. Related technological applications such as batteries, fuel cells, electrochromic displays, solid state chemical sensors, hydrogen storage materials, catalysis, photography, electrolysis cells, metal winning, etc., are also included, provided that the performance characteristics are interpreted in terms of the relevant ionic transport processes. Review papers and relevant symposium proceedings are welcomed.

Publication Schedule 1982:
Volumes 6-8 in 9 issues
Subscription Price: US $273.25/Dfl. 560.00
ISSN: 0167-2738

Free specimen copies of the Journal are available from the Publisher.
